

How to check if your address meets the socio-economic eligibility criteria

To find out whether your address is in an area that meets the socio-economic eligibility criteria for UniReady, follow the steps below using the official SEIFA interactive map.

UniReady defines low socio-economic status (SES) as being located in a Statistical Area Level 1 (SA1) that falls within the bottom two IRSAD SEIFA quintiles. This corresponds to SEIFA Quintile 1 or 2, or a SEIFA Percentile of 40 or below.

Step-by-step guide

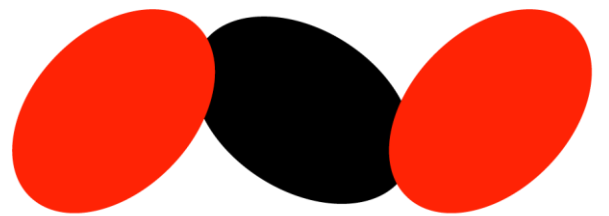

1. Open the SEIFA IRSAD interactive map [linked here](#).
2. At the top of the page, make sure the IRSAD tab is selected.
This shows data from the Index of Relative Socio-economic Advantage and Disadvantage.
3. On the left-hand panel, scroll down to the list of map layers.
 - Ensure only "Statistical Area Level 1 (SA1)" is turned on (eye icon should be visible).
 - Turn off all other layers (such as SA2, LGA, or POA).
4. In the search bar at the top right:
 - Click the dropdown menu icon (a list symbol).
 - Untick all options except "Address search".
5. Type your full address, including suburb and postcode, and select the correct option from the list.
6. The map will zoom to your area. Click anywhere within the coloured boundary surrounding your address.
7. A pop-up box will appear showing the SEIFA information for your SA1.
 - Look for the SEIFA Quintile or SEIFA Percentile.
 - If your area is in SEIFA Quintile 1 or 2, or the SEIFA Percentile is 40 or below, your address meets the socio-economic eligibility for UniReady.

Example

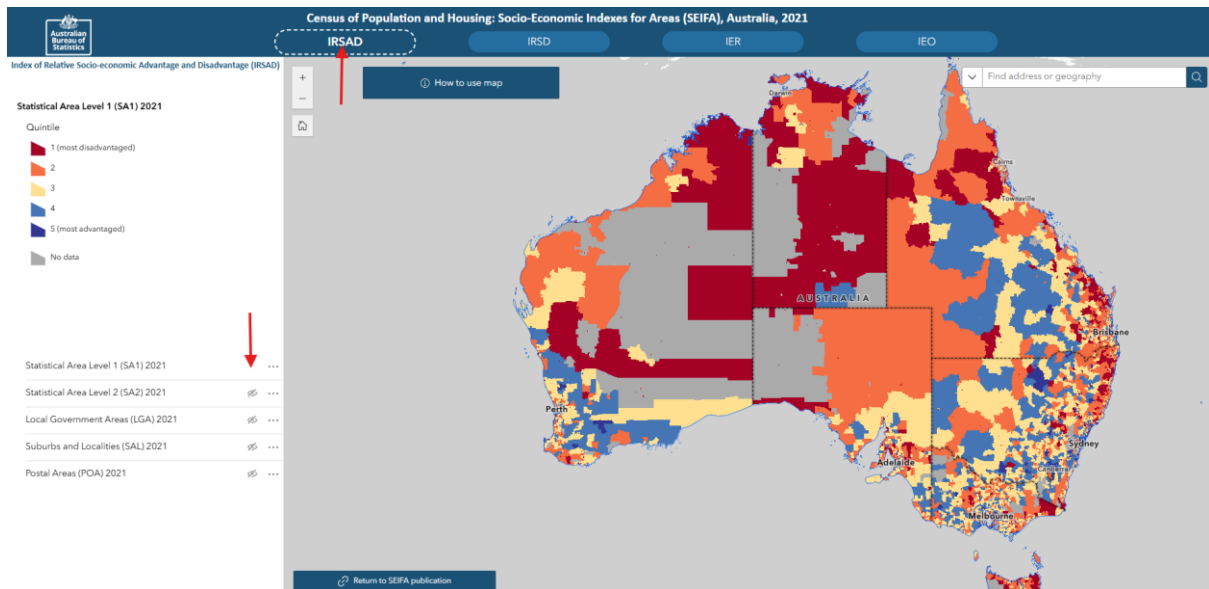

If you search for 150 Dobell Road, Claymore NSW 2559, the map will show a SEIFA Percentile of 1, which means the area is in the lowest quintile.

Note: This is a fictional address used for demonstration purposes only.
