UTS IDeA Cadetship

UTS's IDeA cadetship is the only program of its kind in Australia and aims to bridge the gap of skill shortages by partnering talented Cybersecurity and Computer Science students with industry.

Why be involved?

Your involvement as a partner has the capability to make a powerful difference in the shaping of the technology industry. By fostering student talent within your business, your commitment will enhance the student experience and contribute to closing the gap of skill shortages within the Australian workplace.

Founded in 2022, the IDeA cadetship has enabled leading technology businesses to attract over 110 talented students to their workforce.

How the program works?

Step 1

Contact our Program Manager

Step 2: Talent selection

Select the talent that best suits your industry needs across Computer Science or Cybersecurity

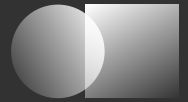

Step 3: Talent placement

Your chosen talent will commence in your business with a combination of part time study with part time work at your organisation. Choose from your talent working offsite in a co-working space or within your business HQ

The young developers involved in IDeA at UTS via the WiseTech Global Earn & Learn program are building their skills so rapidly; many are already performing as well as graduates even in their second year. With this head-start and university/workplace hybrid, they will truly be Australia's best when they graduate.

Matthew Kameron
Earn & Learn Program Lead, WiseTech Global

Partnership Benefits

- Direct access and employment of students during their study period
- Option to continue employment beyond a student's study period
- Opportunity to co-create the program in an agile and innovative manner
- Logo placement on UTS FEIT partnership page, and opportunity for UTS logo to be featured on your company website
- First-preference access to sponsoring other UTS student branded events, such as UTS Tech Festival to extend your business exposure

Partnership Investment

3 tiers of cost investment are available to best suit your business

Tier 1	Tier 2	Tier 3
Large &/or multinational	Government organisations & medium size enterprises	SME's and NGO's
\$25K per annum* (for duration of course) + \$2K per student (only during year of intake)	\$25K per annum (for duration of course) + \$2K per student (only during year of intake)	\$10K per annum (for duration of course) + \$1K student (only during year of intake)

*Applicable for intake of 5 students or less. For more than 5 students in large/multinational organisations, investment is \$50k per annum (for duration of course) + \$2k per student (only during year of intake)
