# Changing Worlds

## CAN EDUCATION ADAPT TO A NET GENERATION?

Education has been one of the slowest sectors to embrace the promise of online technology's rapid advance. Can these new technologies assist learning, and if so, how might resistance to e-learning be overcome?

Using a virtual excursion into two digital worlds, one created by students, another by teachers, this free public lecture explores the possibility that confusion about how we learn impedes the uptake of new technologies in education. Join us to provoke your thinking about what it means to learn. Refresh your ideas about curriculum, assessment, teaching and teacher and parent education.

### ASSOCIATE PROFESSOR LYN SCHAVERIEN

Lyn Schaverien leads the development and teaching of innovative postgraduate e-learning subjects at UTS's Faculty of Education, in collaboration with the UTS Institute for Interactive Media and Learning. She is Vice-President and immediate Past President of the NSW Institute for Educational Research. As Chief Investigator of two recent Australian Research Council Linkage projects, Professor Schaverien has collaboratively pioneered ways of achieving spread, depth, sustainability and student and teacher ownership of e-learning approaches in NSW. Before becoming a full-time academic Lyn forged a successful career as a primary/middle school teacher and primary principal.
