Local governments are uniquely placed to respond positively to local issues, challenges and opportunities. Strong social planning processes that promote integration and collaboration and are firmly grounded in the social justice principles of equity, access, participation and rights will support appropriate responses.

This five-day course provide a deeper understanding of the theory and practice of social planning and community development and its application to your role and workplace. Frameworks and tools that support practitioners to identify and respond to local issues, challenges and opportunities will be explored and new knowledge and skills applied to roles and workplaces. Case studies and practitioner experience will be utilised as a platform for learning.

ABOUT THE PRESENTER

Professor Roberta Ryan is Director of the UTS Institute for Public Policy and Governance and UTS Centre for Local Government. Roberta is a leading practitioner and researcher with over 30 years’ experience in social policy research, policy evaluation, social planning skills and public participation. Roberta has extensive training experience working for public sector agencies across a wide range of public policy issues.
