

CITY CAMPUS
MASTER PLAN

DR CHAU CHAK WING
BUILDING | HOME TO THE
UTS BUSINESS SCHOOL

This landmark building is the first Australian project for renowned architect Frank Gehry and is a highlight of the billion-dollar redevelopment of UTS's City Campus. Its unique design is a physical manifestation of the innovative thinking that underpins the UTS Business School.

KEY FEATURES

Façade: Around 320,000 custom-designed bricks pay homage to Sydney's sandstone heritage, with the fluid appearance of the brickwork achieved by corbelling individual bricks. The dramatic glass 'curtain wall' on the building's western side mirrors the building's contemporary city surrounds.

Stainless steel stair: Creating a sculptural focal point in the main lobby, the mirrored surface of the stair reflects the movement of both people and ideas.

Oval classroom: Two oval classrooms are constructed from 150 large glue-laminated timber beams, each weighing up to two tonnes with the longest measuring 12 metres. The classrooms are designed to support 360° engagement and are among a number of collaborative learning spaces throughout the building.

BUILDING SNAPSHOT

Project completed: November 2014

Teaching commenced: February 2015

Name: Australian-Chinese businessman and philanthropist Dr Chau Chak Wing donated \$20 million towards the project

Size: Gross building area: 18,413m²
Usable floor area: 15,500m²
12 levels (including plant) + 1 basement level

Location: Bounded by Ultimo Road, The Goods Line, Mary Ann Street and Omnibus Lane, Ultimo

Architect:
Design: Gehry Partners
Executive: Daryl Jackson Robin Dyke

Main works contractor: Lend Lease

Sustainability rating: 5 Star Green Star
Design rating from the Green Building Council of Australia
