WHO CC UTS Regional Update March 2023

Welcome to the Regional Update for March 2023 from the World Health Organization Collaborating Centre for Nursing, Midwifery and Health Development at the University of Technology Sydney (WHO CC UTS).

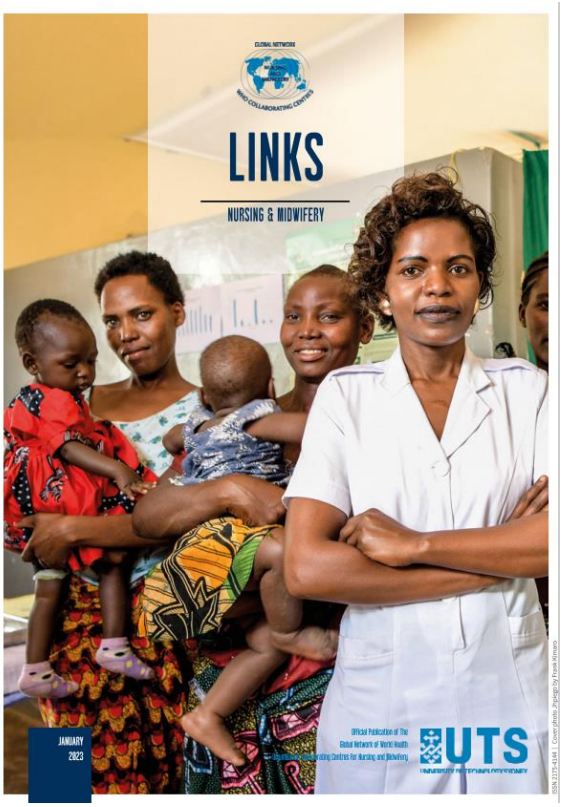
Colleagues within the Centre, from copywriters to graphic designers, have been incredibly busy drafting the latest edition of the Global Network of World Health Organization Collaborating Centres for Nursing and Midwifery (GNWHOCCNM) LINKS Magazine. The publication was released on 30 January and marked the first of what will be many during WHO CC UTS' 4 year tenure as Secretariat for GNWHOCCNM. The Centre would like to thank all regional and global contributors for their generosity in time and effort, and for their continuing work toward the global health workforce agenda.

Otherwise, the Centre has been continually strengthening working relationships with key local and regional partners. Director Prof. Michele Rumsey in a recent trip to the Australian Parliament connected with the Commonwealth Government regarding nursing and midwifery challenges in the Pacific.

This Update links to relevant publications and documents from WHO CC UTS - please also visit our website for current information. You can also reach us at whocc@uts.edu.au. For information on partner organisation, South Pacific Chief Nursing and Midwifery Officers' Alliance (SPCNMOA) click here.

GNWHOCCNM LINKS Magazine

Volume 1 2023



WHO CC UTS published Volume 1 of LINKS Magazine in 2023 as newly re-elected Secretariat of the Global Network of World Health Organization Collaborating Centres for Nursing and Midwifery (GNWHOCCNM). Historically, LINKS has been a platform for all 44 WHO nursing and midwifery collaborative centres to promote the outstanding projects they are undertaking. The magazine is integral in highlighting the commitment of Global Network members to creating positive, effective, and sustainable efforts within nursing and midwifery throughout regional and global communities.

For 35 years, GNWHOCCNM has worked tirelessly to support and uplift the nursing and midwifery community through research, education, and practice. Its focus has been to facilitate enabling environments for nurses and midwives to thrive and maximise their contributions to their communities. Between 2022 and 2026, a key aim of the Network will be to progress the WHO Strategic Directions for Nursing and Midwifery Policy Priorities 2021-2025: Education, Jobs, Leadership, and Service Delivery.

LINKS magazine is published bi-annually, and the next issue is due in September 2023.

To read the latest LINKS Magazine, click here.

Expert Consulation for Human Resoruces for Health

17-18 January 2023

During January 2023, the World Health Organization (WHO) Regional Office for the Western Pacific (WPRO) hosted an expert consultation to draft a renewed, regionally focused human resources for health (HRH) framework.

In the Western Pacific Region, past HRH developments have yielded positive results, including an increased number of health workers and emerging regulatory mechanisms. On the other hand, challenges ranging from ageing populations and increases in non-communicable diseases, to climate-based health emergencies and new modes and models of service delivery have stressed existing health workforce infrastructure. A revitalized framework, addressing emerging priorities through a primary care approach has been identified in the WPRO's working commitment to providing person-centred care and achieving Universal Health Coverage (UHC).

Therefore, the WHO Regional Office commenced developing a regional framework for strengthening HRH. This framework offers an opportunity to move beyond numbers and reshape health workforce fit for the future of the Western Pacific Region. The meeting brought together key regional experts to review the draft framework and provide technical input.

World Health Organization Appoints Dr. Amelia Latu Afuhaamango Tuipulotu as Chief Nursing Officer

14 December 2022

WHO CC UTS is pleased to celebrate the appointment of colleague and partner Dr Amelia Latu Afuhaamango Tuipulotu to the role of Chief Nursing Officer at the World Health Organization Headquarters. Prior to her appointment, Dr Amelia Latu was a member of the WHO Executive Board from 2020-2022. She was the first female Minster of Health of Tonga and first Tongan to receive a PhD in Nursing. Dr Tuipulotu has worked closely with WHO CC UTS, notably in her time as a Pacific Leadership Fellow and as Chair of the South Pacific Chief Nursing and Midwifery Officers Alliance (SPCNMOA). The Centre congratulates Dr Tuipulotu on her appointment and celebrates her ongoing commitment to regional and global nursing and midwifery leadership outcomes.

As WHO's Chief Nursing Officer, Dr Tuipulotu will champion, nurture and support nurses and midwives to ensure that their skills and experience are being well utilized to strengthen health systems and to bolster their critical role in bringing patients, communities and national health systems closer together.

We would additionally like to express sincere appreciation of Ms Elizabeth Iro's vast contributions to global nursing and midwifery leadership in her tenure as Chief Nurse. Ms Iro's advocacy in the investment of nursing and midwifery leadership persevered even during the Covid-19 pandemic, strengthening leadership capabilities, from the international institution level to regional policy and practice.

Ms Iro's succession marks the end of an efficacious tenure; her legacy is reflected in current and subsequent generations of nursing and midwifery leaders.

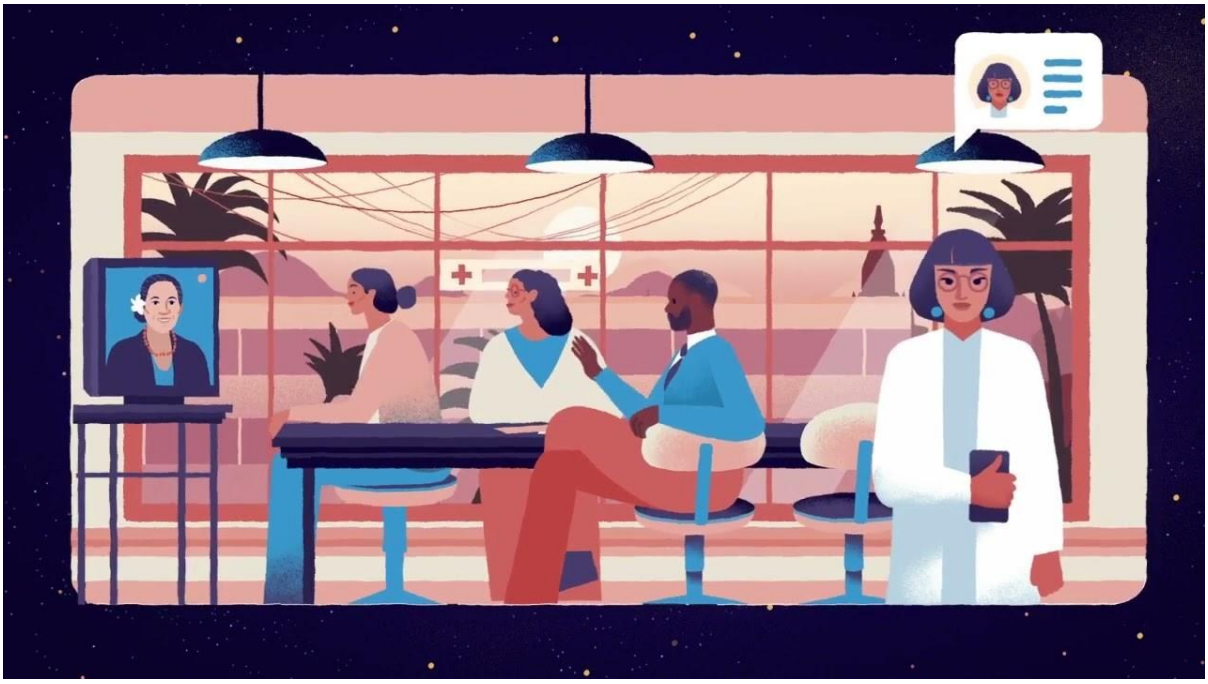
Join the Nursing and Midwifery Global Community of Practice



On International Nurses Day 12th May 2022, The WHO Chief Nursing Office officially launched the Nursing and Midwifery Global Community of Practice (NMGCoP). The NMGCoP is a network for Nurses and Midwives around the world to come together to share initiatives and experiences, and to learn from experts from the different fields that have an impact on the global health agenda.

This interactive platform will host live debates and discussions and provide opportunities for specialty groups to develop actions and activities with partners from all over the world.

Within the platform, the Global Network of World Health Organization Collaboration Centres for Nursing Midwifery (GNWHOCCNM) hosts an open group. Register to keep up with projects, resources and news items related to the

network.

For more information or to join this Community, please click here.
To access the GNWHOCCNM group within the COP, click here.

WHO Climate Change Conference

6-18 November 2022

The World Health Organization's Climate Change Conference of the Parties (COP) took place in Sharm el-Sheikh, Egypt and saw formalised commitments to providing financial aid to the most adversely affected countries.

COP27 brought together more than 45,000 participants to share ideas and solutions, and to build partnerships and coalitions. Indigenous peoples, local communities, cities and civil society, including youth and children, showcased how they are addressing climate change and shared how it impacts their lives.

The bloc has agreed to the creation of a dedicated loss-and-damage fund that will enable developing countries to access immediate financial aid in the event of climate catastrophe.

International Council of Nurses endorses WHO training programme on improving mental health

10 November 2022

World Health Organization's Quality Rights e-training programme on mental health, recovery and community inclusion has been endorsed by the International Council of Nurses (ICN) and meets the standard for accredited nursing continuing education points. The course, which is available in 11 languages, covers a full range of issues including taking care of one's own mental health, supporting friends, family and colleagues with their mental health, and tackling stigma, discrimination, abuse and coercion in mental health services.

ICN President Dr Pamela Cipriano said: "Training nurses to better support the mental health and wellbeing of the people they care for can make an enormous difference to individuals' quality of life. This targeted training programme is easy to access and members of the nursing family who complete it will also gain personal benefits from the lessons they learn. It is very timely because we know that nurses everywhere suffered distress during the pandemic. I encourage nurses everywhere to take the time to complete this programme for the good of their patients and for their own sakes."

WHO has an ambitious target for the global rollout of the Quality Rights e-training with the aim of training at least five million learners by the end of 2024, affecting the lives of 500 million people with mental health conditions or psychosocial disabilities.

Social Impact Grant

November 2022

In November, five colleagues from the Western Pacific region visited the WHO CC UTS for capacity building and upskilling workshops, supported by a UTS Social Impact Grant. The five colleagues- Julie Dopsie, Mary Kililo, Nina Joseph, Harriet Sam, and Russel Kitau - attended a Social Impact Monitoring and Evaluating (M&E) workshop, a workshop at the Health Education and Training Institute (HETI), the launch of the new secretariat of the Global Network of WHO Collaborating Centres for Nursing and Midwifery (GNWHOCCNM), the Australian College of Nursing's National Nursing Roadshow, a meeting with the Australian Health Practitioner Regulation Agency (Ahpra) as well as several sessions at WHO CC UTS to discuss health workforce planning and policy within their countries.

These workshops have provided our colleagues with invaluable capacity building and professional development skills that will enable them to implement health workforce planning and policy within their countries. We thank UTS for their ongoing support through the Social Impact Grant, and the significant skills and opportunities it provides to our colleagues.

To read more, please see our Brief documenting the Social Impact Grant here.

Secretariat Launch for the Global Network

17 November 2022

WHO CC UTS, in partnership with the South Pacific Chief Nursing and Midwifery Officers Alliance (SPCNMOA), held the 2022 Pacific Leadership Program (PLP). This is the 12th PLP coordinated by the WHO CC UTS.

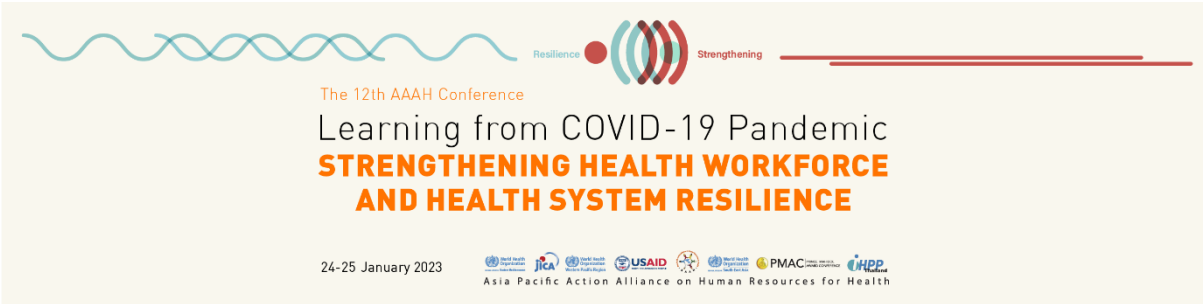
In the Pacific region, nurses and midwives make up approximately 74% of the regulated health workforce. However, they are underrepresented within leadership and policy forums across the region. The PLP was established to build leadership capacity within the Pacific by providing regional nursing and midwifery leaders with a skills-development program and exposure to expertise in policy development and implementation, human resources for health, data literacy and analysis, stakeholder analysis, and more.

The 2022 PLP was attended by 17 fellows and their mentors from the 6 participating Pacific Island countries: Nauru, Vanuatu, Samoa, the Solomon Islands, Tonga, and Tuvalu. It involved presentations from key regional leaders including Ms. Eriko Anzai (Nursing Officer) and Dr. Amelia Latu Afuha'amango Tu'ipulotu (WHO Consultant) from the WHO Regional Office for the Western Pacific (WPRO); Professors Angela Dawson and Kathleen Baird from UTS; and Ms. Ngatamariki Manea (CNO) from the Cook Islands. The PLP will continue for 12 weeks and will conclude in late November.

For more information on the program, please click here.

Fourth Regional Forum of WHO Collaborating Centres in the Pacific

28-29 November 2022



In 2005, AAAH, a regional partnership mechanism, was launched by 10 founding member countries in response to international recognition of the need for global and regional action to strengthen country capacity for human resource for health (HRH) planning and management. The AAAH is part of a larger movement to enhance HRH development as articulated in Kampala Declaration and the Agenda for Global Action.

AAAH coordinates with partners to strengthen joint efforts in advocating the HRH, provides technical support and augments country-level HRH development through regional collaboration. It aims to ensure sustained commitments addressing HRH needs through research and contribution to policy development.
Colleague of the Centre, Adjunct Professor James Buchan was a speaker/panellist at the 12th AAAH Conference which was held on 24-25 January 2023 in Bangkok, Thailand. He participated in the session "Health practitioner regulation and continuing profession education: drawing lessons in supporting pandemic responses".

For further details regarding the event, click here.

Adjunct Prof. James Buchan Speaks at the 12th Asia Pacific Action Alliance on Human Resources for Health Conference

14-25 January 2023

Working together to respond to the Region's current and future health challenges was a key focus of the Fourth Regional Forum of WHO Collaborating Centres in the Western Pacific.

Health experts from academic and other institutions across Asia and the Pacific

who gathered in Siem Reap, Cambodia and online acknowledged the progress that has been made in strengthening collaborative and strategic partnerships with WHO in recent years. Representatives from more than 120 WHO collaborating centres in the Region also recognised the need to harness more innovative, integrated and cross-cutting approaches to drive country-level impact in line with For the Future (FtF) – the vision for WHO's work with member states and partners in the Western Pacific Region.

The Forum culminated in a series of recommendations for WHO's work with collaborating centres over the coming years. This included strategic planning to best leverage the breadth of expertise, capacities, networks and resources of collaborating centres, to broaden their contributions to the priorities set out in the Region's *For the Future Vision*.

For further detail regarding both the Forum's agenda and deliverables, click here. To read more about the For the Future Vision, click here.

Launch: Inequality Monitoring in Sexual, Reproductive, Maternal, Newborn, Child and Adolescent Health eLearning course

9 March 2023

Inequities in sexual, reproductive, maternal, newborn, child and adolescent health (SRMNCAH) throughout the world mean that certain population subgroups have systematically worse health outcomes and poorer access to services and interventions than others. Addressing inequities in SRMNCAH is central to

achieving universal health coverage, protecting human rights, advancing gender equality, combating discrimination and improving the social determinants of health. Making progress in each of these areas is also vital to achieve WHO's Triple Billion targetsand accelerate towards the health-related Sustainable Development Goals (SDGs).

Regular monitoring and review of inequalities in SRMNCAH by stakeholders at regional, national and subnational levels is critical for evidence-based decision making. The results of this inequality monitoring can also be used as an input (alongside other forms of knowledge and evidence) to determine where efforts and resources are needed to improve health and well-being for disadvantaged subgroups.

An information webinar launched the new WHO eLearning course: Inequality Monitoring in Sexual, Reproductive, Maternal, Newborn, Child and Adolescent Health. The course introduces learners to a five-step approach to inequality monitoring in the context of SRMNCAH, preparing them to apply these steps across diverse contexts and settings. The two-hour, interactive eLearning course is delivered through Open WHO, which hosts free, self-paced online courses on a variety of health topics.

To access more information and registration, click here.

Upcoming Events

The 76th World Health Assembly

21-30 May 2023

The 76th World Health Assembly will take place in May 2023. The World Health Assembly is the WHO's decision-making body. Attended by delegations from all WHO member States, it focuses on a specific health agenda prepared by the Executive Board.

The main functions of the World Health Assembly are to determine the policies of the Organization, appoint the Director-General, supervise financial policies, and review and approve the proposed programme budget. The Health Assembly is held annually in Geneva, Switzerland.

The items on the WHA76 agenda will likely include Public Health Emergencies: preparedness and response (including health emergency in Ukraine), Implementation of International Health Regulations (2005), Prevention and Control of Non-Communicable Diseases (NCD), UNGA high-level meetings preparation for Universal Health Coverage resolution and declarations on NCD and Mental Health, Influenza Preparedness, Polio Eradication Transition, and WHO's sustainable financing.

The People's Health Movement is looking for young activists to join as Watchers at WHA in Geneva. If you or someone you know is keen on developing knowledge on the issues discussed at the meeting, and wants to be involved in alleviating these issues in your country or region, you can access details and registration on the PHM website.

To follow official event updates, click here.

Fifth Global Forum on Human Resources for Health

3- 5 April 2023

The Fifth Global Forum on Human Resources for Health (HRH) takes place in Geneva, 3-5 April 2023. The Forum will be held under the theme of Protecting, safeguarding, and investing in the health and care workforce. It will examine the required policy solutions, investments and multi-sectoral partnerships to address health and care workforce challenges and advance health systems towards

universal health coverage and health security. The outcomes of the Forum will inform the United Nations General Assembly's High-Level Meeting on UHC in September 2023.

For more information, please click here.

33rd ICM Triennial Congress

11- 14 June 2023

The 33rd ICM Triennial Congress will be held between 11-14 June 2023. The theme for the Congress will be "Together Again: From Evidence to Reality". The theme reflects the recent return to face-to-face engagement around the world, and points to the work that is being undertaken to implement the evidence which continues to demonstrate the investment case for midwives. While this work must happen within the global community of midwives, it's also integral that governments, health leadership and women and people everywhere stand alongside midwives in their efforts to attain professional autonomy and decision-making authority at the country level.

The ICM Scientific Professional Programme Committee (SPPC) will soon begin developing a diverse programme of collaborative, innovative and interactive sessions led by global health, midwifery and maternal health advocates, scholars and leaders. With delegates, speakers and exhibitors from all over the world, this Congress is designed to not only support midwives in their professional development, but to support midwives as a collective to come together, build relationships, cultivate ideas, and identify pathways for progress.

To register of the 33rd ICM Triennial Congress, please click here.

29th ICN Congress

1-5 July 2023

The International Council of Nurses (ICN) and the Canadian Nurses Association (CNA) will co-host the **29th ICN Congress** from 1-5 July 2023 in Montreal, Canada with the theme: Nurses together: a force for global health.

With the theme "**Nurses together: a force for global health**", the ICN 2023 Congress will encourage attendees from around the world to learn, share and network in order to build a better future for the nursing workforce and our healthcare systems. Following the success of the 2021 virtual Congress, this face-to-face event will build on the lessons learned from the pandemic: from protecting nurses rights, ensuring decent working conditions, optimizing nurses' scope of practice, and fair pay, to driving nursing leadership, respect for the profession, and a greater impact on health policies at all levels. The event will also highlight the importance of unity, solidarity, collaboration and influence as nurses come together as a force for global health. The 2023 Congress will be held in the Montreal Palais de Congrès.

Abstract submission is open until the 31st of October 2022. For more information, please click here.

To register for the Congress, please click here.

Upcoming Oberservances

World Health Day

7 April 2023

On 7 April 2023 – World Health Day – the World Health Organization will observe its 75th anniversary.

April 7 of each year marks the celebration of World Health Day. From its inception at the First World Health Assembly in 1948 and since taking effect in 1950, the celebration has aimed to create awareness of a specific health theme to highlight a priority area of concern for WHO.

WHO's 75th anniversary year is an opportunity to look back at public health successes that have improved quality of life during the last seven decades. It is also an opportunity to motivate action to tackle the health challenges of today and tomorrow.

Join WHO on a journey to achieve Health For All.

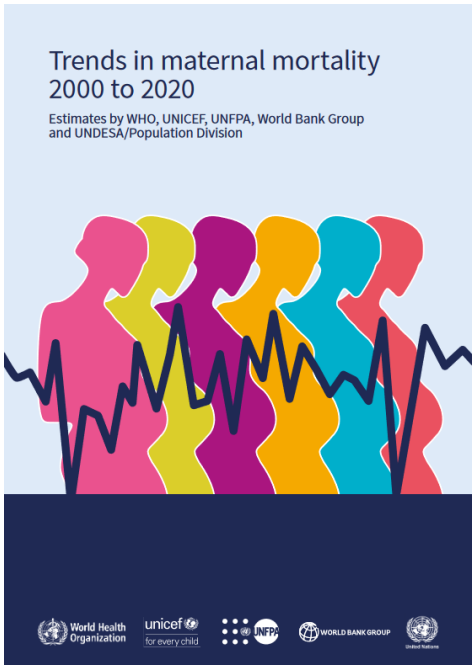
Recent Reports

Trends in Maternal Mortality from 2010- 2020

23 February 2023



Every day in 2020, approximately 800 women died from preventable causes related to pregnancy and childbirth - meaning that a woman dies around every two minutes.

Sustainable Development Goal (SDG) target 3.1 is to reduce maternal mortality to less than 70 maternal deaths per 100 000 live births by 2030.

The United Nations Maternal Mortality Estimation Inter-Agency Group (MMEIG) – comprising WHO, the United Nations Children's Fund, the United Nations Population Fund , the World Bank Group and the United Nations Department of Economic and Social Affairs, Population Division– has collaborated with external technical experts on a new round of estimates covering 2000 to 2020. The estimates represent the most up-to-date, internationally comparable MMEIG estimates of maternal mortality, using refined input data and methods from previous rounds.

The report presents internationally comparable global, regional and country-level estimates and trends for maternal mortality between 2000 and 2020.

To access the full report, click here.

Useful Resources

Basic Psychological Skills: An Online Training for COVID-19 Responders

A new Free online course on Basic Psychosocial Skills has been made available by the WHO CC UTS. The Basic Psychosocial Skills online Training is a FREE program for those affected by the pandemic designed to build resilience and mental health wellbeing for first responders and frontline health staff.

The FREE online course:

1. Focuses on personal well-being
2. Explores supportive communication in everyday interactions
3. Provides a practical framework to enable first responders to support others to problem solve and make healthy decisions
4. Examines how to recognise emotional patterns and provide support to individuals.
5. Provides a certificate on completion

View a detailed video on how to sign up: https://youtu.be/-Cguw2SCHOQ
Enrol for this FREE online course: http://open.uts.edu.au/COVID-19-responders-en.aspx
Read instructions on how to sign up: https://bit.ly/3bEJGkx
Read more about the basic psychosocial skills course: https://bit.ly/3sgZpf7

You will need an email account to register and log in for the online course.

For more information and full Power Point https://bit.ly/3cZCGy2
with facilitation notes, please contact michele.rumsey@uts.edu.au

FAQs

How many resources are provided in the Basic Psychosocial Skills training program?

The program provides 3 resources. Guidance report, short online course and presentation with facilitation notes.

How many languages is the guidance offered in?

While the online course is only in English, the guidance report is provided in 28 languages.

Is the online course time-bound?

No. The online course is self-paced and takes an average of 3 hours to complete with a short quiz and a certificate awarded.

The WHO Quality Toolkit

On the 20th of June 2022, the new WHO Quality Toolkit was launched by the WHO Global Learning Laboratory via webinar.

The WHO Quality Toolkit is a new online resource that provides tools to improve the quality of health services at a national, subnational, facility and community level. It provides a structured, system-based approach to identifying applicable materials needed for a specific context.

The Toolkit accompanies the WHO Quality Health Services: a planning guide, which has provided a roadmap for taking action within healthcare systems. The system incorporates key WHO-published tools and materials and is updated periodically to reflect new information to improving the quality of health services. It is meant to be a user-friendly, practical tool for all healthcare workers.

To access the WHO Quality Toolkit, please click here.
To watch the webinar recording, please click here.
