* Entry to this degree is by internal transfer from the B Health Science in Traditional Chinese Medicine during second year.

+ This course is being reviewed to ensure we’re providing students with the most current and career-focused content. If you would like to be among the first to know about these courses when we’re ready to roll them out, register your details at www.undergraduate.uts.edu.au/newcourses

3

REASONS TO CHOOSE UTS

1 PRACTICE-BASED APPROACH TO LEARNING

UTS courses are renowned for their practice-based approach. We ensure our students graduate with as much hands-on experience as possible, making them attractive to prospective employers.

2 INNOVATIVE EDUCATION

At UTS, we give our students the resources to achieve great things. With cutting-edge technology, specialist degrees in emerging fields and constantly evolving courses, UTS offers you an innovative, exciting education that responds to the needs of a rapidly changing world.

3 CENTRAL LOCATION

Located in Sydney's creative industries precinct and close to the CBD, UTS is not only convenient to get to, but is part of the city's vibrant and energetic atmosphere. If studying in the city is not for you, you can choose from selected courses taught at our Kuring-gai campus in Lindfield.

WHY UTS?

PRACTICE-BASED DEGREES

Learning the theory is important, but the real value lies in knowing how to apply it. At UTS, many assessments are based on real case studies and we encourage students to take advantage of our strong industry partnerships to undertake work experience as part of their degree. Many of our lecturers are also leaders in their field and actively working in their industry, so you'll get the most relevant and up-to-date teachings. This practical approach means our students graduate with the skills, knowledge and hands-on experience sought by employers worldwide.

INDUSTRY NETWORKS

More than 150 companies partner with UTS's innovative research programs to share their resources and expertise, with many offering employment opportunities to our best graduates. From corporate, government and community bodies to small and medium enterprises, our range of connections will give you insight into how industry works and what employers look for in graduates. Expand your network through ours and make those valuable contacts for your future career.

CONVENIENT LOCATIONS

Located in Sydney's creative industries precinct, our urban City campus is within easy walking distance to Central Station and the Sydney CBD, as well as the cosmopolitan inner city suburbs of Glebe, Surry Hills and Darling Harbour. You're surrounded by places to shop, eat and just hang out.

Twenty minutes north of the city, our Kuring-gai campus at Lindfield offers business, nursing, health and education degrees. The campus is easily accessible by public transport, but there's also limited parking on campus and a shuttle bus service that runs between the Lindfield and City campuses. From 2016, all Kuring-gai courses will be transferred to the UTS City campus.

FLEXIBLE STUDY OPTIONS

Schedule your study to suit your lifestyle! Many UTS classes are offered in multiple timeslots, giving you the option to choose day classes, evening classes, summer school, part-time or block courses. We also encourage you to consider undertaking a combined degree to broaden your career opportunities, or choose electives outside your field of study to keep you inspired by other subjects that interest you.

STUDENT LIFE AND SUPPORT SERVICES

A great university experience includes being part of a supportive community; to not only study, but socialise and connect. UTS has over 100 clubs and societies on campus, along with bars, cafes, a gym and our new Multi-Purpose Sports Hall.

To ensure you feel confident and supported, we offer academic assistance along with services to help with housing, money, making friends, health, cultural issues and career development.

WORLD-LEADING CAMPUS AND FACILITIES

No matter what you're studying, you'll be exposed to the latest technologies at UTS. And it's only going to get better.

Four new iconic buildings, enhanced social spaces and major refurbishments of existing buildings are underway on our City campus, with new student accommodation, teaching and learning spaces and sporting facilities already complete. Social and teaching spaces at our Kuring-gai campus at Lindfield have recently been expanded and upgraded, including state-of-the-art audio visual facilities.

INTERNATIONAL OPPORTUNITIES

The personal and professional development you gain through an international study experience will add value to your degree and broaden your career options. Study overseas as part of our global exchange program, or combine your degree with our unique international studies program and spend a year studying another language abroad. Our popular BUiLD program also offers overseas volunteer opportunities.

YOUR FUTURE CAMPUS

www.fmu.uts.edu.au/masterplan

UTS is on track to being one of the most innovative campuses in Australia, with a series of new buildings and major upgrades taking place between now and 2018 as part of our \$1 billion City Campus Master Plan. The master plan is not just about new buildings: we're creating a whole new university experience using sustainable design to shape the way you'll learn.

Dr Chau Chak Wing Building, opening in 2014

DR CHAU CHAK WING BUILDING

The future home to the UTS Business School is the first Australian structure designed by world-acclaimed architect Frank Gehry.

Broadway Building, opening in 2014

BROADWAY BUILDING

Its unique binary screen design complements its role as the future home of the Faculty of Engineering and Information Technology.

Thomas Street Building, opening in 2014

THOMAS STREET BUILDING

The new labs and prac spaces will enhance the Faculty of Science's existing teaching, learning and research facilities.

Alumni Green, re-opening in early 2014

ALUMNI GREEN

UTS Alumni Green will be transformed into a vibrant city space inspired by some of the world's great public spaces. The refreshed green will be a central meeting place, filled with new student-focused spaces.

Great Hall, opened in 2011

GREAT HALL

UTS's principal ceremonial venue has received a complete makeover. It's used for public talks, formal dinners, graduations, examinations and events.

Multi-Purpose Sports Hall, opened in 2011

MULTI-PURPOSE SPORTS HALL

Located under the Alumni Green, the sports hall is home to a stunning indoor sports court with connecting tutorial and change rooms, gym and dance studio.

CUTTING-EDGE FACILITIES In addition to award-winning Mac labs, and multimedia teaching and collaborative spaces, UTS is also home to some of the latest technologies. Examples include the industry-standard Motion Capture Lab in Design, the Creativity and Cognition Studio that conducts research into new sensing technologies and generative media systems, the state-of-the-art sound facilities in Communication, and cutting-edge simulation technologies found in UTS Health labs.

PRACTICAL EXPERIENCE AND INDUSTRY EXPOSURE

www.undergraduate.uts.edu.au

Employers look for graduates with industry experience. With UTS's strong industry links and networks, we'll help you gain practical experience as part of your degree.

INDUSTRY ON CAMPUS

Each year all the big names descend on UTS for the UTS Careers Fair: Deloitte, PricewaterhouseCoopers, Ernst and Young, RailCorp, Optus, teach.nsw, St Vincent's Private Hospital to name a few. Network and discover how you can secure the graduate role of your dreams. Our Vacation, Internship and Volunteer Fair also gives students the chance to talk to organisations about work experience and volunteer opportunities in Australia and overseas.

www.ssu.uts.edu.au/careers

GET INVOLVED WITH LOCAL COMMUNITY

UTS is actively involved with many not-for-profit organisations, giving you the chance to develop valuable work skills while contributing to the local community. UTS Shopfront allows students to undertake community projects with real clients for course credit, while the UTS SOUL Award – Social Outcomes through University Leadership – builds social responsiveness and leadership skills by connecting students to the local community and encouraging volunteering and participation.

www.shopfront.uts.edu.au

www.soul.uts.edu.au

GET HANDS-ON IN THE CLASSROOM

We base assignments and coursework on real case studies affecting communities and industry rather than generic textbook examples. This allows you to develop your practical skills and engage with relevant material.

“For our Customer Behaviour subject, our task was to create a marketing campaign promoting a new Microsoft product. The experience taught me what firms are looking for in terms of marketing strategy, what they expect of their marketing team, and the best way to meet these expectations.”

Sarah Siv, Bachelor of Business

UTS Careers Fair

John Wu

Industry on campus

CAREERS SERVICE

Get your foot in the door, and learn what employers are looking for in a graduate. The UTS Careers Service offers employer-run workshops, seminars, info sessions, career days, forums and networking events each semester. Our faculties also organise industry visits to give you an insight into career paths and help you start building valuable networks for future employment.

www.ssu.uts.edu.au/careers

“I competed in the Senior Mooting and Negotiations Competitions that are run annually by the UTS Law Students’ Society. These competitions help Law students apply the legal knowledge and skills learnt in their degree to a more practical environment such as competition mock trials and negotiation simulations. The experience expanded my ability to convey issues in dispute with conviction and sincerity, and helped me gain a greater insight into the various relevant industries available to Law graduates.”

John Wu, Bachelor of Laws, Bachelor of Medical Science

Winner of Senior Mooting Grand Final 2012

Winner of Senior Negotiations Grand

Final 2012

INDUSTRY-RUN COMPETITIONS

How do you measure up against your peers? UTS students are given the chance to compete in industry-run competitions and develop solutions to real business problems. Participating in these competitions is also an opportunity to impress future employers.

INTERNATIONALISE YOUR DEGREE

www.undergraduate.uts.edu.au/studyoverseas

Join the hundreds of UTS students to open the door to adventure, better career opportunities and broaden your way of thinking.

Rowan Udell on In-Country Study year in Chile

INTERNATIONAL STUDIES

Each year over 250 UTS students spend a year overseas studying in another language at one of our UTS partner universities as part of UTS's unique International Studies degree. A Bachelor of Arts in International Studies degree can be combined with most other undergraduate degrees as part of a five or six year program. UTS also offers the Bachelor of Global Studies, a stand-alone degree that encourages you to develop different perspectives to engage with complex problem-solving around global issues.

For more information see page 44 or visit www.internationalstudies.uts.edu.au

LEARN A LANGUAGE

Enrol in one of UTS's six language and culture programs in Chinese, French, German, Italian, Japanese or Spanish and increase your international and intercultural skills.

www.internationalstudies.uts.edu.au/language

Danae Byrne with a class in Kunming, China as part of her Primary Education practical experience.

OVERSEAS WORK PLACEMENTS

Some UTS courses and subjects allow you to take part in an overseas practicum as part of a particular study program. Overseas pracs allow you to earn course credit while you apply the skills you've learnt at UTS and gain practical experience in a global setting.

Evelyn Wong while on Exchange at San Francisco State University

GLOBAL EXCHANGE

For most degrees, UTS offers students the chance to study up to two semesters overseas at one of more than 150 partner institutions across 34 countries. The subjects you take on global exchange count towards your UTS degree, so it won't take any extra time to complete your studies.

www.ssu.uts.edu.au/globalexchange

Navin Ramrakha with local children in Ghana, teaching English as facilitated by BUiLD

EXPAND YOUR NETWORKS

Gain international leadership experience and strengthen your resume with the UTS BUiLD program. You can participate in short-term programs, internships, volunteering and community work abroad and locally, including Model United Nations conferences and leadership development programs.

www.ssu.uts.edu.au/beyonduts

Rashmi Chary with local children in Sarajevo, Bosnia as part of her AIESEC experience.

STUDENT CLUBS

Many of UTS's student clubs have an international flavour. For example, by joining the AIESEC club, you could be involved in international extracurricular opportunities ranging from six weeks to 18 months in over 110 countries. They also offer internships.

www.utsunion.uts.edu.au

FINANCING YOUR GLOBAL EXPERIENCE

UTS offers a range of scholarships and grants to help fund your global ambitions.

www.undergraduate.uts.edu.au/studyoverseas

UTS: SUPPORT SERVICES

www.ssu.uts.edu.au

UTS provides students with help on almost any aspect of their lives, from financial problem-solving to housing assistance and academic advice. We also offer tailored support for students with disabilities.

ACADEMIC HELP

LIBRARY

The UTS Library's services include assistance with researching and borrowing, copying and printing, course notes, and past exams. There are areas for group study or quiet reading, over 450 computers, and wireless and laptop facilities.

www.lib.uts.edu.au

ENGLISH LANGUAGE AND ACADEMIC SUPPORT

UTS: HELPS provides English language and academic support to all UTS students, regardless of your language background. Our free programs and services include daily workshops on academic skills, writing and presentation, individualised help for all written and oral assessments, and online resources.

www.helps.uts.edu.au

STUDENT ADMIN INFO AND ADVICE

UTS Student Centres are your main point of contact for anything to do with the administrative side of studying. This includes course advice, enrolment support, information on graduation eligibility, subject exemption (credit recognition) and much more. The student centres are located at both the City and Kuring-gai campuses.

www.uts.edu.au/students/centres

INFORMATION TECHNOLOGY

UTS offers 24 hour access to hundreds of computers across campus as well as, software, your own email account, access to wireless networks in student spaces, printing, scanning, and online and in-person IT help.

www.itd.uts.edu.au

INDIGENOUS STUDENT SUPPORT

Jumbunna Indigenous House of Learning is the student services centre for all Indigenous students and offers a sense of community and culture. It provides study assistance, scholarship advice, mentoring, tutoring, academic support, information on events, computing facilities and chill-out spaces.

www.jumbunna.uts.edu.au

STUDENTS' ASSOCIATION

Run by students for students, the Students' Association is an independent and democratic organisation whose members are voted in by UTS students. Services include free academic advice, peer tutoring, clubs, the student magazine *Vertigo*, and much more.

www.sa.uts.edu.au

U:PASS

U:PASS is a peer assisted study program run by senior students. Come along and study in a fun and supportive environment!

www.ssu.uts.edu.au/peerlearning

PERSONAL HELP

HAVE AN ONGOING CONDITION OR DISABILITY?

The UTS Special Needs Service will help with your smooth transition to university. You're welcome to contact the Special Needs service any time – there's no need to wait until you enrol.

www.ssu.uts.edu.au/sneeds

HEALTH AND COUNSELLING

The UTS Health Service provides confidential medical care. Counsellors are available to help with a wide range of personal, relationship, psychological, study and administrative difficulties.

www.ssu.uts.edu.au/health
www.ssu.uts.edu.au/counselling

JOBS AND CAREERS

Nominated by employers as one of the top university careers services in Australia for four consecutive years, the UTS Careers Service offers free careers advice to all UTS students and organises an annual careers fair and regular industry talks. The StudentJobs@UTS program helps students find jobs on campus.

www.careers.uts.edu.au

CONVERSATIONS@UTS

Conversations@UTS helps students build confidence with spoken English. Sessions are run by UTS staff and alumni volunteers.

www.ssu.uts.edu.au/helps/conversations

MULTI-FAITH CHAPLAINCY

Need some spiritual support or just some quiet time? Chaplains from many faith traditions are available to provide spiritual counselling, prayer, meditation groups, and workshops on a variety of topics.

There are multi-faith rooms for faith-based activities and a dedicated prayer room, so this is the place to find all the religious guidance you need.

www.ssu.uts.edu.au/chaplaincy

CHILDCARE

There are two childcare centres on the UTS campuses; places are limited and some waiting lists apply, so get your name down asap.

www.childcare.uts.edu.au

HOUSING

Need a roof over your head? See page 12 for more information on housing.

FINANCIAL ASSISTANCE

The move to university can be financially challenging. For more information about financial help see page 65.

THE UTS UNION

The UTS Union is responsible for all things social on campus. This includes clubs and societies, student events, volunteer programs, the UTS bars, food and retail outlets, as well as the gym, sports hall and sports clubs. The student publication *Playground* lets you know what's happening around your campus.

www.utsunion.uts.edu.au

ORIENTATION

UTS Peer Networkers during O'Week

The UTS Orientation Program is designed to help new students with all they need to know about starting at UTS. Before the first week of semester, new students are invited to take part in O' Week.

O' WEEK IS YOUR CHANCE TO:

- > get to know the campus,
- > find out course details,
- > take some workshops to brush up on basic computer or English skills, and
- > meet some people before your classes start.

Peer Networkers are UTS students who help new students to adjust to uni and student life. During O' Week Peer Networkers can answer your questions and help you find your classrooms around campus. They can also facilitate group sessions, connect you with other students from your faculty and generally provide a warm welcome to UTS.

www.orientation.uts.edu.au

UTS: HOUSING

www.housing.uts.edu.au

When it comes to accommodation, the UTS Housing Service is here to help, providing information and advice to UTS students on housing options both on and off campus.

UTS ACCOMMODATION

UTS offers comfortable and affordable student housing at four main buildings all within a 10 minute walk from the UTS City campus. You can opt for a private studio apartment or shared apartment with your own bedroom, shared living room, kitchen and bathroom facilities.

Managed by the UTS Housing Service, the UTS residences provide an environment that is conducive to academic, social and personal growth.

The UTS residences are close to public transport, inner city shopping, dining and entertainment precincts.

RESIDENTIAL SOCIAL LIFE

Living in student housing is a great way to meet new people and take full advantage of the university's social scene. The UTS Residential Life Team plans daily activities and events for students to encourage social interaction and assist with the transition to living away from home. Regular weekly events can include cooking, fitness and dance classes, language lessons, movie nights and much more.

Student housing has a diverse and thriving community, with students from across Australia and the world.

COSTS

Weekly housing costs vary depending on room type and residence building. Prices cover gas, electricity, water, limited free internet access and basic furniture in the apartments. Limited car parking spaces are also available at some of the residences for an additional cost.

Studio apartments start at \$280 per week and share apartment costs range from \$206 to \$298 depending on apartment size and location.

HOW TO APPLY

You must be enrolled in a UTS course to apply for housing. A small proportion of offers are made before each semester begins based on the condition that the applicant is accepted into a UTS course.

As places are limited, if you're interested in UTS accommodation make sure you apply early to avoid missing out.

OFF-CAMPUS ACCOMMODATION

If you're interested in finding non-UTS housing close to uni, the City campus is surrounded by lively inner city suburbs including Surry Hills, Glebe, Chippendale, Newtown and Erskineville.

The UTS Housing Service can help you in your search for accommodation both on and off campus, as well as offering advice on tenancy matters.

LIFE AT UTS

WELCOME :)

UTS Union is here to help you have fun at uni. The best way to make the most of your university experience is to get involved in as many things as possible. Whether you join a sports team, a social club, or go on a recreational trip with a group of UTS students, there is always plenty to do and plenty of ways to meet new people.

SOCIAL

UTS Union's Clubs and Societies have something for everyone. The clubs cater to a wide range of interests and cultures, allowing you to make new friends and experience new things while on campus. At UTS Clubs and Activities Day all the clubs and societies go on display to showcase what they're all about and to entice you to join them! You'll have the opportunity to join as many clubs as you like, such as the Ski Club and the UTS Chocolate Society, which will provide you with access to the club events, parties and social outings.

CONNECT

Gain hands-on experience – the Union is always looking for volunteers and interns to get involved in events, activities, design, video, photography and journalism. We want you to join us and help make the UTS campus the most exciting and interactive campus in Australia for students.

FOOD

Located in the heart of the city, the UTS campus is a great place to access great food for discounted student prices. If you don't feel like leaving the campus head to one of the UTS Union outlets.

Concourse Café (Building 1 L3), Harris St Café (Building 4) or the Broadway (Building 1 L3) and Kuring-gai Eateries.

ABOUT UTS

LIFE AT UTS

ENTER-TAINMENT

Each semester the Union Bars, Glasshouse and Loft play host to major campus events; UTS O'Fest, Halloween and Oktoberfest! Tickets can be purchased online from the Union website or at the Union Info Desk. If a chilled out, post-class drink is more your thing, then make your way to The Loft @ UTS where you can find cocktails, pizzas and acoustic entertainment.

SHOP

As time between classes can be limited, the UTS Union Retail outlets stock a range of items from stationary and art supplies (DAB Art Shop) to transport tickets to help get you around Sydney! The retail stores also offer a great range of UTS apparel that is available from the Union retail shops in Broadway, Haymarket and Kuring-gai campuses and the UTS Fitness centre.

SPORT

UTS Sport caters for athletes of all levels from beginner to elite. The Elite Athlete Program provides support and services for elite athletes including study assistance and student accommodation options. Ranked in the Top 5 in Australian University Sport, Team UTS is a consistently strong performer at Eastern University and Australian University Games. Mixing sport with parties, it's a team you will want to be a part of! For the less serious athletes there are social sporting competitions held during lunchtimes in the Multi-Purpose Sports Hall or the courts can be booked for leisure time.

UTS: BUSINESS

www.business.uts.edu.au

WE OFFER:

- > Accreditation by the Association to Advance Collegiate Schools of Business (AACSB International), a mark of quality earned by a select few business schools worldwide.
- > The flexibility of 13 majors and over 30 sub-majors as well as four extended majors for highly specialised study within the Bachelor of Business.
- > Industry placement opportunities and practice-oriented assignments that give our graduates a head start when entering the workforce.
- > An innovative first year Bachelor of Business subject, Integrating Business Perspectives (IBP), which leads students through the early concept stage of designing a new business. IBP provides a space for you to develop your creativity and foster confidence in your ideas around sustainable business practices.
- > Bachelor of Accounting Scholarship program – a fast-track, full scholarship (valued up to \$46,500) co-operative degree, partnered by leading Australian and multinational companies.
- > The chance to broaden or specialise your degree by combining it with Biotechnology, Engineering, Medical Science, IT, Law, Science or International Studies.
- > 24 hour access to leading-edge facilities and resources.

COURSES IN BUSINESS

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF ACCOUNTING Duration: 3 yrs FT 2013 ATAR: N/A* *The Bachelor of Accounting is a co-operative scholarship course. Selection is based on a combination of ATAR and interview.	This course is a co-operative education program in accounting. An intensive degree offered in conjunction with major employers, it allows students to complete a compulsory major in accounting and receive a scholarship as well as full time industry experience. This is a scholarship degree for current school leavers. Special application and selection procedures apply.	Career options include accountant, accountants officer, business analyst, business manager, financial controller, tax specialist, taxation manager/advisor.
BACHELOR OF BUSINESS (CITY) Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 91.00 (FT) / 90.00 (PT)	This course provides students with a sound background in all areas of business through a common set of core subjects, in addition to in-depth knowledge in one or more chosen majors. The degree equips students with the knowledge, competencies and values necessary to develop creative, critical, analytical and evaluative skills essential for a successful and rewarding career in business.	Career options include account manager, accountant, advertising officer, commercial analyst, employee relations coordinator, events coordinator/manager, financial controller, market analyst, marketing coordinator/manager, payroll officer, policymaker, product manager, public relations coordinator/manager, recruitment officer/manager, social media advisor, sports administrator, stockbroker.
BACHELOR OF BUSINESS (KG)* Duration: 3 yrs FT 2013 ATAR: 80.00		
BACHELOR OF MANAGEMENT IN EVENTS AND LEISURE* Duration: 3 yrs FT 2013 ATAR: 77.00	This industry-focused degree develops graduates who exhibit the theoretical knowledge and professional skills relevant to the organisation, research, planning, administration, marketing and equitable distribution of events and leisure services. The Bachelor of Management in Events and Leisure includes compulsory industry work placements, with subjects directly linked to a variety of industry and occupational settings to ensure students gain hands-on experience.	Career options include corporate meeting planner, entertainment venue manager, events coordinator/manager, festival organiser, leisure and recreation planner, marketing coordinator, leisure and events organisations, media relations coordinator/manager, policy analyst, sponsorship manager.
BACHELOR OF MANAGEMENT IN TOURISM* Duration: 3 yrs FT 2013 ATAR: 70.25	This course provides students with a strong understanding of the distinctive features of tourism and the tourism industry. Students acquire knowledge and a range of skills that allow them to effectively manage in an environment of significant growth and change. The degree also develops students' understanding of tourism as an increasingly important social phenomenon, fostering a critical approach to this field of study. The Bachelor of Management in Tourism includes compulsory industry work placements, with subjects directly linked to a variety of industry and occupational settings to ensure students gain hands-on experience.	Career options include destination manager, entertainment venue manager, festival organiser, marketing coordinator/manager, policy analyst, tour operator, travel consultant, travel journalist, travel sales executive.
BACHELOR OF MANAGEMENT IN TOURISM AND HOSPITALITY* Duration: 1.5 yrs FT 2013 ATAR: N/A^ ^This course is not offered to current Year 12 applicants. Entry to this degree requires the completion of the Advanced Diploma in Hospitality (Management) from TAFE NSW, or an approved private provider at credit level or higher.	This course provides a broad understanding of tourism and its associated industries. You will develop an understanding of tourist behaviour and the impacts that tourism has on the environment, economy and society. You will acquire professional skills in the strategic planning, management and marketing of tourism firms, destination and events. You will also have the opportunity to pursue your specific interests in hospitality and tourism through a choice of assignments and the completion of two elective subjects.	Career options include destination manager, entertainment venue manager, festival organiser, guest services manager, marketing coordinator/manager, policy analyst, tour operator, travel consultant, travel sales executive, hotel/resort manager, guest services manager, reservation manager.

FT = Full time / PT = Part time

City = City campus / KG = Kuring-gai campus

This course is currently taught at the UTS Kuring-gai campus in Lindfield. From 2016, classes in Lindfield will be transferred to the UTS City campus.

COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with Business.

A PRACTICAL UNI EXPERIENCE

Want your degree to be practice-oriented? Here are just some of the options available to you when you study with UTS Business School.

- > Complete a compulsory capstone subject for each major during your final year in the Bachelor of Business. This allows you to add to your theoretical understanding via industry-based case scenarios.
- > The internship subject within the Bachelor of Business degree enables you to gain relevant work experience while completing your degree. This gives you invaluable insight into industry, and also provides employers with an opportunity to recruit and trial prospective graduate employees.
- > Gain 240 hours of professional practice in the Bachelor of Management in Tourism and the Bachelor of Management in Events and Leisure degree with a professional internship in your final year.
- > Complete two compulsory 6-month industry placements with leading companies as part of your Bachelor of Accounting degree.
- > UTS Business School hosts a number of guest industry lecturers each year, giving you the chance to gain industry insight and networking opportunities.

Rachel Micallef

MAKING A JOB OF MARKETING

UTS Business students complete a Capstone project as part of their degree. The project allows students to apply the knowledge and skills they've developed throughout the course by working in groups to develop solutions to real problems faced by an organisation or charity.

"My project was for the Royal Institute for Deaf and Blind Children (RIDBC) as part of my Marketing Communications major. The RIDBC briefed us on some challenges they were facing, such as how to best leverage their call centre to acquire new donors. After conducting our own research, we developed and submitted a report to our tutors outlining our interpretations and recommendations for how the RIDBC could resolve their issues. The best group reports were then chosen to present their marketing strategies to the RIDBC marketing team.

"I used everything I learnt from my previous business subjects to complete the Capstone project, which shows how practical the UTS degree is. The experience, combined with an internship I completed at News Ltd, gave me the confidence to know I'd be a work-ready graduate with the marketing and time-management skills needed for industry."

Rachel Micallef, Bachelor of Business

CAREERS IN BUSINESS

Luke Hartin

CAREER OPTIONS INCLUDE:

- > Account manager
- > Accountant
- > Business analyst
- > Commercial analyst
- > Economist
- > Employee relations coordinator/manager
- > Events coordinator/manager
- > Festival organiser
- > Financial controller
- > International trader
- > Marketing coordinator/manager
- > Policy advisor/maker
- > Product manager
- > Tax specialist

CAREER SNAPSHOT

RETAIL MARKETING COORDINATOR

I completed the Bachelor of Business degree, majoring in marketing and management.

A typical career path for someone with a Business degree would be to work in finance, banking, management, human resources or marketing. Those interested in marketing could also work in research, digital or brand marketing.

In my role I organise and manage retail communications across a number of different channels. I coordinate TV, radio and print advertising and organise marketing material for different regions. I love the variety of challenges my job provides; I can leave the office in order to supervise a radio recording or be on set for a TV shoot.

My advice to students thinking of choosing this career path would be to seek as much information from different sources as possible. Investigate the industry and look for trends in the areas you might like to be involved in.

Luke Hartin, Retail Marketing Coordinator, Hyundai Motor Company Australia
Bachelor of Business

Sound Studio

Bon Marche Studio Green Room

WE OFFER:

- > A range of majors to choose from including Journalism, Media Arts and Production, Public Communication, Writing and Cultural Studies*, Information and Media, Social Inquiry, and a degree in Sound and Music Design.
- > Over 30 years of experience in teaching one of the most in-demand programs in the country.
- > Superior production facilities including media production labs, video editing suites, sound and performance studios, and research labs.
- > Academic staff with current industry experience, knowledge and networking abilities.
- > A dynamic centre of creativity, innovation and knowledge offering the best of both traditional and contemporary research.
- > The option to take an industry work placement or project, providing you with practical experience in media, production, publishing, advertising or any other relevant area.

“We value teamwork, creativity and professionalism in our organisation. Our experiences of students of the Communication degree demonstrate all three.”

Rhys Kelly, Head of Communications, The Smith Family

NEW COURSES

UTS aims to stay ahead of the curve, providing new and exciting courses every year. Right now, we're developing a suite of new courses exploring creative approaches to analysing contemporary culture, how creative thinking can revolutionise the business world of the future, frontier technologies such as digital and social media, and practical and theoretical engagement in contemporary creative writing.

If you would like to be among the first to know about these courses when we're ready to roll them out, register your details at www.undergraduate.uts.edu.au/newcourses

COURSES IN COMMUNICATION

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF ARTS IN COMMUNICATION (INFORMATION AND MEDIA) Duration: 3 yrs FT 2013 ATAR: 78.00	In this course, students build a portfolio including blogs, podcasts, websites, databases, and audience and user analyses. Students also have the opportunity to develop a secondary specialisation and undertake a professional placement.	Career options include information architect, media researcher, information manager, web content developer or content manager, new media producer, librarian, database designer, collection developer and project manager.
BACHELOR OF ARTS IN COMMUNICATION (JOURNALISM) Duration: 3 yrs FT 2013 ATAR: 89.00	One of the most respected journalism degrees in the country, this course equips students with advanced research, writing, reporting and analytical skills for print, television, video, radio, audio and online media; and knowledge of the intellectual, ethical and political foundations of journalism.	Career options include reporter, producer, publisher, editor and sub-editor, feature and freelance writer, investigative journalist, media researcher, and strategist in print, broadcast and online media.
BACHELOR OF ARTS IN COMMUNICATION (MEDIA ARTS AND PRODUCTION) Duration: 3 yrs FT 2013 ATAR: 90.85	This course explores the history, contemporary issues, theories and challenges of media and culture in society. Students develop sophisticated production skills in video, sound and new media, and enhance their creative innovation in these areas.	Career options include director, editor, film producer, cinematographer, sound designer, new media producer, production manager, scriptwriter, multimedia designer, radio producer, documentary maker, arts and cultural administrator, freelance media artist and producer.
BACHELOR OF ARTS IN COMMUNICATION (PUBLIC COMMUNICATION) Duration: 3 yrs FT 2013 ATAR: 89.00	This course focuses on professional communication careers including public relations and advertising. Students develop professional skills in campaign design and production, copywriting, media liaison and writing, research and evaluation, sponsorship and event management.	Career options include communication strategist, public relations consultant, advertising account executive, media liaison officer, events coordinator, publicity officer, political media adviser, advertising copywriter, community relations manager and marketing communication specialist.
BACHELOR OF ARTS IN COMMUNICATION (SOCIAL INQUIRY) Duration: 3 yrs FT 2013 ATAR: 80.30	This course brings together perspectives from history, politics, sociology, philosophy, cultural studies, political economy and anthropology, applying them to problems of social change. It equips students with the knowledge and skills to be involved in diverse organisations geared towards social justice.	Career options include political adviser, community historian, social researcher, community development worker, policy analyst, trade union official, media researcher, international aid worker, social welfare officer, community project manager and change agent in a range of social, cultural, historical and political arenas.
BACHELOR OF ARTS IN COMMUNICATION (WRITING AND CULTURAL STUDIES)* Duration: 3 yrs FT 2013 ATAR: 85.00	This course combines the study of writing and cultural studies as critical, creative and professional practice. Students explore theories of culture and writing, engaging with alternative and innovative ways of thinking and writing.	Career options include editor, publisher, scriptwriter, cultural researcher, literary agent, dramatist, communication coordinator, arts and cultural administrator, copywriter, novelist, feature writer, publications officer, media researcher and freelance writer.
BACHELOR OF SOUND AND MUSIC DESIGN Duration: 3 yrs FT 2013 ATAR: 76.00	This course offers a unique, contemporary sound and music degree experience by merging art and technology across domains of composition, entertainment and audio technology, as well as combining features of music and audio engineering with interaction design.	Career options include interactive media artist, installation artist, electronic music composer, product audio designer, software interface designer, e-fashion designer, new sonic interface designer, information system (sonification) designer and mobile/smart-phone and device audio interface designer.

FT = Full time

 * This course is being reviewed to ensure we're providing students with the most current and career-focused content. If you would like to be among the first to know about these courses when we're ready to roll them out, register your details at www.undergraduate.uts.edu.au/newcourses
COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with Communication.

A PRACTICAL UNI EXPERIENCE

Want a degree that's practice-oriented? Here are just some of the options available to you with UTS: Communication.

- > Research, produce and report stories for TV, radio, online and press as a UTS Journalism student, through UTS News Day.
- > Complete a professional internship in your final year, gaining 80-100 hours of experience in your field of interest as a Public Communication student.
- > Plan, carry out and evaluate a major professional information activity for a client as an Information and Media student in the elective subject Professional Information Project.
- > Experience site visits, guest lectures, workshops and possible short-term work experience placements in your Professional Practice subject as a Sound and Music Design student.
- > Choose the Professional Internship elective to experience the communication industry, blending theory and practice to develop your professional skills as a Writing and Cultural Studies student.
- > Complete a media arts project to showcase your skills, adding to your professional portfolio of creative work you can show employers and clients when you graduate from Media Arts and Production.
- > Undertake a workplace or community-based placement in your final year of Social Inquiry to put the thematic insights, research capabilities and communicative skills you've developed into practice.

Vivienne Rontziokos

COMMUNICATION IN PRACTICE

UTS: Communication degrees are renowned for their focus on the practical skills needed to produce work-ready graduates. Students are required to complete a number of compulsory core subjects that give them constructive experience across a broad range of communication skills, such as interviewing, production and multimedia.

"I've just completed the first year of my communication degree, majoring in Public Communication. I love how the degree allows me to gain experience in so many different areas that make up communication. I've already made a short documentary as part of my Understanding Communication subject, as well as a radio recording for Language and Discourse. I really enjoyed recording the different voices and editing the clips! The best part of completing these core subjects is being able to work with people in other communication majors and learning from each other; it's a really fun-filled process with so much creative freedom allowed.

"Most communication skills can't be taught, they have to be experienced and practised. The subjects are structured to link theory with practice – not only in terms of the hands-on activities, but also in the case studies used and our application of theories to the real world. The UTS communication degree is giving me the knowledge and experience needed for such a competitive and dynamic industry."

Vivienne Rontziokos, Bachelor of Arts in Communication (Public Communication), Bachelor of Arts in International Studies

CAREERS IN COMMUNICATION

Julia Holman

CAREER OPTIONS INCLUDE:

- > Editor
- > Publisher
- > Copywriter
- > Journalist
- > Director

- > Political adviser
- > International aid worker
- > Information architect
- > Librarian
- > Electronic music composer
- > Radio producer

CAREER SNAPSHOT

PARLIAMENT HOUSE REPORTER

I graduated with a Bachelor of Arts in Communication (Journalism) combined with Bachelor of Arts in International Studies in 2008.

A typical career for someone with my qualifications would be to work as a journalist for newspapers, television, radio or online media. There are also opportunities in marketing, advertising and PR. A family friend once told me that for every word you read, someone's been paid to write it.

In my role as the Australian Parliament House reporter for the Triple J *Hack* program, I file national daily current affairs radio stories and do live crosses with Triple J and ABC broadcasts. I also write for the Triple J website and provide content for other ABC programs.

One of the best things about my job is that I never know what I'll be doing from day to day. Each morning we have our editorial meeting, where I receive my brief. My day is spent speaking with politicians, attending press conferences and conducting interviews. Working in journalism is such a privilege. You have the right to phone up and ask to speak to anyone – such as Obama's right hand man or even the Prime Minister.

My advice for students is to do as many internships as you can. Give everything a go. It doesn't matter how boring a topic appears: there's always a story.

Julia Holman, Parliament House Reporter for Triple J program *Hack*
Bachelor of Arts in Communication (Journalism), Bachelor of Arts in International Studies

DID YOU KNOW?

- > Over the past four years, seven UTS students have been finalists in the Tropfest Festival – Australia's most competitive short film festival.
- > Each year for the past five years, UTS students have won the Walkley Media Super Student Journalist of the Year. In 2012, a team of six UTS students shared in the Best Digital Journalism Award at the 57th Walkley Awards. Administered by the Walkley Foundation for Journalism, these awards recognise and reward excellence in journalism.

UTS: DESIGN, ARCHITECTURE & BUILDING

www.dab.uts.edu.au

UTS Fashion Design Show (Fiona Hyo Jim Kim)

WE OFFER:

- > Progressive lecturers at the forefront of their industries, many with international recognition for their work.
- > Courses regularly reviewed by industry advisory committees to ensure students are up-to-date with industry practice. Opportunities to gain industry experience while you study through internships, collaborations and global field trips.
- > State-of-the-art facilities including upgraded, expanded teaching and learning spaces.
- > Accreditation with industry bodies such as the Royal Institution of Chartered Surveyors (RICS) for the Bachelor of Property Economics and the Bachelor of Construction Project Management and the Australian Institute of Architects for the Bachelor of Design in Architecture.
- > The chance to win national and international awards for your project work.

COURSES IN DESIGN, ARCHITECTURE & BUILDING

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF DESIGN IN ANIMATION Duration: 3 yrs FT 2013 ATAR: 87.90	In this course, students learn the fundamentals of animation-performance, narrative, characterisation, form, motion, time, space and aesthetics, and explore and create new approaches to 2D and 3D Animation and VFX (visual effects) design.	Career options include director, producer, concept artist, production designer, art director, character designer, animator, motion capture designer, lighting designer, matchmover/3D tracker, effects [FX] animator, roto designer, compositor, stop frame model animator (claymation) and animation script writer.
BACHELOR OF DESIGN IN ARCHITECTURE Duration: 3 yrs FT 2013 ATAR: 94.20	This course is oriented towards international practice and design experimentation. Teaching is hands-on, using the most innovative digital design and fabrication technologies available to the architectural profession in dedicated studios and workshops.	Career options include architect, urban designer, educator, journalist, landscape architect, researcher and policy maker.
BACHELOR OF DESIGN IN FASHION AND TEXTILES Duration: 3 yrs FT 2013 ATAR: 95.15	This course provides students with the knowledge and skills in creative design, technical applications and critical theory to enter fashion and textile design and its related industries. The course provides a strong theoretical basis for the production of original, challenging designs in studio-based practical subjects.	Career options include fashion or textile designer, buyer, fashion editor, illustrator or stylist. Some students start their own business, while others work within an established company.
BACHELOR OF DESIGN IN INTEGRATED PRODUCT DESIGN Duration: 3 yrs FT 2013 ATAR: 80.05	This course provides students with the foundation to design products that are functional, manufacturable and sustainable. It covers the visual and tactile qualities of products, as well as their function, ergonomics and manufacture, and their effect on the environment and society.	Career options include design consultant, corporate or in-house designer, production designer or manager across industries including automobile, electrical goods, furniture, packaging, storage systems, household products, lighting fixtures, industrial materials, and medical and scientific equipment.
BACHELOR OF DESIGN IN INTERIOR AND SPATIAL DESIGN Duration: 3 yrs FT 2013 ATAR: 87.05	With a strong emphasis on creativity and technology, this course is the first university program of its kind in Australia. Students develop spatial intelligence and excellence in design practice. The program fosters a creative and explorative attitude toward the design process, underpinned by a reflective and critical engagement.	Career options include commercial/residential interior designer, event designer, exhibition, museum and interaction designer, researcher, theatre set designer, designer in film and television production, virtual world designer.
BACHELOR OF DESIGN IN PHOTOGRAPHY AND SITUATED MEDIA Duration: 3 yrs FT 2013 ATAR: 76.40	Combining contemporary photography practice with emerging digital technologies, this course equips graduates with the visual literacy and technical skills to hold leading positions in image-based design professions.	Career options include commercial photographer, photojournalist, exhibition media, photographic lighting, installation and interactive media and advertising professional.
BACHELOR OF DESIGN IN VISUAL COMMUNICATION Duration: 3 yrs FT 2013 ATAR: 95.45	This course emphasises creativity, innovation and communication in the analysis and visualisation of ideas and information through print, screen and interactive multimedia technologies. The course goes beyond technical skills to teach conceptual skills and design processing in the context of communication.	Career options include designer in graphics, illustration, advertising, animation, branding/identity design, information design, broadcasting, exhibition, new media, photography or publications.
BACHELOR OF CONSTRUCTION PROJECT MANAGEMENT Duration: 4 yrs FT / 6 yrs PT 2013 ATAR: 92.40	Highly regarded within the industry, this course provides a comprehensive construction education. This unique degree provides graduates with the broader skills and knowledge base required to meet the changing demands of the construction, infrastructure and related industries.	Career options include construction manager, contract manager, cost engineer, estimator, facility manager, project manager, property developer, quantity surveyor, scheduler or site manager.
BACHELOR OF PROPERTY ECONOMICS Duration: 3.5 yrs FT 2013 ATAR: 81.00	This is a functional and practical degree that prepares you for a career in real estate, valuation, funds and asset management and property development. It produces highly sought-after property professionals ready to enter the workforce with qualifications fully recognised by professional and industry bodies.	Career options include positions in corporate real estate, property analysis, property and asset management, property development, property finance, real estate agency (sales/leasing), tenant advisory services and valuation.

FT = Full time / PT = Part time

COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with Design, Architecture & Building.

A PRACTICAL UNI EXPERIENCE

Want a degree that's practice-oriented? Here are just some of the options available to you when you study Design, Architecture or Building at UTS.

- > Students are invited and encouraged to enter their work in a wide range of external competitions and prizes in Australia and internationally.
- > Volunteer to work on building projects in disadvantaged communities through the elective Construction for Developing Communities in Australia and overseas.
- > Design and Architecture students have the opportunity to showcase their work at various UTS faculty exhibitions and shows. Industry professionals are invited to engage and interact with students, and scout for bright new talent.
- > UTS Architecture students have the opportunity to complete the Global Field Studios elective. This subject allows you to take part in design projects overseas. In previous years students have travelled to Beirut, to study post war architecture, and to Paris to study extreme urban densification.
- > Built Environment students are required to complete a professional practice subject, meaning students gain 200 days of industry experience before they graduate.
- > Gain insight into industry practice from local and international guest lecturers and industry speakers on campus.

Alex Rizzo

UTS students and staff attending the overseas study tour in LA.

OVERSEAS STUDY TOURS

UTS Architecture students have the opportunity to take part in an overseas study tour. Funded in part by the School of Architecture, the tour takes students to the US for two weeks to experience a number of historic and iconic buildings in both Los Angeles and Chicago. Students also participate in studio sessions at California Polytechnic with local architecture students, as well as spending a day visiting the office of Gehry Partners.

"The study tour was a great opportunity to expand my experience and understanding of architecture whilst gaining credit towards my degree. The tour helped me to identify architectural ideas and principles in a retrospective way. The opportunities I was given on the study tour also consolidated my understanding of the concepts and influences of architecture.

"The highlight of the tour was spending an hour involved in a group discussion with Frank Gehry at his studio. Frank Gehry is one of the most celebrated living architects in the world today, whose works are cited as being among the most important works of contemporary architecture – so it was certainly interesting to talk to one of the greats."

Alex Rizzo, Bachelor of Design in Architecture

CAREERS IN DESIGN, ARCHITECTURE & BUILDING

Tom Fethers

Golnar Roshan

Work produced by Golnar for Marcel Wanders, Amsterdam

CAREER OPTIONS INCLUDE:

- > Construction manager
- > Property developer
- > Architect
- > Urban designer
- > Fashion editor
- > Textile designer
- > Production manager
- > Commercial photographer
- > Animator

DID YOU KNOW?

- > Construction is the third largest employing industry in Australia, with more than one million workers. (Australian Jobs, 2012)
- > High achieving Architecture students have the opportunity to go on a field trip with renowned architect Frank Gehry and his team in the USA.
- > Jets, Bec & Bridge, Sass & Bide, Alexander McQueen, Victoria's Secret, Abercrombie & Fitch, Sony, Electrolux, Audi, Animal Logic, Digital Eskimo, Channel 10 are just some of the companies where UTS design graduates are currently working.

CAREER SNAPSHOT

2D DESIGNER

I graduated from a Bachelor of Design in Visual Communication combined with Bachelor of Arts in International Studies in 2010.

A typical career path for someone with my qualification involves a wide range of possibilities. The Visual Communication degree teaches you to think conceptually and to effectively communicate design ideas to clients. If you have an open mind, you can create whatever you want. Combining design with international studies gives you the potential to work all around the world.

In my role as 2D Designer for the Studio Tord Boontje, London, I work on a number of design projects. One day I may be conceptualising a physical experience for an art installation, designing an event or hand drawing illustrations. The best part of my job is the versatility, I am able to work on design concepts, prints, branding, textiles, events and illustrations. No two days are ever the same.

My advice to students considering a career in design would be to respond to your intuition and follow your passion. My prior experience in design has been of great benefit to the work I do in my current position. After I graduated from uni I began working on a number of freelance jobs and last year I worked as a graphic designer for Marcel Wanders, a renowned product and interior designer based in Amsterdam. These experiences have given me the drive to bring my own personality and imagination into the world.

**Golnar Roshan, Bachelor of Design in Visual Communication
2D Designer, Studio Tord Boontje, London**

UTS: EDUCATION

www.education.uts.edu.au

WE OFFER:

- > Professional work experience for primary education students during every semester of their degree, commencing in week three of their first semester.
 - > Some of the highest-quality teaching and learning practices in the country.
 - > The opportunity to travel overseas and gain practical teaching experience in China, Thailand or Samoa.
 - > The opportunity to continue to a graduate degree in Secondary Teaching.
- For full course details see www.handbook.uts.edu.au

“At Denistone East Primary School we value the close relationship with UTS. The quality of practicum students from UTS is top shelf. Their knowledge of curriculum and classroom delivery is excellent. Several UTS graduates have been invited to join the school’s intern program. This invitation was made with confidence given the calibre of candidates.”

Rob McLaren, Professional Education
Learning Partner, Denistone East
Primary School

COURSES IN EDUCATION

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF EDUCATION IN PRIMARY EDUCATION[#] Duration: 4 yrs FT / 6 yrs PT 2013 ATAR: 75.55	This course prepares students to teach in schools from kindergarten to Year 6. It is a practice-oriented course that produces high quality, work-ready graduates. The program integrates the latest educational theory with professional experience in every semester throughout the course.	Career options include primary school teacher (kindergarten to Year 6) in a public or private school – locally or internationally, curriculum consultant, educational researcher or educator in a community setting such as a hospital, community or migrant education centre.

FT = Full time / PT = Part time

[#] This course is currently taught at the UTS Kuring-gai campus in Lindfield. From 2016, classes in Lindfield will be transferred to the UTS City campus.

COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with Education.

Frances Lee

PRIMARY EDUCATION PROFESSIONAL EXPERIENCE

As part of the Bachelor of Education in Primary Education, UTS students complete 97 days of professional experience in a variety of schools during their studies. This means UTS students gain first-hand practical experience through classroom observation, preparing lessons and teaching classes.

"I've completed eight placements at six different primary schools during my degree and have found that with each new practicum, you gain new industry networks.

"My final year internship was my favourite because I was no longer known as the student teacher but as the associate teacher. You have the entire class to yourself for four weeks, without a supervising teacher, and get to explore classroom management, programming and liaison with staff and parents.

"The school environment enabled me to collaborate with a professional team and interact with the local community. It taught me to be flexible and how to adapt to the learning and teaching situations across different classrooms and schools.

"The Primary Education degree at UTS is internationally recognised; a passport to most countries for work. I was lucky enough to do some teaching in Japan during my year abroad for my Bachelor of Arts in International Studies. The experience showed me that teaching is indeed a gift. It allows you to interact globally, where your words and actions can influence the future generation."

Frances Lee,
Bachelor of Education, Bachelor of Arts in International Studies

A PRACTICAL UNI EXPERIENCE

Madison Walker

Madison teaching in Samoa

Want a degree that's practice-oriented? Here are just some of the options available to you when you study with UTS:Education.

- > Complete a practical placement every semester, of every year of your bachelor's degree at UTS. This means you gain 97 days of professional experience before you graduate.
- > Have the opportunity to go overseas in your second year on an international practicum, gaining two weeks of teaching experience.

TEACH OVERSEAS AS PART OF YOUR DEGREE

UTS provides Primary Education students with a unique opportunity to travel overseas and gain practical experience teaching in different cultures. This two-week practicum allows students to engage with a different curriculum, often teaching students who may not speak fluent English. To date, trips have been organised to Thailand, Samoa and China.

"I've always wanted to travel the Pacific Islands, so the Samoa practicum was one of the main reasons I applied to UTS. I also wanted to go because the school placement would be organised for me. I find it hard to go out of my comfort zone, so I knew it would be the perfect opportunity to have an exciting and rewarding experience.

"Teaching in Samoa was harder than I thought and I had to adapt my teaching techniques because of the language barriers. The experience also taught me that every teacher, no matter how old, has to continually assess their lessons and find areas where they can improve their skills. There is no shame in failing or in a bad lesson – it's how you learn from these mistakes that define you.

"My experiences in Samoa have changed many elements of my life, not just my teaching skills. I will treasure the experience for the rest of my life and am so glad I got the chance to participate."

Madison Walker, Bachelor of Education in Primary Education

CAREERS IN EDUCATION

Jessica Heath

CAREER OPTIONS INCLUDE:

- > Primary school teacher
- > Curriculum developer
- > Education consultant
- > Researcher
- > Leadership positions in education

DID YOU KNOW?

- > Students with Education degrees not only become teachers – they can also work in other educational fields as educational advisers to government or other agencies, educational researchers, curriculum consultants, or educators in community settings such as a hospital, community or migrant education centre.
- > Education and training is the sixth largest employing industry in Australia with approximately 859,200 workers. (*Australian Jobs*, 2012)
- > Over the next five years, employment in the Education and training industry is expected to increase by 7.1 per cent (61,300 jobs) with almost half the new jobs expected to be generated by the preschool and school education sector. (*Australian Jobs*, 2012)

CAREER SNAPSHOT

PRIMARY SCHOOL TEACHER

I completed a Bachelor of Education in Primary Education (Honours) in 2010.

A typical career path for someone with my qualifications would be to work as a teacher; however there are a number of options in education. You could lecture, work for an education body or an excursion organisation. After further study or experience, you could work in senior executive positions such as Head of Department, Deputy Principal or Principal.

In my role as a Year One classroom teacher; I'm always very busy, but the experience of being involved in the education of young people is extremely rewarding. I am constantly making sure the learning activities are suitable for the vast range of students in the classroom by preparing differentiated learning experiences. Aside from teaching in the classroom, I work with specialist staff and speech and occupational therapists. I'm also regularly collaborating and sharing ideas with colleagues and having discussions with parents.

My advice to anyone thinking of studying education is to follow your passion. If you're passionate about teaching, go for it. It's such an inspiring and rewarding career. You gain experience in the industry by tutoring, working as a teacher's aid or by working in before and after school care.

**Jessica Heath, Primary School Teacher,
Highfields Preparatory and Kindergarten School
Bachelor of Education in Primary Education (Honours)**

UTS: ENGINEERING

Mechatronics lab

Mechanical Lab

Electrical engineering lab

WE OFFER:

- > International recognition through accreditation by Engineers Australia.
- > The opportunity to gain extensive industry experience as part of the Diploma in Engineering Practice.
- > Flexible timetabling including day, evening and some weekend classes; full time, part time and some intensive mode courses.
- > Graduate salary and employment prospects that are well above the national average.
- > International opportunities including exchange and global internships.
- > Industry sponsored scholarships ranging in value from \$14,000 for the first year of your degree to \$100,000 over five years.

“UTS students have a unique advantage – they gain a wealth of real-world experience during their internships that they really stand out among graduates and are ready to make a serious contribution to any organisation when they graduate.”

Pete Thompson, Operations Manager, Siemens Ltd (Energy Sector, Instrumentation and Electrical)

COURSES IN ENGINEERING

COURSE / MAJOR NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF ENGINEERING, DIPLOMA IN ENGINEERING PRACTICE	Earn a Bachelor of Engineering with a major of your choice, plus the Diploma in Engineering Practice, which includes two six-month periods of internship with an engineering company of your choice. See below and page 33 for specific majors.	Please refer to specific majors below and page 33 for career options.

BACHELOR OF ENGINEERING MAJORS

GENERAL Duration: 5 yrs FT 2013 ATAR: 85.80	This highly flexible degree allows students to select field-of-practice subjects from any of the majors offered, including customising their degree by combining several fields of practice in the General major.	This degree focuses on combining several fields of practice. See individual majors for specific career options.
BIOMEDICAL Duration: 5 yrs FT 2013 ATAR: 85.00	Students learn how to apply knowledge of engineering to the design and development of medical related products and systems. Specialist subjects include biomedical instrumentation and control, bioinformatics, biomechanics, biomedical applications of artificial intelligence and computational neuroscience.	Career options include working with biomedical device companies, biotechnology manufacturing companies, medical research centres or hospitals in Australia and abroad as well as regulatory and management roles.

MAJOR NAME	COURSE DESCRIPTION	CAREER OPTIONS
CIVIL Duration: 5 yrs FT 2013 ATAR: 90.30	This major equips students to be professional civil engineers. It also provides skills in construction, project management, design and surveying and expertise in water supply systems, flood protection, sanitation, hydraulics and waste disposal.	Career options include local and suburban engineering consultancies, road and rail infrastructure, and project management agencies.
CIVIL (CONSTRUCTION) Duration: 5 yrs FT 2013 ATAR: 87.35	Students will gain an understanding of human resources, finance, environmental planning and law, as well as details of installing building services such as lifts, air conditioning, cabling, IT and telecommunications.	Career options include working with private commercial developers or major development companies such as Brookfield Multiplex or Landcom.
CIVIL (STRUCTURES) Duration: 5 yrs FT 2013 ATAR: 90.25	Students will gain advanced knowledge in the behaviour of structures under stresses such as extreme weather, earthquakes or explosions, and develop skills in assessing structural damage, including practical expertise.	Career options include working with companies focusing on designing, building or assessing large structures.
CIVIL & ENVIRONMENTAL Duration: 5 yrs FT 2013 ATAR: 90.90	Students will develop practical skills and expertise in environmental impact assessment, water and wastewater treatment and management, waste management, environmental planning and law, natural resource management (including land and water resources) and sustainable development.	Career options include working with environmental consultants or waste contractors.
ELECTRICAL Duration: 5 yrs FT 2013 ATAR: 85.00	Students will learn about circuits, electronic design, microprocessors, power generation, analogue and digital intelligent control (such as on-board computers in cars, aircraft or trains), fuzzy logic systems and instrumentation.	Career options include working in car and aircraft manufacturing, sustainable energy companies, biomedical and health engineering companies or electronic component manufacturers.
INFORMATION & COMMUNICATION TECHNOLOGIES ENGINEERING Duration: 5 yrs FT 2013 ATAR: 85.00	As an ICT Engineering graduate, you will be able to design, build, develop and manage anything from commercial networks to advanced military or transport applications, industrial automation, intelligent control robotics, aviation, telemetry and satellite systems.	Career options include working with logistics and chain supply companies, telecommunications companies or with commercial service, software and equipment providers.
INFORMATION & COMMUNICATION TECHNOLOGIES ENGINEERING (COMPUTER SYSTEMS) Duration: 5 yrs FT 2013 ATAR: 85.00	Students will learn all the key competencies and skills from the ICT Engineering major, plus subjects specialising in designing, developing, troubleshooting and managing computing machinery from the ground up.	Career options include working with computer systems consultancies.
INFORMATION & COMMUNICATION TECHNOLOGIES ENGINEERING (SOFTWARE) Duration: 5 yrs FT 2013 ATAR: 90.70	Gain the key competencies and skills from the ICT Engineering major, and take subjects specialising in software development and programming languages, technical design and advanced programming for commercial and industrial machines.	Careers include working with commercial software companies such as Microsoft, industrial computing companies or financial institutions.
INFORMATION & COMMUNICATION TECHNOLOGIES ENGINEERING (TELECOMMUNICATIONS) Duration: 5 yrs FT 2013 ATAR: 89.80	Gain the key competencies and skills from the ICT Engineering major plus specialist skills in communications systems, including analogue and digital telephones, mobile and internet networks, communications satellites, radar and telemetry systems.	Careers include working with telecommunications companies and Internet Service Providers as well as work closely with other ICT engineers.
INNOVATION Duration: 5 yrs FT 2013 ATAR: 85.00	Understand and manage engineering innovation processes in a variety of environments through specialised subjects such as creativity and idea generation, patents and intellectual property, product planning, product development and project funding.	Career options are dependent on the engineering study area chosen and can also include working in product planning and strategy, product and business development or marketing firms.
MECHANICAL Duration: 5 yrs FT 2013 ATAR: 85.00	Study dynamics (the science of moving things) and learn to calculate and control the movement and interaction of solid objects, fluids, heat, energy and power conversion.	Careers include working with aerospace companies, automotive companies or machinery and robotics manufacturers.
MECHANICAL & MECHATRONICS Duration: 5 yrs FT 2013 ATAR: 88.00	Learn to design, build and manage automated and autonomous mechanical systems, with an emphasis on robots, micro and nanoscale machines, automatic and intelligent control systems and biomedical devices.	Careers include working as a mechatronic engineer within biomedical and health firms, automotive and aviation companies or machinery and robotics manufacturers.

FT = Full time

A PRACTICAL UNI EXPERIENCE

Materials lab

Nick Newland

iRobot Packbot

Want your degree to be practice-oriented? Here are just some of the options available to you when you study with UTS:Engineering.

- > Engineering students at UTS complete a Diploma in Engineering Practice within the degree; this incorporates two six-month internships. Integrating what you learn in the classroom into a work environment and vice versa.
- > Students are supported by the Industry Partnering Unit which assists students in securing internships. It maintains links with more than 800 engineering and information technology companies.
- > Our Women in Engineering and IT Program offers support to female UTS Engineering students, including scholarships, mentoring, referrals and networking opportunities.

BUILT-IN INTERNSHIPS

UTS Bachelor of Engineering students complete a Diploma in Engineering Practice as part of their degree. This means students undertake two six-month paid internships with companies of their choice as part of their five year degree. These placements, which UTS can assist with finding, help students decide which areas they want to specialise in. It also gives them the opportunity to develop a professional network before they graduate.

"Although students usually complete their placements with two different organisations, I chose to complete both of mine at H.I. Fraser Group, specialist engineering in the niche gas, fluid and waste sector. My first placement was with the Repair and Overhaul department, where I worked as a junior project engineer assisting in project management of maintenance projects for the Royal Australian Navy. For my second placement I spent some time working with the Engineering Consulting department, conducting detailed engineering assessments of fluid distribution systems.

"My internships gave me the opportunity to get my hands dirty with some exciting engineering work on board many of the Navy's warships stationed in the Sydney area. I gained real-world experience in the engineering industry and developed teamwork and leadership skills.

"I've continued working at H.I. Fraser since my first placement and I have been offered a full-time position to continue once I have completed my degree."

Nick Newland, Bachelor of Engineering (Mechanical), Diploma in Engineering Practice

Development from Construction Assignments

CAREER OPTIONS INCLUDE:

- > Environmental engineer
- > Project engineer
- > Mechanical engineer
- > Electrical engineer
- > Engineering consultant
- > Researcher
- > Biomedical engineer

Graduates are prepared for engineering roles within:

- > Telecommunications companies and Internet Service Providers
- > Commercial software companies such as Microsoft or SAP
- > Biomedical and health companies
- > Aerospace, automotive and aviation companies
- > Major developers, such as Mirvac or Multiplex
- > Environmental consultancy companies
- > Project management agencies

CAREER SNAPSHOT

MANAGING DIRECTOR

I graduated from my Bachelor of Engineering (Civil) degree in 1996.

A typical career path for civil engineers – I'm not sure there is one, though many would say it's working for a big construction company. There's actually incredible versatility when it comes to applications in the workplace. Engineers are detail driven, analytical, methodical and innovative. As a result, engineering graduates are always in great demand.

In my role as the founder, owner and managing director of Construction Assignments, orchestrating successful project outcomes is my job. I have no typical days, and this is one of the reasons I love my job so much. I can be interstate on business, chairing project meetings, conducting site inspections, writing project design briefs or meeting stakeholders to understand their needs.

My advice to someone considering studying civil engineering is to look forward to a rewarding and stimulating career. My degree challenged me on all levels and thoroughly prepared me for the workforce. I have the opportunity to apply my skills as an engineer and be in charge of large-scale construction sites. If you want a career with a great sense of achievement and a satisfying pay packet then engineering does it all.

**Drenka Andjelic, Managing Director, Construction Assignments
Bachelor of Engineering (Civil)**

DID YOU KNOW?

- > Many of our students are able to stay on after their final internship and spend the last year of their degree studying part-time whilst working in industry and gaining valuable work experience before graduation.
- > UTS: Engineering is home to the Engineering Remote Labs. One of the first of its kind in the world, it allows students to conduct real-time experiments at any time of the day, anywhere in the world.

UTS: HEALTH

Midwifery students

Clinical labs

Kuring-gai campus sports facilities

WE OFFER:

- > Cutting-edge practical courses in nursing, midwifery, human movement and sport and exercise management.
- > Extensive clinical or internship experience in leading organisations and teaching hospitals (depending on your degree choice) with clinical placements starting in first semester.
- > Industry-backed courses, supported by area health services, government and health care agencies.
- > The first Bachelor of Midwifery degree in New South Wales.
- > Outstanding clinical lab facilities, including life-like robotic patients and well-equipped exercise physiology labs.
- > Lecturers who are renowned researchers in their field and are shaping current and future practice in health and fitness.
- > A friendly and supportive environment where students are encouraged to reach their full potential.

COURSES IN HEALTH

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF HUMAN MOVEMENT[#] Duration: 3 yrs FT 2013 ATAR: 83.50	This course provides students with a strong understanding of the processes and mechanisms underlying human movement, and with the knowledge and skills necessary to manage and plan human movement activities in leisure, sport, health and education contexts.	Career options include sports science, elite athlete coaching, fitness and corporate health, facility management, personal training, sport coaching, teaching personal development, health, as a physical education (PDHPE) teacher and in outdoor education.
BACHELOR OF MANAGEMENT IN SPORT AND EXERCISE[#] Duration: 3 yrs FT 2013 ATAR: 72.20	This course recognises the increasing importance of professionals in managing health, lifestyles and wellbeing in the community. Graduates possess a sound knowledge of the biophysical, behavioural and socio-cultural foundations of sport and exercise combined with the business skills necessary to operate in this dynamic environment.	Career options include sport development management, fitness consulting, athlete management, sport venue management, corporate health and fitness, health promotion, sport marketing, sport development, sport policy, sport event management.
BACHELOR OF MIDWIFERY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 91.90 (FT) / 91.30 (PT)	This course prepares students to work as competent and confident midwives who practise woman-centred care. From the first semester of the course, students will gain extensive practical midwifery experience. Every semester includes placements in maternity wards and continuity of care experiences.	Career options include being a registered midwife in both hospital and community settings, and in metropolitan and rural areas. Career progression can include specialist and consultancy roles (eg. lactation consultant) as well as positions in management and as a midwifery educator.
BACHELOR OF NURSING (CITY) Duration: 3 yrs FT 2013 ATAR: 84.80	This course prepares students to become registered nurses working in a variety of settings and providing care that is patient-centred, professional, responsible and respectful. The course emphasises hands-on experience. Students will complete clinical placements in hospitals and other health facilities in every semester of the course.	Career options for registered nurses include working in diverse speciality areas such as community health, critical care, intensive care, aged care, mental health, operating theatres and paediatrics. Career progression opportunities include working as a clinical nurse consultant, clinical nurse specialist, nurse educator, nurse manager, nurse practitioner or rural and remote practice nurse.
BACHELOR OF NURSING (KG)[#] Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 73.00 (FT) / 85.00 (PT)		

FT = Full time / PT = Part time

City = City campus / KG = Kuring-gai campus

[#] This course is currently taught at the UTS Kuring-gai campus in Lindfield. From 2016, classes in Lindfield will be transferred to the UTS City campus.**COMBINED DEGREES:** See the ATAR pull-out at the front of this guide for a list of combined degrees with Health.

A PRACTICAL UNI EXPERIENCE

At UTS, practical experience is integrated into the curriculum and offered through internships and placements so you will graduate with the skills to apply your knowledge in the workplace.

- > Bachelor of Human Movement and Bachelor of Management in Sport and Exercise students complete a professional internship in their final semester of study.
- > UTS Nursing and Midwifery students complete clinical placements at a relevant hospital or other health care setting each semester, meaning students gain a total of 820 hours of hands-on experience before graduation.
- > Midwifery students are also required to follow 20 women throughout their pregnancy, birth and the period after birth. This allows students to experience being on-call, and attend the labour and birth.
- > Third-year midwifery students undertake a prolonged period of clinical experience with most time spent in the clinical environment.
- > Nursing and Midwifery students can also choose to undertake a rural placement in their final year, allowing them to experience community practice.
- > While on campus, UTS: Health students gain practical experience with hands-on equipment in clinical and exercise physiology labs including robotic patients and birthing mannikins.

Ashley Cosmo

Nursing class

NURSING CLINICAL PLACEMENTS

One of the distinct benefits of the Bachelor of Nursing degree is the extensive work placement opportunities for students use their university training in real life clinical settings. In total, UTS Nursing students complete 820 hours of clinical placement as part of their degree.

"Our clinical placements start in the first semester of our first year so it's a fantastic way to put into practice the theory you've learnt right from the start. Within the faculty we have a clinical placement unit, whose sole purpose is to assign us to placements. Students are assigned a range of placements, even specialty placements such as mental health or paediatrics.

"So far in my degree I've been to many different hospitals such as Royal Prince Alfred Hospital (RPA), Westmead Hospital, Cumberland Hospital, Liverpool Hospital, and Royal North Shore Hospital. I've worked in mental health, paediatrics, geriatrics, medical surgical – and have never been on the same ward twice. I loved my most recent placement in the RPA Transplant Unit. It was challenging, both from a nursing and ethical perspective. It also sparked my interest in becoming more knowledgeable in specific areas of nursing – for example, the transplant unit only transplants livers and kidneys, so all nurses there have amazing liver and kidney knowledge.

"From my placements I've learnt the importance of showing basic human compassion – offering a shoulder to cry on, or cracking a joke with a patient. My experience has taught me that being able to empathise is necessary to being a good nurse."

Ashley Cosmo, Bachelor of Nursing

CAREERS IN HEALTH

CAREER OPTIONS INCLUDE:

- > Registered nurse
- > Registered midwife
- > Fitness consultant
- > Sports manager
- > Sport policy maker
- > Corporate health and fitness consultant

DID YOU KNOW?

- > Sport and fitness is a growing industry with the 2011 Census reporting that 95,590 people were employed in the sector, an increase of 17 per cent compared with the 2006 Census.
- > UTS nursing students' classrooms are designed to be like hospital wards. This helps familiarise students with their future working space on-campus and prepares them for their practical placements.

Amy Wilkins

CAREER SNAPSHOT

DIRECTOR & CO-STAR HEALTH TV SERIES

I completed my Bachelor of Human Movement degree in 2002.

A typical career path for someone with my qualifications would be to work in sports science, coaching, exercise physiology, rehabilitation or research.

In my role as a director and presenter of a fun television program encouraging children to be physically active, each day is very different. We write our scripts, write and record the music, choreograph the routines and organise our own photo shoots. We spend a few weeks filming our series, which is filled with dancing and interviews. In the lead up to this we're sourcing material, script editing and maintaining our own fitness. We tour around the country for days, sometimes weeks. My favourite part of the job is performing live for kids and parents – there is so much energy in the room!

My advice to anyone considering a profession in human movement is to go for it. There's no better feeling than getting everyone energised and having fun. Let's make a difference to Australia's health, wellbeing and fitness.

Amy Wilkins, Director of Active Star Productions and Co-star of children's Health TV series *Active Kidz*, Bachelor of Human Movement

WE OFFER:

- > Practice-based IT education with the opportunity to undertake substantial internships for all undergraduate students.
- > A mix of business and essential IT skills – learning how to use IT to solve business problems.
- > The Bachelor of Information Technology (BIT) – a fast-track course for high academic achievers with leadership potential, offering a scholarship of \$46,500 over three years.
- > Outstanding facilities in a wireless connected building with remote access and 24/7 access to the IT building and IT computer labs, just for IT students.

“UTS students bring passion, enthusiasm, intelligence and hard work during their industry placements and have been able to contribute to the delivery of real customer solutions. The value they provide Wise TechGlobal is incredible – it is often a task to remember that they are only students!”

Richard White, CEO and Founder,
Wise TechGlobal

COURSES IN INFORMATION TECHNOLOGY

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF INFORMATION TECHNOLOGY Duration: 3 yrs FT 2013 ATAR: N/A* * The Bachelor of Information Technology is a co-operative scholarship course. Selection is based on a combination of ATAR and interview.	This is a fast-track co-operative scholarship course sponsored by industry, valued at \$46,500. Designed with help from our sponsors, this is an IT course with a business focus where students develop an understanding of both business practice and technical skills, preparing them for management roles in IT.	Career options include project manager, business analyst, information systems manager, IT consultant or programmer/developer.
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY, DIPLOMA IN INFORMATION TECHNOLOGY PROFESSIONAL PRACTICE Duration: 4 yrs FT / 6 yrs PT 2013 ATAR: 83.00	This course takes a practice-based approach to IT education. Students learn both academic theory and practical skills in IT. As well as strong technical skills, students develop skills in business analysis, problem-solving, teamwork and communication. This course also allows you to choose an IT major and a range of electives so you can tailor the course to meet your interests.	Career options include business analyst, IT project manager, network specialist, software developer, systems analyst, and web developer.
BACHELOR OF SCIENCE IN GAMES DEVELOPMENT Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 91.20	In this course students gain enhanced work-ready expertise in games development. Today's games are large sophisticated computer programs that model 3D worlds in detail, implementing realistic physics with computer controlled characters that connect thousands of players through virtual worlds. This courses offers a sound education in all aspects of information technology and develops the diverse skills necessary for a career in computer games development.	Career options include computer animation/graphics specialist and computer games developer.

FT = Full time / PT = Part time

COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with Information Technology.

A PRACTICAL UNI EXPERIENCE

Want your degree to be practice-orientated? Here are just some of the options available to you when you study with UTS: IT.

- > Bachelor of Science in IT students complete the Diploma in IT Professional Practice as a core aspect of the degree. This means you complete a minimum of nine months' paid IT work experience as part of your course in your third year.
- > Bachelor of Information Technology scholarship students complete two six-month industry placements with different sponsor organisations during their first and third years.
- > UTS: IT hosts a number of special industry guest lectures throughout the year. In conjunction with the UTS Careers Service, UTS: IT also provides opportunities for you to meet and speak with industry representatives.
- > The Women in Engineering and IT Program offers support to female UTS: IT students as well as mentoring, referrals and networking opportunities.
- > UTS: IT teaches students soft skills, including communication and teamwork, as part of your course. The inclusion of these essential workplace skills are supported by industry recommendations.

Stefan Caliaro

Group study area for IT students

IT STUDENTS GAIN INDUSTRY EXPERIENCE

Bachelor of Information Technology (BIT) Co-operative Scholarship students complete two six-month industry placements as part of their degree. Funded by high profile industry sponsors including IBM, American Express and Westpac, this fast-track program allows students to complete both their degree and 12 months of industry placement in just three years.

"I chose to study the BIT course at UTS because it has the perfect blend of technical and business subjects. I'm currently in my second year of study and have just completed my first six-month industry placement with SingTel Optus, as both a Data Analyst and Web Developer. My placement gave me opportunities to liaise with professionals from various backgrounds and skill sets. I've worked alongside business analysts, network engineers, software developers, project managers, solution architects and testers – all providing different perspectives of what I can do in my IT career.

"My placement has been a challenging learning experience, teaching me how IT is integrated into the real world on a daily basis. When I first started I was quite lost, only understanding every fourth word my colleagues were saying. But after just three weeks, I'd already learnt so much about industry standard technologies I never knew existed. I've developed not only technical IT skills, but also a strong work ethic, time management skills, communication skills and the ability to build strong working relationships with colleagues."

Stefan Caliaro, Bachelor of Information Technology

- > Computer games developer

DID YOU KNOW?

- > The Engineering and IT Industry Partnering Unit assists you to find professional placements while at uni.
- > It's a good time to enter into the ICT industry. The new National Broadband Network will create jobs for ICT graduates. For information on careers visit www.joboutlook.gov.au
- > There's more to uni than study – there's the social side too. You can meet fellow students before uni starts, at the UTS: IT Orientation Camp. There's also clubs such as the Programmers Society, Electronic Gamer Guild and BiG Society for IT students. Visit www.union.uts.edu.au

CAREER SNAPSHOT

BUSINESS DEVELOPMENT MANAGER

I graduated from the Bachelor of Information Technology in 2007.

A typical career path for someone with my qualifications is often between business and technical worlds. My past roles have included test analysis, technical project management, and management consulting (strategy and business operations).

In my role I manage both the sales and operations for partners that resell Google Apps for Business, such as managed service providers, systems integrators, and telecommunications providers across Asia-Pacific. It's my job to manage all parts of their Google business, whether it be their sales, marketing, technical or operations. Think of it like a business relationship manager.

My partners are all over Asia-Pacific, which means no two days are alike. I could be in Hong Kong helping to improve a partner's sales operations; delivering training to Indian partners via Google Hangouts; or collaborating with teams at Mountain View, California – our global headquarters. It's a privilege to work with so many talented people, across different cultures and with different perspectives.

My advice to students thinking about a career in IT is run, don't walk. Seize the opportunity! I love that technology can unlock so many possibilities for business, things we haven't even thought of yet. This degree gives you the skills to be as business-oriented or as technical as you like – I'm definitely proof of that.

**Jeza Ann Mancenido, Business Development Manager,
Enterprise Partnerships, Asia Pacific, Google
Bachelor of Information Technology**

UTS: INTERNATIONAL STUDIES

www.internationalstudies.uts.edu.au

WE OFFER:

At UTS we offer two international-focused degree options.

BACHELOR OF GLOBAL STUDIES

This three year stand-alone degree allows students to:

- > Choose both a major (such as Business Studies, Communication, Legal Studies or Management Studies) and sub-major.
- > Learn about the global connections between the political, economic and cultural aspects of societies and countries.
- > Go on exchange for one semester as part of their degree.
- > Gain experience in an industry placement with a globally oriented organisation.
- > Internationalise their learning experience.

BACHELOR OF ARTS IN INTERNATIONAL STUDIES

This degree must be combined with another degree and allows students to:

- > Study a language and culture of their chosen country.
- > Choose from one of six language majors, with exchange available to 13 countries including; Argentina, Canada (Quebec), Chile, China, Colombia, France, Germany, Italy, Japan, Latino USA, Mexico, Spain and Switzerland.
- > Complete one year overseas studying in the country of their major, with airfares and visas paid for by UTS.
- > Develop international networking opportunities.
- > Access international support through UTS's partnerships with universities worldwide.

COURSES IN INTERNATIONAL STUDIES

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF GLOBAL STUDIES Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 83.10	This transdisciplinary degree focuses on the connections between the political, economic and cultural aspects of global issues, within the context of a chosen area such as business studies, communication, legal studies, management studies.	Career options may include international advisory and management positions in government organisations such as foreign affairs or the UN, non-government agencies, and companies that operate globally.
BACHELOR OF ARTS IN INTERNATIONAL STUDIES Duration: This degree normally adds an additional 2 yrs to another UTS bachelor's degree 2013 ATAR: The Bachelor of Arts in International Studies cannot be undertaken alone but must be combined with another UTS undergraduate degree. See pull-out at the front of this guide for individual course ATARs	Students can combine International Studies with almost any undergraduate program at UTS. The course adds an international dimension, enabling students to study a professional area – such as Business or Law – while at the same time learning a chosen language and culture.	Career options are determined by the professional component of the degree. With a degree in International Studies, students gain qualifications in language, intercultural and international awareness, and a country speciality. This added dimension makes students more marketable to prospective employers globally within their chosen discipline.

FT = Full time / PT = Part time

COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with International Studies.

Danielle Buhagiar

PRACTICAL PLACEMENTS

UTS Global Studies students have the opportunity to complete a relevant practical placement, giving students a hands-on experience in the field in which they would like to work. The one-day a week practicum gives students the chance to apply their studies to real world situations.

"I worked in a political campaign office for the Australian Greens in the lead up to the 2011 Federal election. I chose the Australian Greens because I believe they do important work campaigning on many issues that are important to local communities and have global repercussions. I have always been interested in local and international politics.

"During my placement, I was able to gain skills in research, speech writing, online communications and campaigning. It gave me a much better understanding of the career path I would like to follow when I finish my studies.

"Global Studies explores the global issues around areas like economics, politics, human movement, trade, work and human rights. You study a broad range of areas and we're encouraged to look at things from a historical perspective and explore our personal interests."

Danielle Buhagiar, Bachelor of Global Studies

BACHELOR OF ARTS IN INTERNATIONAL STUDIES

The Bachelor of Arts in International Studies includes an In-Country Study (ICS) component. Undertaken in fourth year of study, ICS means students spend two semesters living and studying in one of our partner locations – where they'll attend classes at one of over 70 established university partners. The map on the opposite page shows the 13 countries currently offered for ICS.

Ratna Pillai in Colombia on her ICS year abroad

STUDY OVERSEAS FOR A YEAR

"Studying overseas had been a dream of mine. When I realised I had the opportunity to go overseas for a whole year as part of my degree, I jumped at it. The chance to learn a new language, live in a foreign country and of course to travel was one I couldn't pass up. For my ICS year I lived in Bogotá, Colombia and studied at the Universidad de los Andes.

"It's hard to narrow down the greatest part of this experience. It has definitely been the most interesting year of my life. I've made incredible new friends, many of whom I'm sure I'll have for life. I've also travelled through much of Central and South America over the year – a very different (and better) experience when you know the language!

"Over the course of the year I've learnt so much about myself and Latin America – its culture, its people and the issues that concern them."

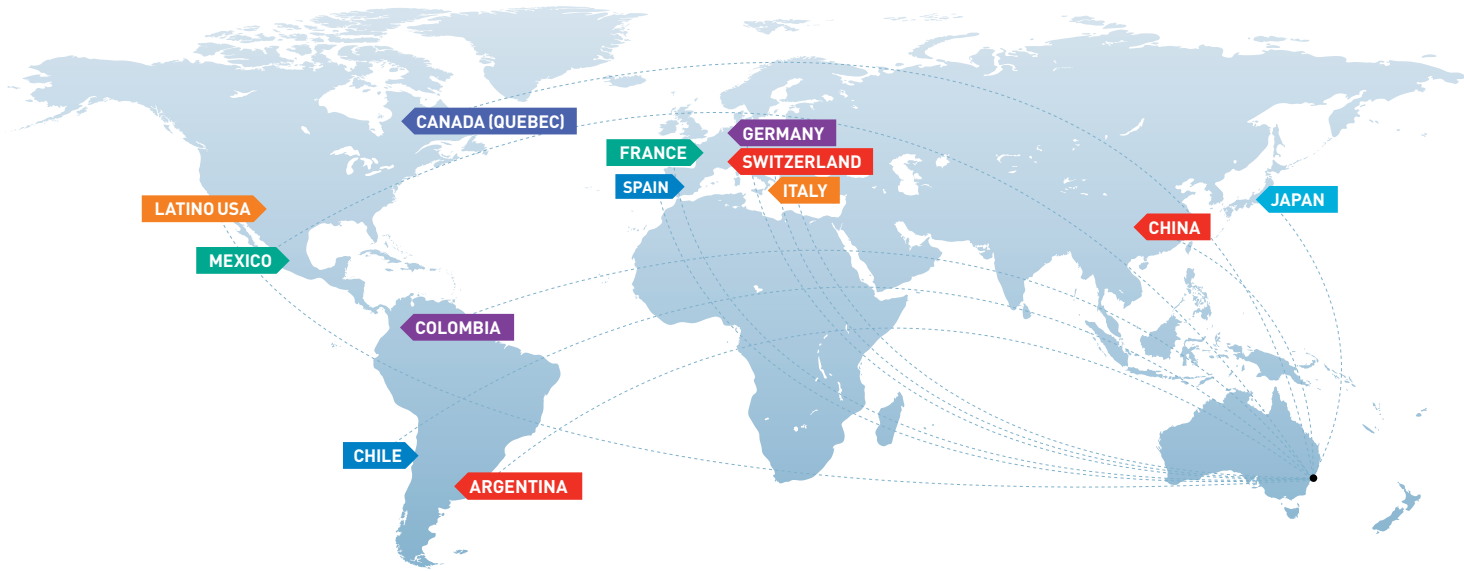

**Ratna Pillai, Bachelor of Arts in Communication (Media Arts & Production),
Bachelor of Arts in International Studies**

DID YOU KNOW?

- > International Studies can be combined with 31 different degrees at UTS. Go to the pull-out at the front of this guide to see if it's offered with your preferred degree.
- > Students who study International Studies learn a language and culture as part of their degree – as well as spending a full year studying overseas.

SPEND A YEAR STUDYING IN ONE OF THESE COUNTRIES:

CAREER SNAPSHOT

PROJECT COORDINATOR

I graduated with a Bachelor of Management in Events and Leisure combined with a Bachelor of Arts in International Studies in 2012.

A typical career for someone with my qualifications is difficult to describe. There really is no typical career. That's the best part of doing a leisure management degree combined with International Studies – the choices are endless. You can go from working in hospitality to events, or in my case a sports focus such as skiing and snowboarding.

In my role as International Ski Federation Coordinator for the Bring Children to the Snow, I am responsible for the direction of the project, development and structuring of communication campaigns and developing and maintaining relationships with partners and sponsors. I work in a team of over 250 organisers in 39 countries around the world. My office overlooks a postcard view of the Swiss Alps, but I do as much work on the road as I do in the office. My job has given me the opportunity to visit Austria, Poland, Italy, Japan and many other countries.

My advice to anyone considering International Studies or Leisure Management is that they will provide you with a very open career path and a great learning experience. Spending one year overseas and learning a different language while at university as part of my International Studies degree was a unique opportunity. With these degrees you can work almost anywhere.

**Andrew Cholinski, Coordinator for Bring Children to Snow,
International Ski Federation
Bachelor of Management in Events and Leisure,
Bachelor of Arts in International Studies**

Andrew Cholinski

UTS:LAW

www.law.uts.edu.au

Faculty of Law, Haymarket campus

Faculty of Law courtyard

WE OFFER:

- > A one-stop legal education for admission to practise as a lawyer to the Supreme Court of NSW. We offer an accredited legal qualification, such as the Bachelor of Laws (LLB) and an accredited course of Practical Legal Training (PLT).
- > Straight Law, as well as combined degree options with: Business, Communication, Engineering, Information Technology, International Studies, Medical Science and Science.
- > Scholarships and awards offered specifically for our Law undergraduate students.
- > State-of-the-art facilities, including a moot court, trial courts and new spaces to study or relax.
- > Flexible study options. Daytime lectures in core subjects are repeated in the evening (and recorded) and students may enrol in summer session, allowing accelerated progression.
- > Internationally recognised academics with current industry knowledge and experience.
- > Graduate attributes embedded in all core subjects, ensuring the development of work ready professional skills.
- > An active and welcoming Law Students' Society.

“PwC is affiliated with the UTS Law School, offering placements to UTS Law students through the Practical Legal Training program. As a multidisciplinary practice, PwC gives law students the opportunity to work with tax advisors, accountants, corporate finance teams and other specialist business advisors to provide practical and commercial legal solutions for our clients. The focus of the Law program on commercial and practical application of legal problems to business issues has provided some great experience for past participants, and is aligned with the needs of clients and what they value. We look forward to continuing our relationship with the UTS Law School.”

Andrew Wheeler, Partner,
PricewaterhouseCoppers, Legal Services

COURSES IN LAW

COURSE NAME

COURSE DESCRIPTION

CAREER OPTIONS

BACHELOR OF LAWS**Duration:** 4 yrs FT / 6.5 yrs PT**2013 ATAR:** 97.05 (FT) / 98.95 (PT)

This course explores the legal system. In addition to core subjects, students can engage in study of the law in a broader context by undertaking electives in Law or in other disciplines.

This course satisfies the academic requirements for admission as a lawyer in New South Wales. Students wishing to obtain full recognition as graduate lawyers have the option of completing the Practical Legal Training program, also available at UTS.

Career options include lawyer (solicitor or barrister), policy adviser, in-house counsel, judge, human rights advocate, diplomat and business executive.

FT = Full time / PT = Part time

COMBINED DEGREES: See the ATAR pull-out at the front of this guide for a list of combined degrees with Law.

Codie Asimus

PRACTICAL LEGAL TRAINING

Practical Legal Training (PLT) is an essential study requirement for any person wishing to practise law in NSW. UTS is the only university to offer an accredited PLT program in Sydney. PLT at UTS requires students to complete three subjects and 80 days of work placement.

"The PLT program focuses on how to apply your legal knowledge in a practical context. On the academic side, the PLT subjects allowed us to participate in UTS's mock courtroom to examine and cross-examine witnesses as either the defence counsel or prosecution; act for 'clients' on the sale of land and business; and practice our interview and negotiation skills in simulated scenarios with real people playing the role of the clients and opposing solicitor.

"For the professional practice component, I completed my work placements at Linklaters in London – a global commercial law firm; King & Wood Mallesons – a leading commercial law firm in the Asia-Pacific region; and David Begg & Associates – a small commercial litigation firm in Sydney. The cases and transactions I worked on across all three firms were diverse – from acting for the borrower to raise six billion euros in a syndicated loan involving 39 banks in London, to litigating against three defendants for operating a fraudulent investment scheme in Sydney. These experiences gave me a great insight into the legal profession and the many different career paths open to a law graduate.

"The experience gained through my PLT placements not only changed my future career goals, but also resulted in me moving to the other side of the world. I've since accepted a graduate position and signed a two year training contract with Linklaters in London."

Codie Asimus,
Bachelor of Arts in Communication (Public Communication), Bachelor of Laws

A PRACTICAL UNI EXPERIENCE

Want your degree to be practice-oriented? Here are just some of the options available to you when you study with UTS:Law.

- > The option to complete the Practical Legal Training (PLT) program on campus, at the same institution as your undergraduate law degree.
- > Mentoring programs to support the various needs of our students, including the High Achievers Mentoring Program matching top performing students with influential members of the legal profession.
- > The UTS mooting program gives you the opportunity to compete in mock trials both nationally and internationally, and build your oral advocacy skills (the ability to persuasively argue in court).
- > The Brennan Justice and Leadership Program is a voluntary program for Law students to develop their leadership qualities and take part in a range of educational events and activities.
- > In some subjects, choose to be assessed in part through your work on real life community projects, instead of exams and essays.
- > Internships with major Sydney law firms and government departments through the Summer Clerkship and Graduate Employment Programs.

Carolyn Toh

UTS Moot Court

MOOTING COMPETITIONS

The Faculty of Law and UTS Law Students' Society run mooting competitions throughout the year for students, and organise UTS participation in competitions with other universities both locally and internationally. Mooting involves two opposing teams presenting written and oral arguments around a set of hypothetical facts in front of a judge, in a mock courtroom. Mooting enhances legal written and oral skills and encourages students to develop their legal argument in a time-pressed environment.

"Mooting has enabled me to practically apply the legal knowledge I have gained during my law degree. It has developed my ability to think critically about legal principles and cases to help build a strong legal argument. It has also taught me to think quickly on my feet and sharpened my oral advocacy skills, both of which are vitally important in becoming a good lawyer.

I'm part of the UTS team that will compete in the UK at Oxford University's internationally renowned Price Media Law Moot. Bringing together teams from around the world, the competition focuses on the functions of international human rights law and how this has been considered in areas of technology and media. The Price Moot is the perfect opportunity to explore my interest in these different areas, and further enhance my mooting skills."

Carolyn Toh, Bachelor of Laws

CAREERS IN LAW

Arezo Malakooti (left)

CAREER OPTIONS INCLUDE:

A degree in law opens doors to a vast choice of career opportunities. Graduates of UTS: Law have followed various career paths, either entering the legal profession or pursuing careers in government, business, media and the arts, education, engineering, information technology, and science. Careers include, but are not limited to:

- > Lawyer (solicitor or barrister)
- > Policy adviser
- > Human-rights advocate
- > Executive management
- > In-house counsel

DID YOU KNOW?

- > UTS: Law students can take part in the Brennan Justice and Leadership Program, where students can develop their leadership potential through a range of lectures, discussion groups and activities.

www.law.uts.edu.au/brennan

- > The Law Students' Society (LSS) is one of the largest student associations at UTS. As well as social activities like the Law Orientation Camp, Law Ball, Law Revue – they also run legal competitions like mooting, witness examination, and client interviewing.

www.utslss.com

CAREER SNAPSHOT

HUMAN RIGHTS AND GOVERNANCE ADVISOR

I graduated from a combined Bachelor of Business, Bachelor of Laws degree in 2006.

A typical career path for someone with a law degree would be to work as a lawyer. However, a law degree also teaches you to think critically, develop a concise argument, negotiate different interests, build consensus and be analytical – skills that can take you into a number of different areas including politics and journalism.

In my role I conduct social research to understand the needs of communities in developing countries and design strategies for aid and development projects. My focus areas are justice and gender issues, governance and democratisation. I've recently been in Afghanistan researching ways in which women's rights can be ensured and their participation in decision-making increased. I'll then present some strategies to government policy makers. In previous roles I've also developed training programs in East Timor, Cambodia and Afghanistan around public education, human rights monitoring and the provision of legal aid services for vulnerable groups, predominantly women.

My advice for anyone considering a career in law is that it's a very rewarding area of work that really enables you to use your education to make a difference in the world. I didn't follow the traditional path of practising law, but I love that I have a real impact on the way policies are developed. You become a part of the nation building and global development process and have the ability to influence it in a unique way.

**Arezo Malakooti, Bachelor of Business, Bachelor of Laws
Human Rights and Governance Advisor for Altai Consulting**

UTS: SCIENCE

www.science.uts.edu.au

WE OFFER:

- > Practice-based and flexible study options with a choice of 12 majors including a flexible major option in the Bachelor of Science.
- > Our lecturers are also active researchers who work closely with industry and pass on their research findings in classrooms.
- > Over \$100,000 worth of science and mathematics scholarships available through the UTS: Science School's Recommendation Scholarships. For more details visit www.science.uts.edu.au/scholarships
- > Accreditation and recognition by different associations and industries. For example, the biomedical science program is accredited by the Australian Institute of Medical Scientists and the applied chemistry program is accredited by the Royal Australian Chemical Institute.
- > World-class science facilities and laboratories, with another new building to open in 2014.
- > The opportunity to broaden your specialisation by combining your science or maths degree with Business, International Studies, Law or Engineering.
- > Degree pathways to specialist study such as Pharmacy, Medicine and Dentistry.

DEGREE OPTIONS

UTS Science offers students the choice to study from one of 12 majors within the Bachelor of Science (see page 53-54) or one of 10 specialist Bachelor degrees (see page 54).

Students who are uncertain of what to study, are often advised to choose the Bachelor of Science as it allows students to change majors after their first year. In most cases, there is no great difference between the Bachelor of Science and specialist Bachelor degrees, and students in the same specialisation attend the same classes.

Visit www.handbook.uts.edu.au for more information on these courses and majors.

COURSES IN SCIENCE

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF SCIENCE Offers 11 majors and a flexible option (refer table below for specific majors)	Students can either specialise in a specific major or choose to develop skills in a range of scientific disciplines. Students gain strong critical thinking skills and learn how to apply practical problem solving skills in a hands-on environment.	Please refer to specific majors below for career options.
BACHELOR OF SCIENCE MAJORS		
APPLIED CHEMISTRY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 71.65	Students gain insight into how chemical substances work and the reasons for their behaviour. Strong practical skills with lots of laboratory experience, and theory as well.	Career options include chemist, food technologist, geochemist, toxicologist, QC analyst, lab technician, materials and product development. Professional recognition: Royal Australian Chemical Institute (RACI).
APPLIED PHYSICS Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 71.20	Students learn about the interactions of energy and matter, precision measurement techniques, measuring and understanding the laws of nature and how new developments in physics help to expand science and technology in our daily life, e.g. LED light source, digital camera, etc.	Career options include conservator, metallurgist, noise consultant, materials analysts, biophysics consultant, medical physics diagnosis, sustainable energy researcher, medical and health physicist, atomic and molecular physicist. Professional recognition: Australian Institute of Physics (AIP).
BIOMEDICAL SCIENCE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 78.00	Students gain an understanding of how the body works, disease causes and laboratory techniques of disease diagnosis. This is the only course/major in Sydney accredited by the Australian Institute of Medical Science (AIMS). Preparation for postgraduate medicine, pharmacy and dentistry.	Career options include infectious disease scientist, medical lab manager, cytologist, biochemist, microbiologist, cancer research, geneticist, pathology, biological oceanographer, quarantine. Professional recognition: Australian Institute of Medical Scientists (AIMS).
BIOTECHNOLOGY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 78.00	Students learn the biological processes of living organisms, and learn how to naturally manipulate these processes in the development of new medicine, food and organic substances.	Career options include product developments in industries including, pharmaceuticals, agriculture, quality control in food industries, vaccine research and defence technologies. Professional recognition: Australian Biotechnology Society.
ENVIRONMENTAL BIOLOGY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 70.70	Focuses on the natural systems, how these systems work, and how detrimental impacts can be assessed and recovered through practical learning. Students learn through a combination of theory, field trips and lab work. Excursion is a core component of this major.	Career options include environment and protection officer, researcher, consultant, aquatic ecologist, entomologist, land economist, mapping scientist, plant pathologist, plant taxonomist, rangers, pest and weed controllers.
ENVIRONMENTAL FORENSICS Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 70.70	A cross-disciplinary major that combines environment studies, chemistry and law providing students with broad applications and career pathways. Good understanding of legal framework in environmental protection, impact of consumerism to resource management and ecosystems.	Career options include endangered species consultant, conservation consultant, environmental policy advisor, environmental officer, conservation education officer, work safe regulator, environmental media liaison, heritage and protection consultant.
FLEXIBLE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 74.00	Our most flexible degree that enables you to study core science and mathematics subjects while specialising in your areas of interest.	Career options include a wide range of professional jobs, depending largely on the chosen subjects. Graduates will have versatile soft skills that are recognised in almost any industry.
MATHEMATICS Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 73.05	Students gain a good understanding of the mathematical foundations of quantitative methods and modelling technologies used in such areas as finance, logistics, health and market research. Students can customise their degree according to their interests.	Career options include financial consultant, investment analyst, intelligence analyst, banker, computer program. Maths graduates are in demand in a wide range of fields such as health, finance, markets research etc.
MARINE BIOLOGY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 70.70	Focuses on how the marine environment works and how it can be better managed. Students gain a thorough understanding of the way plants, animals and micro-organisms function in marine ecosystems.	Career options include national and wildlife parks, marine and environmental protection authorities, coastal management, education and conservation consultant. Professional recognition: Australian Marine Science Association.
MEDICAL SCIENCE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 78.00	Focuses on human anatomy and physiology. Students gain knowledge of the structure, function and control of the body system as well as the aetiology and pathophysiology of disease. An excellent preparation for postgraduate medicine, pharmacy and dentistry.	Career options include medical scientist, medical imaging technician, anaesthetic technician, cardiac technician, gene therapy, drug registration, clinical trials, dietetics, pathology, occupational health, medical research and diagnosis.

continued on next page...

BACHELOR OF SCIENCE MAJORS CONTINUED

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
NANOTECHNOLOGY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 71.25	Students gain insight into how the world works at the level of atoms, molecules and applying that knowledge to improve or produce materials making products more sustainable and eco-friendlier. Examples of nanotechnology products are USB, cosmetics, sun screen, iPhone, etc.	Career options include nanotechnologist, material analyst or scientists, composite technologist, entrepreneurial, investment advisor, product development and commercialisation, imaging specialist. Professional recognition: Australian Institute of Physics (AIP).
STATISTICS Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 73.05	Students gain an understanding of mathematical statistics and its applications and provides them with skills to interpret data and to design data collection for maximum information at a given cost.	Career options include market researcher, quantitative data analyst, banker, investments analyst, systems analysts, credit risk analyst, maths teacher, logistics and business modelling analyst.

SPECIALIST BACHELOR DEGREES

COURSE NAME	COURSE DESCRIPTION	CAREER OPTIONS
BACHELOR OF BIOMEDICAL SCIENCE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 83.75	Refer to Bachelor of Science majoring in Biomedical Science on page 53.	Career options are the same as Bachelor of Science in Biomedical Science on page 53.
BACHELOR OF BIOTECHNOLOGY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 74.80	Refer to Bachelor of Science majoring in Biotechnology on page 53.	Career options are the same as Bachelor of Science in Biotechnology on page 53.
BACHELOR OF FORENSIC BIOLOGY IN BIOMEDICAL SCIENCE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 84.35	Students are trained in both biomedical science and forensic biology, giving them an understanding of how the body works, what causes disease, disease diagnosis, and how to apply this knowledge to forensic investigations.	Career options include DNA profiler, forensic scientist, scene of crime officer, DNA testing labs, biomedical scientist, medical diagnostics, researcher. Professional recognition: Australian and New Zealand Forensic Science Society.
BACHELOR OF FORENSIC SCIENCE IN APPLIED CHEMISTRY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 78.45	This course is the first of its kind in Australia. Students are trained in two specialisations, making them highly adaptable with the ability to work as forensic scientists or chemists.	Career options include crime scene officer, chemist, researcher, quarantine control, drug detection. Professional recognition: Australian and New Zealand Forensic Science Society, Royal Australian Chemical Institute.
BACHELOR OF HEALTH SCIENCE IN TRADITIONAL CHINESE MEDICINE Duration: 4 yrs FT / 8 yrs PT 2013 ATAR: 75.90	Graduates will be professional Chinese medicine practitioners, equipped with knowledge of traditional Chinese medicine (TCM), pharmacology of Chinese herbal medicine, Chinese massage, acupuncture and Chinese diagnostics.	Career options include private practitioner in acupuncture, Chinese herbal medicine and Chinese massage, clinical therapist, researcher, nutritional and health consultant. Professional recognition: Chinese Medicine Board of Australia.
BACHELOR OF MATHEMATICS AND COMPUTING Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 71.70	Graduates are equipped with both computational and mathematical skills, with the ability to model and analyse practical situations. A highly sought after combination in this technological age.	Career options include investment analyst, computer programmer, management consultant, intelligence analyst, information system developer, logistic analyst. Professional recognition: Australian Computer Society.
BACHELOR OF MATHEMATICS AND FINANCE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 79.65	Students learn theories and applications behind investment principles, how financial markets operate, and analytical, statistical and algebraic skills. Graduates are highly skilled in mathematics and financial studies, which are highly sought-after in today's financial market.	Career options include stock market analysis, portfolio management, option pricing, movement predictions in international money markets and financial risk management. Potential employers include banks, financial and insurance institutions, superannuation providers.
BACHELOR OF MEDICAL SCIENCE Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 87.35	Refer to Bachelor of Science majoring in Medical Science on page 53.	Career options are the same as Bachelor of Science in Medical Science on page 53.
BACHELOR OF SCIENCE IN ENVIRONMENTAL FORENSICS Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 70.70	Refer to Bachelor of Science majoring in Environmental Forensics on page 53.	Career options are the same as Bachelor of Science in Environmental Forensics on page 53.
BACHELOR OF SCIENCE IN MARINE BIOLOGY Duration: 3 yrs FT / 6 yrs PT 2013 ATAR: 71.85	Refer to Bachelor of Science majoring in Marine Biology on page 53.	Career options are the same as Bachelor of Science in Marine Biology on page 53.

FT = Full time / PT = Part time

For more career options visit www.science.uts.edu.au

COMBINED DEGREES AND MAJORS: See the ATAR pull-out at the front of this guide for a list of majors and combined degrees with Science.

A PRACTICAL UNI EXPERIENCE

Want a degree that's practice-oriented? Here are just some of the options available to you when you study with UTS:Science.

- > Exposure to laboratory or clinical work from day one of your study, with approximately 20 contact hours each week.
- > Mathematics students are exposed to mathematical software and analytical tools, with approximately 16 contact hours each week.
- > Field trips and industry excursions are central features of UTS: Science programs, offered to enrolled students in subjects such as Complex Forensic Cases, Bioreactors and Bioprocessing, Marine Geosciences, and Environmental Protection.
- > Internships and research projects with partners such as ANSTO, CSIRO, and NSW Police are available to suitably qualified students.

Samantha Goyen

FIELD TRIPS

Students who study environmental related courses at UTS take part in a number of compulsory field trips as a part of their degree. These trips teach students how to undertake effective practical work and conduct experimental procedures outside of the lab. Field trips range from day trips in the Sydney area to week long visits to Heron Island, One Tree Island and other locations throughout the Great Barrier Reef.

"The field trips are invaluable for developing skills. While on a field trip we work in teams to design experiments and acquire the equipment needed before conducting the experiment and processing the results. The trips also provide you with an understanding of the pressures associated with fieldwork, such as time, weather and money.

"Learning how to use the equipment is essential for Environmental Studies' students. These trips gave me the opportunity to use on-site equipment I had never used before and familiarise myself with software and tools that research scientists use every day.

"My favourite trips were definitely One Tree Island and Heron Island because we were able to stay at the research stations and conduct our own experiments. One Tree Island is a remote, pristine island near Heron and the only thing on the island is the research station – so not many people get to go there. We all felt like we were on this exciting adventure!"

**Samantha Goyen, Bachelor of Science (Marine Biology),
Bachelor of Arts in International Studies**

Samantha and environmental science students at One Tree Island on a field exploration

CAREERS IN SCIENCE

Roland Wong

CAREER OPTIONS INCLUDE:

- > Forensic scientist
- > Researcher
- > Stock market analyst
- > Chemist
- > Crime forensic toxicologist
- > Marine biologist
- > Energy technologist
- > Environmental analyst
- > Conservation consultant
- > Pathologist

DID YOU KNOW?

- > In 2014, UTS Science will have another new state of the art building to accommodate growing student numbers and research. See page 4 to find out more.
- > Science or mathematics degrees give you the flexibility to get into a variety of careers, be it in science and technology, business and finance, or even journalism.
- > UTS Science awards over 80 scholarships each year. Visit www.science.uts.edu.au/scholarships

CAREER SNAPSHOT

RADIOCHEMIST

I completed a Bachelor of Science in Applied Chemistry degree.

A typical career path for someone with my qualifications would be to work as a chemist, molecular scientist, environmental chemist, regulatory toxicologist, and even food and wine producer. There's such a variety of industries that require people with a chemistry background and knowledge.

In my role as a radiochemist, my area of expertise is in gamma radiation – its interaction with matter and its monitoring. In a nutshell, I profile radioactive waste for a living. My team is responsible for ensuring that only non-radioactive waste leaves ANSTO for disposal. We profile the waste and separate the radioactive and non-radioactive elements. This way, we minimise the radioactive waste to be disposed. I'd say we're similar to 'border security' – protecting the environment and community!

I've also worked in environmental monitoring where I analysed samples for volatile organic compound; in the food and beverage industry at Coca Cola in quality assurance labs; and as an aerosol quality control chemist for the company that makes Mortein fly spray. All this and I've yet to try the pharmaceutical, military, forensic, medical or regulatory affairs industry!

Roland Wong, Radiochemist, Waste Operations Group, ANSTO (Australian Nuclear Science and Technology Organisation)
Bachelor of Science in Applied Chemistry

GLOSSARY

ASSUMED KNOWLEDGE

Knowledge that we recommend you have in order to undertake a specific course.

BACHELOR'S DEGREE

This is the most common undergraduate degree. It combines numerous subjects but must have core subjects and a major.

BONUS POINTS

A type of entry scheme, where students can gain points in addition to their ATAR, boosting their application for entry. The term 'bonus points' can be used for a variety of different schemes across universities. At UTS, the term is often used in reference to the Year 12 Bonus Scheme. See page 58.

CENSUS DATE

The last day to withdraw from a subject without incurring financial penalty. There are two census dates during the year, one for each semester of study. See page 68 for important dates at UTS.

COMBINED DEGREES

Often referred to as a 'double degree', this allows students to study two programs from different academic areas at the same time and graduate with two degrees. See the ATAR pull-out at the front of this guide for a list of combined degrees.

CORE SUBJECTS

Compulsory subjects within a degree. Students must successfully complete all their core subjects in order to graduate.

CREDIT POINTS

It's like a points system. Each subject is worth a certain number of credit points based on the amount of work required. You need to finish a required amount of credit points to graduate.

CREDIT RECOGNITION

If you have undertaken previous studies, you may be eligible to apply for credit recognition. This means that subjects you have studied previously will be recognised and you won't have to repeat them. Formerly known as advanced standing or recognition of prior learning.

ELECTIVES

As well as the core subjects required by each course, students usually have to choose several additional subjects to help them accumulate enough credit points to graduate. These are called electives.

ENTRY PATHWAY

Your ATAR isn't the only way to get accepted into uni. If your marks aren't high enough or you aren't a recent school leaver, you have other options including TAFE or UTS: INSEARCH. See page 60.

ENTRY SCHEME

An entry scheme allows students to boost their application into UTS by using additional criteria, rather than solely their ATAR. See page 58.

FACULTIES

The departments your university is split in to, i.e. Law or Science. UTS has seven faculties.

HIGH SCHOOL LEAVER

If you're currently completing Year 12 at school or TAFE and have not been enrolled in tertiary education, you are a high school leaver. See page 66 for information on how to apply.

HONOURS

A one-year extension of the bachelor's degree which means you graduate with more specific knowledge about your chosen area.

INTERNSHIP

Practical placements for students while they study. Internships allow students to experience their desired industry and apply the theory learnt during their degree.

LECTURES

Large classes where students are presented with information, which is later discussed in smaller groups called tutorials.

MAJOR

This is the area you choose to specialise in during your studies.

MATURE AGED STUDENT

If you're 20 years of age or older and meet the definition of a non-current school leaver, you are considered a mature age student. See page 66 for information on how to apply.

NON-CURRENT SCHOOL LEAVER

If you are not completing year 12 at school or TAFE, and/or have been previously enrolled in tertiary education, you are a non-current school leaver.

SEMESTERS

The UTS university year is split into two semesters – Autumn (semester 1) and Spring (semester 2). University semesters are usually four months long. See page 68 for important UTS semester dates.

SUB-MAJOR

Your course must have a major, but you can also sometimes choose to have a sub-major. You won't study it as in-depth as your major, but it will give your degree an added dimension.

TUTORIALS

These classes are small and give you the chance to discuss ideas presented in the lectures with your tutor and other students.

UNDERGRADUATE

A student who is undertaking their first university degree. Common undergraduate degrees include bachelor's degrees and diplomas.

ENTRY SCHEMES

www.undergraduate.uts.edu.au/entryschemes

UTS offers numerous entry schemes to help improve your chances of getting into the course you want. Entry schemes consider other criteria in addition to an ATAR when assessing an application. Criteria include outstanding achievement in relevant HSC subjects, as well as disadvantageous circumstances affecting high school students and non-current school leavers.

ENTRY SCHEME	CRITERIA	DESCRIPTION
YEAR 12 BONUS SCHEME	Academic performance in HSC subjects	If you're a high school student, you may be awarded up to 5 bonus points under the Year 12 Bonus Scheme, if you do well in subjects relevant to the UTS course you wish to study. These points are automatically added to your UAC* application, if the UTS course in your preference list is considered.
INPUTS EDUCATIONAL ACCESS SCHEME	Educational disadvantage	If you're a high school leaver or non-current school leaver applicant whose studies has been affected by disadvantageous circumstances, you may be eligible for a 10 point concession off the ATAR cut-off. To be eligible, students need to achieve a minimum ATAR mark of 69 and submit an Educational Access Scheme (EAS) application form through UAC*.
GUARANTEED ENTRY SCHEME	Academic performance in HSC	If you achieve the guaranteed ATAR cut-off published in the 2014 UAC* Guide, which includes any bonus points you may be eligible for, and don't receive an offer to a higher preference, UTS will guarantee you a place. Students do not need to apply for the Guaranteed Entry Scheme, they are automatically assessed when ATARs are released. For more information check out the cut-offs in the 2014 UAC* Guide.
NATIONAL PARTNERSHIP PROGRAM & OTHER SCHOOL PROGRAMS	Educational disadvantage	If you're completing your senior studies in a school currently identified under a national partnership program or any other school program referred to in the Educational Access Scheme application, and you meet the minimum ATAR mark of 69, you are automatically eligible to receive a 10 point concession on your ATAR when your application for entry into a UTS course is considered.
PRINCIPALS' RECOMMENDATION SCHEME	Educational disadvantage and academic potential	If you're a high school student who is eligible for financial hardship under the inpUTS Educational Access Scheme and your high school principal nominates you for this scheme, you may be offered a place in the course of your choice.

ENTRY SCHEME	CRITERIA	DESCRIPTION
ELITE ATHLETES OR PERFORMERS SPECIAL ADMISSIONS SCHEME	Educational disadvantage	If you've competed in sport at a national level, or have been involved in extensive or significant productions in Australia or overseas, then you may be eligible to receive 5 bonus points if these commitments have had an impact on your senior studies. Applicants must lodge their application direct to UTS by 31 October 2013.
JUMBUNNA DIRECT ENTRY PROGRAM	Aboriginal or Torres Strait Islander status and academic testing performance	If you identify as an Australian Aboriginal or Torres Strait Islander, the Jumbunna Indigenous House of Learning will provide specialised assistance to help you gain entry into UTS. You will have the opportunity to illustrate your capacity for higher education via a testing, assessment and interview program. You do not need an ATAR to apply.
BACHELOR OF BUSINESS CADETSHIP BONUS POINTS	Attaining a cadetship prior to commencement of UTS degree	If you want to study a Bachelor of Business at UTS (City campus), and have received a formal cadetship offer, you may be eligible for five bonus points to help your application. To apply, you will need to send a certified copy of your cadetship letter and your UAC* application number to the UTS Business School by the end of November 2013.
ENGINEERING BONUS SCHEME QUESTIONNAIRE	Academic performance and commitment to a study area	If you want to study any of the Bachelor of Engineering, Diploma in Engineering Practice courses at UTS, you may be able to receive additional bonus points by completing the Engineering Bonus Scheme Questionnaire.

*UAC: Universities Admissions Centre www.uac.edu.au

ENTRY PATHWAYS

www.undergraduate.uts.edu.au/pathways

Didn't get the ATAR for the course you want? You have options.

First, see if you're eligible for any of the UTS Entry Schemes on page 58. Next, consider the following:

ENROL IN A RELATED UTS COURSE

Find a UTS course similar to the course you want but with a lower ATAR. You then have the following options:

> Use your electives

Electives allow you to take subjects that interest you, from almost any area of study.

> Transfer after a year

The marks you earn will be considered, in addition to your ATAR, if you apply for your preferred course after completing one full-time year of university.

Transferring is a competitive process, so achieving good marks during your first year is essential.

Similarly, if you would like to study a combined degree and don't achieve the marks, you might consider commencing the single degree, and then applying to transfer into the combined degree at the end of your first year.

> Combine your degree

If you don't meet the ATAR cut-off for your first preference, choose a combined course with a lower ATAR cut-off requirement.

For example, the combined Business and Science degree requires a lower ATAR than the single Business degree. In choosing this option you'll graduate with two degrees, increasing your career options.

ENROL IN RELATED STUDY OR GET SOME WORK EXPERIENCE

> Related university study

Enrol in a similar course at another university with a lower ATAR. Marks you earn during your first year of study will be considered, in addition to your ATAR, when you apply to transfer to your preferred UTS course. Application to transfer from another university is highly competitive, so achieving good marks in your first year is essential.

> TAFE or private college diploma

Completing an Australian Qualifications Framework Diploma at TAFE or a private college (and achieving good marks) will help your application into the majority of UTS bachelor degrees and exempt you from certain subjects.

> Retake your HSC at TAFE

TAFE offers you the opportunity to complete your HSC in one year.

> UTS:INSEARCH

Study at UTS:INSEARCH academic pathway programs can facilitate entry to UTS. See page 61 for more information.

> Work experience

Taking a year or two off to gain industry experience could be a good option if you're unsure about what you want to study, or didn't achieve the ATAR you need for your preferred course straight from school. When you apply as a non-current school leaver, work experience can count towards your application for some UTS courses that consider personal statements, design portfolios and employment letters. See additional selection criteria for non-current school leavers on page 66.

Jumbunna UNISTART Program

UNISTART is designed for Aboriginal and Torres Strait Islander people wishing to gain entry into a university degree. You will engage in faculty-based elective subjects that gain you credit towards your degree of choice and study UNISTART core subjects with a group of Indigenous people who have similar experiences and ambitions as you. Upon successful completion of UNISTART, you can enter the UTS undergraduate course of your choice. Applications close December 31 2013. Visit www.jumbunna.uts.edu.au

UTS:INSEARCH

www.insearch.edu.au

WHAT IS UTS:INSEARCH?

UTS:INSEARCH is the premium pathway provider to UTS. UTS:INSEARCH offers a range of diploma courses, and on behalf of UTS, UTS Foundation Studies. UTS:INSEARCH diplomas provide students with direct entry into corresponding undergraduate degrees at UTS. In fact, depending on what course they choose, students are able to fast track into the second year of a UTS undergraduate degree upon the successful completion of their diploma with the required grade point average (GPA).

WHY CHOOSE UTS:INSEARCH?

- > 95% of new diploma students at the end of 2011 were eligible to articulate to UTS
- > courses are designed in collaboration with the corresponding UTS faculties. This means that the educational outcomes for students undertaking UTS:INSEARCH diplomas are for most courses, equivalent to those of first year students undertaking an undergraduate degree at UTS
- > small class sizes to maximise learning outcomes with a maximum of 20 students
- > access to dedicated academic advisers, one-on-one learning assistance tutorials and study skills workshops
- > students will benefit from state-of-the-art facilities in a newly renovated campus and access to UTS facilities
- > highly qualified, industry-experienced teaching staff
- > access to over 100 sports and student social clubs
- > convenient, central Sydney city location and right next to the UTS City campus

UTS:INSEARCH PATHWAYS TO UTS

Year 12

Min ATAR of 62-70
(Bonus points may apply)

UTS:INSEARCH
Diploma
(8 or 12 months)

UTS 2nd Year

UTS Bachelor's degree (depending on which course you choose)

Year 11/12

Successful completion of Year 11 with superior grades (Bonus points may apply)

UTS:INSEARCH
Foundation Studies*
(8 months)

UTS:INSEARCH
Diploma
(8 or 12 months)

UTS 2nd Year

UTS Bachelor's degree (depending on which course you choose)

WHAT COURSES DOES UTS:INSEARCH OFFER?

UTS:INSEARCH diplomas

Offered in the following study areas:

- > Business
- > Communication (Public Relations)
- > Design (Visual Communication)
- > Engineering
- > Information Technology
- > Science

Diplomas vary in length from 12 months for Standard Diplomas to 8 months for Accelerated Diplomas.

Depending on the course chosen, students can fast track into the second year of a UTS Bachelor degree provided they successfully complete the diploma with the required GPA.

UTS Foundation Studies

Offered by UTS:INSEARCH on behalf of UTS. This course has been designed specifically to prepare students for university study. Students can choose from:

- > Arts and Social Sciences
- > Business
- > Design and Architecture
- > Nursing and Health Sciences
- > Information Technology
- > Physical Sciences (including Engineering)

The course is offered as an accelerated program over 8 months.

UTS Foundation Studies provides students with a pathway to UTS:INSEARCH diplomas provided they meet the academic admission requirements. Entry into the first year of an undergraduate degree at UTS may be possible for students who obtain exceptional results.

UTS Foundation Studies (Accelerated):
CRICOS course code: 068815K
UTS course code: C30015

FEE-HELP

FEE-HELP is available for eligible UTS:INSEARCH students. Study now – pay later. Conditions apply.

Visit www.studyassist.gov.au

FOR MORE INFORMATION

The UTS:INSEARCH website contains detailed information about all UTS:INSEARCH pathway programs to UTS, entry requirements and application procedures for students. Visit www.insearch.edu.au

Tel: 1800 896 994 (within Australia)

Email: courses@insearch.edu.au

CRICOS CODES

INSEARCH CRICOS provider code: 00859D

*Depending on which course you choose. Subject to the successful completion of your diploma with the required GPA. For all details on entry requirements, articulation and credit points please visit www.insearch.edu.au.

UTS: SCHOLARSHIPS

www.undergraduate.uts.edu.au/scholarships

SCHOLARSHIP NAME	DESCRIPTION	COURSE AREA
FOR HIGH ACHIEVERS		
VICE-CHANCELLOR'S OUTSTANDING ACHIEVEMENT SCHOLARSHIP Value: \$12,500 per annum Duration: Length of course	Awarded to top school leavers (in previous years, an ATAR of 99.5 or above) commencing in any UTS undergraduate degree. This scholarship also includes an honours year if chosen.	University-wide
BUSINESS DEAN'S SCHOLARSHIP Value: \$30,000 Duration: 3 years	Awarded to top (ATAR of 99.5 or above) school leavers commencing a UTS Bachelor of Business degree (single degree).	Business
HANSEN YUNCKEN NSW CONSTRUCTION SCHOLARSHIP Value: \$10,000 Duration: 1 year	Awarded to a commencing student in the UTS Bachelor of Construction Project Management course, who has undertaken, partial or completed studies at TAFE or a Trade Apprenticeship in the field of Building, Carpentry or Construction related studies, in the past two years.	Design, Architecture & Building
TOSHIBA'S ALLAN ROGERS MEMORIAL SCHOLARSHIP Value: \$73,000 Duration: 5 years	Awarded to a high achieving (ATAR of 90 or above) school leaver commencing the Bachelor of Engineering (Electrical, Mechanical or Mechanical and Mechatronics majors), Diploma in Engineering Practice. Recipients complete two 6-month internships with Toshiba International Corporation (TIC).	Engineering
ALSTOM ENGINEERING SCHOLARSHIP Value: \$62,000 Duration: 5 years	Awarded to a high achieving school leaver commencing the Bachelor of Engineering (Mechanical Engineering), Diploma in Engineering Practice degree, who has the personal potential and commitment to study mechanical engineering. Applicants need to demonstrate involvement in extra-curricular activities, interest in mechanical engineering, leadership potential and effective communication skills.	Engineering
NURSING, MIDWIFERY & HEALTH HECS SCHOLARSHIP Value: Tuition fees Duration: 1 year	Awarded to the top school leaver commencing the Bachelor of Nursing or the Bachelor of Nursing, Bachelor of Arts in International Studies with the highest ATAR. Tuition fee costs are covered for the final year of study.	Health
COLIN BIGGERS & PAISLEY MERIT SCHOLARSHIP Value: \$5,000 Duration: 1 year	Awarded to a high achieving (ATAR of 99 or above) school leaver commencing a single or combined Bachelor of Laws degree.	Law
LAW ALUMNI FOUNDATION OUTSTANDING ACHIEVEMENT SCHOLARSHIP Value: \$10,000 Duration: 1 year	Awarded to a high achieving (ATAR of 99.5 or above) school leaver commencing a combined Bachelor of Laws degree.	Law
UTS:SCIENCE DEAN'S SCHOLARSHIP Value: \$10,000 Duration: 1 year	Awarded to top (ATAR of 99.5 or above) school leaver entrants to a UTS:Science undergraduate degree.	Science
UTS:SCIENCE SCHOOL'S RECOMMENDATION SCHOLARSHIP Value: \$6,000 Duration: 3 years	Awarded to commencing school leavers with a keen interest in science and mathematics, who are nominated by their school principal, and have received an offer.	Science
UTS:SCIENCE HIGH ACHIEVERS SCHOLARSHIP PROGRAM Value: \$6,000 Duration: 3 years	Awarded to outstanding (ATAR of 95 or above) school leavers commencing one of the specified science degrees (see UTS website for full list of eligible courses).	Science

SCHOLARSHIP NAME	DESCRIPTION	COURSE AREA
CO-OPERATIVE SCHOLARSHIPS		
BACHELOR OF ACCOUNTING CO-OPERATIVE SCHOLARSHIP PROGRAM Value: Up to \$46,500 Duration: 3 years	All students in the Bachelor of Accounting program receive a generous scholarship per year for 3 years. Students also complete two six-month industry placements with two separate sponsoring organisations. In addition, all students who are recruited by a sponsor organisation in their final year of study will receive a Recruitment Incentive bonus for the second half of the final year.	Business
ENGINEERING CO-OPERATIVE SCHOLARSHIP Value: \$14,000 Duration: 1 year	Scholarships are awarded each year across all disciplines by UTS: Engineering in conjunction with industry partners to outstanding school leavers. Sponsor organisations may also invite the recipient (or other top performers) to participate in a second-year or fourth year scholarship program.	Engineering
BACHELOR OF INFORMATION TECHNOLOGY CO-OPERATIVE SCHOLARSHIP PROGRAM Value: \$46,500 Duration: 3 years	All students in the Bachelor of Information Technology degree receive a generous scholarship per year for 3 years, as well as two six-month industry placements with two separate sponsoring organisations. This degree is recognised by the Australian Computing Society and to date graduates have a 100 per cent employment rate.	Information Technology
ON A LOW INCOME*		
VICE CHANCELLOR'S MERIT SCHOLARSHIP Value: \$12,500 per annum Duration: Length of course	Awarded to high achieving (ATAR of above 90) school leavers with demonstrated financial need. This scholarship also includes an honours year if chosen.	University-wide
DIVERSITY ACCESS SCHOLARSHIP Value: between \$600 and \$2,500 Duration: 1 semester	UTS supports hundreds of students each semester who require financial assistance to start or stay at university. This semester based scholarship is worth between \$600 and \$2,500 (depending on assessment).	University-wide
LINDEN LITTLE ENGINEERING EQUITY SCHOLARSHIP Value: \$28,000 Duration: 2 years	Awarded to a school leaver with demonstrated financial hardship commencing the Bachelor of Engineering, Diploma in Engineering Practice.	Engineering
WJ AND LM SINCLAIR SCHOLARSHIP IN ENGINEERING Value: \$100,000 Duration: 5 years	Awarded to a school leaver or mature-aged entrant with demonstrated financial need, commencing an undergraduate UTS: Engineering degree with an ATAR (or equivalent) of 80 or above.	Engineering
FACULTY OF LAW EQUITY SCHOLARSHIP Value: \$20,000 Duration: 4 years	Awarded to a commencing student in the Bachelor of Laws single or combined degree, who demonstrates a high level of financial need or other disadvantage.	Law
EZEKIEL SOLOMON SCHOLARSHIP Value: \$5,000 Duration: 1 year	Awarded to a commencing or continuing student in the Bachelor of Laws single or combined degree, with demonstrated financial hardship.	Law
FOR WOMEN		
WOMEN IN ENGINEERING SCHOLARSHIP* Value: \$14,000 Duration: 1 year	Awarded to a commencing female student with demonstrated financial need in the Bachelor of Engineering, Diploma in Engineering Practice or a combined Engineering degree with an ATAR of 80 or above.	Engineering

*An Equity-based scholarship that requires applicants to demonstrate financial need through a UAC Equity Scholarship application.

UTS: SCHOLARSHIPS CONTINUED...

SCHOLARSHIP NAME	DESCRIPTION	COURSE AREA
FOR INDIGENOUS AUSTRALIANS		
VICE-CHANCELLOR'S UNDERGRADUATE INDIGENOUS TUITION FEE SCHOLARSHIP Value: Tuition fees Duration: Length of course	Awarded to high achieving Australian Aboriginal and Torres Strait Islander school leavers (based on secondary school results). Tuition fee costs are covered for the duration of an undergraduate degree.	University-wide
FACULTY OF ENGINEERING AND INFORMATION TECHNOLOGY ABORIGINAL AND TORRES STRAIT ISLANDER SCHOLARSHIP Value: \$5,000 per annum Duration: 4 or 5 years (course dependent)	Awarded to a school leaver or mature-aged entrant of Australian Aboriginal and Torres Strait Islander descent, commencing a degree in Engineering or IT.	Engineering & Information Technology
UTS: SCIENCE INDIGENOUS SCHOLARSHIP Value: \$6,000 Duration: 3 years	Awarded to outstanding Indigenous Australian applicants commencing a UTS: Science undergraduate degree.	Science
COMMONWEALTH SCHOLARSHIPS	Indigenous Commonwealth Scholarships assist full-time Indigenous Australian students from low income backgrounds with financial support to cover the costs associated with higher education.	University-wide
FOR ATHLETES		
ELITE ATHLETE PROGRAM Value: Up to \$3,000 Duration: Length of course	Up to \$3,000 awarded to commencing or continuing students in any UTS course, depending on performance level. Free use of UTS Fitness Centre and Consultation and Programming services. Subsidised fees when competing for UTS in university sporting competitions. Assistance with academic matters.	University-wide
EMERGING ATHLETE PROGRAM Value: Competition entry fee grant Duration: Length of course	Awarded to commencing or continuing students in any UTS course. A grant towards each University Games competed in annually. Free use of UTS Fitness Centre. Assistance with academic matters.	University-wide
For more information visit www.utsunion.uts.edu.au/sports/scholarships		

Centrelink Scholarships

Student Start-Up Scholarships and Relocation Scholarships are automatically paid to eligible students by Centrelink. For more information visit www.humanservices.gov.au

For current students

In addition to the above for future students scholarships, UTS offers a wide range of scholarships for current students that you can apply for once you have commenced studying at UTS.

www.sau.uts.edu.au/scholarships

For more information

Tel: (02) 9514 2527

Email: scholarships@uts.edu.au
www.undergraduate.uts.edu.au/scholarships

Closing Dates

Some applications close as early as June 2013. Please ensure you check the UTS scholarship website for specific closing dates at www.undergraduate.uts.edu.au/scholarships

FEES & FINANCIAL ASSISTANCE

www.fees.uts.edu.au

UNI FEES

All universities charge tuition fees depending on what course you're studying and the subjects you choose.

LOCAL STUDENTS

Most local students will be studying in a Commonwealth supported place (CSP), where the Australian Government makes a contribution to the cost of your study while you pay a student contribution.

> Student contributions

Student contributions are calculated per subject. Subjects are split into three bands: Band 1, Band 2 and Band 3, each band varying in cost. See the table below as a guide to the cost of your student contribution.

> HECS-HELP

Most domestic students pay their student contribution through the HECS-HELP scheme. This means the government loans you the money to pay your student contribution, which is paid directly to the university. You will start repaying your HECS-HELP loan when your income gets above a certain amount. For the 2012-2013 tax year, the repayment threshold is \$49,095.

The loan repayments can be automatically deducted from your wages if you choose, just like tax. If you don't want to incur a HECS-HELP debt, pay your student contribution upfront by the due date and receive a 10 per cent discount. Please note only Australian citizens or students on humanitarian visas are eligible for HECS-HELP. If you're a New Zealand citizen or on a permanent resident visa, you must pay your fees upfront and are not entitled to any discount. For more information visit www.studyassist.gov.au

> Student Services and Amenities Fee

This fee funds UTS social and cultural clubs, services for developing students' study skills, UTS Union food, beverage and retail outlets (including a 10 per cent discount), the free legal services centre for students, and the second-hand bookstore. If you're an Australian citizen or on a humanitarian visa, this fee may be deferred through a new government loan scheme called SA-HELP.

INTERNATIONAL STUDENTS

Please note this guide is not intended for international students.

For information on fees for international students visit

www.uts.edu.au/international

UTS FINANCIAL ASSISTANCE

The UTS Financial Assistance service can assist with practical and financial aspects of life at university and advise on the options available to you. They also offer one-off student loans for financial emergencies. Loans are generally for a maximum amount of \$500 and are interest free. There's also a range of financial assistance programs for local students who demonstrate financial need. Visit www.ssu.uts.edu.au/fassist

GOVERNMENT INCOME SUPPORT

Australian citizens and permanent residents may be eligible for a Centrelink benefit. Visit www.humanservices.gov.au

STUDENT CONTRIBUTION BANDS 2013

BAND		STUDENT CONTRIBUTION (per EFTSL*)
Band 1	Humanities, behavioural science, social studies, foreign languages, visual and performing arts, education, nursing	\$5,868
Band 2	Computing, built environment, health, engineering, surveying, agriculture, mathematics, statistics, science	\$8,363
Band 3	Law, dentistry, medicine, veterinary science, accounting, administration, economics, commerce	\$9,792

*EFTSL: Equivalent Full Time Student Load. One EFTSL is a measure of the study load for a year of a student undertaking a course of study on a full time basis. For example, a three year degree equates to three EFTSL.

APPLYING TO UTS

www.undergraduate.uts.edu.au/apply

STEP 1: FIND A COURSE

Check out the course information pages of this guide (pages 16 – 56), as well as the UTS website www.uts.edu.au

HIGH SCHOOL LEAVERS' SCHOLARSHIPS

The two courses below are co-operative scholarship courses with selection based on a combination of an ATAR and an online form.

- > Bachelor of Accounting.
For admission requirements see www.business.uts.edu.au/bofacc
- > Bachelor of Information Technology.
For admission requirements see www.it.uts.edu.au/courses/scholarships/bit

STEP 2: CHECK OUT YOUR ENTRY REQUIREMENTS

HIGH SCHOOL LEAVERS:

If you complete your HSC (or equivalent) in 2013, selection for most UTS undergraduate courses will be based entirely on your ATAR. As a guide, use the 2013 ATAR cut-offs at the front of this guide.

MATURE AGED AND NON-CURRENT SCHOOL LEAVERS:

If you are not a high school leaver, your ATAR or post-school courses may be considered along with additional selection criteria:

- > Personal statements (Leisure, Sport & Tourism, Health and Science)
- > Design portfolio (all Design courses, excluding the Bachelor of Design in Architecture)
- > Minimum 1 year work experience (courses within the faculty of Engineering and IT)

INDIGENOUS STUDENTS

If you're an Australian Aboriginal or Torres Strait Islander, Jumbunna Indigenous House of Learning can provide specialised assistance to help you gain entry to UTS through the Direct Entry (see page 59) or UNISTART Programs (see page 60).

Tel: 1800 064 312 (free call within Australia)
www.jumbunna.uts.edu.au

INTERNATIONAL STUDENTS

Please note this guide is not intended for international students and not all courses are available to international students. Course information for international students is available in the relevant UTS: International Course Guide, and online at www.uts.edu.au/international

Applicants who are not citizens or permanent residents of Australia, or citizens of New Zealand, must apply as international students directly through UTS:International.

Tel: 1800 774 816 (free call within Australia)
Tel: +61 3 9627 4816 (for international calls)
www.uts.edu.au/international

STEP 3: VISIT UTS AND INVESTIGATE YOUR OPTIONS

ATTEND UTS OPEN DAY

When? City campus, 31 August 2013;
Kuring-gai campus, 7 September 2013

Visit our campuses and attend a range of lectures, info sessions and talk one-on-one with academics and current uni students.

www.undergraduate.uts.edu.au/events

CHECK IF YOU'RE ELIGIBLE FOR SCHOLARSHIPS

When? Scholarships open as early as June 2013.

See if you're eligible for one of the many available scholarships at www.undergraduate.uts.edu.au/scholarships

INVESTIGATE YOUR ELIGIBILITY FOR ENTRY VIA ENTRY SCHEMES

UTS offers various entry schemes to assist students with getting into university. See page 58 for a list of schemes.

UTS Open Day

STEP 4: **APPLY THROUGH UAC**

When? On-time applications close 27 September 2013*.

Applications for most UTS undergraduate courses must be lodged online through UAC at www.uac.edu.au

All the information you need on how to do this is in the UAC Guide – on sale in most newsagents or accessible on the UAC website. Year 12 students can obtain a free copy of the guide from their school.

If the course you're applying for has additional selection criteria, you may need to submit the relevant material to UTS, in addition to your application with UAC. Check out the UTS:Handbook for specific course application details.

www.handbook.uts.edu.au

STEP 5: **REVIEW YOUR OPTIONS ONCE YOU RECEIVE YOUR RESULTS**

CHECK IF YOU'RE ELIGIBLE FOR BONUS POINTS^

When? Once your HSC results are released on 18 December 2013#.

With your performance bands in hand, visit our bonus points table to see if you're eligible for up to 5 bonus points in addition to any points you may receive from one of our other entry schemes. www.undergraduate.uts.edu.au/bonuspoints

^For high school leavers only.

CHECK IF YOU'VE QUALIFIED FOR THE GUARANTEED ENTRY SCHEME^

When? Once your ATAR is released on 19 December 2013*.

Check whether you'll be guaranteed an offer to UTS with our Guaranteed Entry Scheme.

www.undergraduate.uts.edu.au/apply

^For high school leavers only.

ATTEND UTS INFO DAY

When? 3 January 2014

Visit the UTS City campus to talk with academics and students to discuss any final questions about applying to UTS.

www.undergraduate.uts.edu.au/events

STEP 6: **ACCEPT YOUR OFFER**

When? Main Round offers are e-released at 9pm on 16 January 2014 via UAC*.

A few days later, you will receive an official letter in the mail, containing information on accepting your offer and enrolling.

FOR MORE INFORMATION

Tel: 1300 ASK UTS

3 JANUARY 2014: UTS INFO DAY

CITY CAMPUS

This event is your last chance to meet with UTS lecturers and students on campus and gain information about our courses before applications close with UAC. It's also a great opportunity to learn about pathways to UTS in case you're worried about not getting into your preferred course.

APPLYING TO UTS

27 SEPTEMBER 2013: ON-TIME APPLICATIONS CLOSE WITH UAC*

On-time applications for UAC close today, so make sure you've submitted your application. If you don't get your application in today, you can still apply but late applicants will incur a late fee.

www.uac.edu.au

18 DECEMBER 2013: HSC RESULTS RELEASED

With your HSC marks on hand, you can check out the UTS Bonus Points table to see what bonus points you'll receive at UTS. www.undergraduate.uts.edu.au/bonuspoints

19 DECEMBER 2013: ATARS RELEASED*

Access your ATAR at www.uac.edu.au. Congratulations, we hope all your hard work has paid off. If you didn't receive the ATAR required for the course you'd like to study at UTS call 1300 ASK UTS to discuss your options. You can also check out UTS:INSEARCH for their range of pathways courses to UTS at www.insearch.edu.au

16 JANUARY 2014: MAIN ROUND OFFERS AVAILABLE*

Access your offer at www.uac.edu.au. Main Round University offers are released at 9pm. Visit the UAC website to access your offer. You'll also receive a letter a few days later confirming your offer, outlining the necessary steps for you to take to accept your offer and enrol at university.

ONCE YOU'RE IN...

If you receive an offer to study at UTS, keep the following dates in mind.
