Acknowledgement of Country
UTS acknowledges the Gadigal People of the Eora Nation and the Boorooberongal People of the Dharug Nation upon whose ancestral lands our campuses stand. We would also like to pay respect to the Elders both past and present, acknowledging them as the traditional custodians of knowledge for these Lands.
The UTS difference

You’ll be well-connected at UTS, learning in practical settings and engaging with real-world research.

Within state-of-the-art facilities, we’ll prepare you to be a global thinker, leader and innovator, because we’re driven by discovery – we’re committed to hands-on practice, and known for embedding innovation into everything we do. In the heart of Sydney, you’ll be perfectly placed to build connections that count.

AUSTRALIA’S #1 YOUNG UNI
We may be young, but we’re making our mark as Australia’s number one ranked university under 50!* Our academic experts are breaking new ground when it comes to teaching and research excellence. We’re leading the way, and we’re well respected by our peers because of it.

CREATING TOMORROW’S LEADERS
Our award-winning approach to education is about producing creative and analytical thinkers who can shape the world. It’s the result of our commitment to creative intelligence, innovation and entrepreneurship.

EXPERIENCE AT YOUR FINGERTIPS
Experience matters. At UTS, we’re focused on giving you the experience that counts with hands-on, industry-focused learning throughout your course. This means internships and placements, real-world projects and community connections. When you graduate, you’ll have the skills and knowledge the industry demands – plus, an extensive professional network, too.

A REINVENTED CAMPUS
We’ve transformed our campus – and the city around us – with a world-leading redevelopment. The redefined campus brings together award-winning, technology-rich spaces that drive new ways of thinking and learning. We’ve cemented our place in the city skyline with high-performance buildings that blur the line between university and the world beyond.
Health careers start here

We'll expand your horizons – professionally, personally and intellectually.

A CAREER THAT WON'T DISAPPEAR
The health industry is Australia’s largest employer. And that’s not likely to change, despite the advancement of automated technologies that are rapidly transforming the world of work.

So, invest in a career that’ll always give back to you. And do it at a uni that trains health professionals prepared for the future workforce.

OUR DIFFERENCE
With a career in health you’ll really impact people’s lives, so you need hands-on experience in how to do that. That’s why our state-of-the-art nursing, midwifery and sport science labs and gyms are some of the best educational health facilities in the southern hemisphere.

And, you’ll learn from the best. Our teachers and lecturers are practising professionals. So not only will you have access to new buildings, new equipment, and cutting-edge technologies, you’ll learn from experts who are leaders in their field.

Not to mention we’re ranked #1 in Australia and seventh in the world for nursing and midwifery**. Enough said.

**QS World University Rankings by Subject 2018.

PRACTICE MAKES PERFECT
We know the best way for you to learn is with hands-on experience. The coaches, the nurses, the midwives, the trainers you admire – all got to the top by throwing themselves into practice. Practical learning is built into your course at UTS each and every week; you’ll use what you’ve learned in class in practical placements and internships to prepare you for the world of nursing, midwifery, health science, and sport and exercise science or management.

THE RIGHT STUFF
Learn the industry knowledge of the future. Discover breakthroughs in health from expert teaching staff who are well-connected with industry, sporting, and healthcare organisations. You’ll always get the latest information and research as it happens, with course content constantly updated through consultation with local health districts, government, health care agencies and sports and fitness associations that matter.

WE'RE FLEXIBLE ON AND OFF THE FIELD
Life doesn’t stop when uni starts. That’s why we offer flexible day/evening class times for most subjects, part time study options and even summer school.

THINK BIG
Think fast-moving career. Think top-ranking position. Think major institution. Think global. All of these are made possible at UTS. So why stop at one? We offer combined degrees and graduate entry pathways to enhance your health qualifications with entrepreneurial skills, international experience or advanced education. Add on a Bachelor of Creative Intelligence and Innovation to build a unique, solutions-focused degree, or, tackle a Bachelor of Arts in International Studies and develop a truly global career.

1st in Australia
7th in the world
for nursing and midwifery

UTS ranked
Australia's
#1 young* uni

*Times Higher Education Young University Rankings 2018, QS Top 50 Under 50 2019
A nursing degree is your first step towards a vibrant, varied and in-demand career. Nurses are a vital part of the health care system with nearly 300,000 registered nurses in Australia working in public, private and community settings.

LEARN FROM THE BEST
UTS is #1 in Australia and seventh in the world in nursing and midwifery*. Our courses are led by dynamic and highly qualified teaching staff, and they’ve all had extensive experience in clinical, education, policy or research roles.

HANDS-ON LEARNING
Our emphasis on practice means you’ll be applying theoretical knowledge in a range of clinical scenarios — think simulations, case studies and professional placements — from early in your degree.

INDUSTRY-CONNECTED
Beyond UTS, we’re affiliated with more than 100 clinical facilities across NSW. These professional connections provide clinical placements for students like you, and they’re a great starting point for you to build your professional network.

* QS World University Rankings by Subject 2018
Where will a degree in nursing take you?

A CAREER FOR LIFE
Nursing is an incredibly diverse and varied career. It offers a range of roles and specialties such as complex nursing care, medical surgical nursing and mental health nursing.

As a UTS Nursing student you’ll develop clinical and communication skills, professionalism, leadership and critical thinking. By the time you graduate, you’ll be a competent, responsible and respectful practitioner, ready to deliver patient-centred care.

“Nursing has a good balance between practising a skillset and constantly learning.”

Sabrina Neesome
Graduate, Bachelor of Nursing

“I really love connecting with people. When you’re working the wards, you’re meeting different people every day. You’re trying to relate to those from all walks of life and that’s what is so important about being a nurse – you learn to not only master your practice, but to empathise with patients.”

See more of Sabrina’s story at uts.edu.au/sabrina-neesome

WHAT DO NURSES DO?
Nurses provide:

- Patient care in a wide variety of healthcare settings
- Care for people and their families in relation to health
- Help, support and information to promote health and wellbeing

WHAT COURSE OPTIONS ARE THERE TO BECOME A NURSE?

- Bachelor of Nursing
  (3 years full-time or 6 years part-time)
- Accelerated Bachelor of Nursing
  (2 years full-time) for ENs or those with prior health qualifications

WILL I BECOME AN ACCREDITED PRACTITIONER?

Two classifications of nurses are recognised by the Nursing and Midwifery Board of Australia:

- Registered Nurse (RN)
- Enrolled Nurse (EN)

Our Bachelor of Nursing prepares you to apply for registration as an RN.

CAREER OPTIONS

Work in diverse specialty areas such as community health, critical care, intensive care, aged care, mental health, operating theatres and paediatrics. Career progression opportunities include working as a clinical nurse consultant, clinical nurse specialist, clinical nurse educator, nurse manager, nurse practitioner or rural and remote practice nurse.

CAN I QUALIFY IN BOTH NURSING AND MIDWIFERY AT UTS?

Yes, you can! Even better, it doesn’t matter which degree you do first. You can undertake the Bachelor of Nursing followed by the Graduate Diploma in Midwifery. Or, start with the Bachelor of Midwifery and follow with the Accelerated Bachelor of Nursing. Both options take a minimum of five years.
Bachelor of Nursing

We emphasise hands-on experience.

Our clinical simulation facilities and extensive clinical placements (in every session!) ensure that over the duration of your Bachelor of Nursing you develop the knowledge, skills and behaviours you’ll need to graduate as a competent and highly employable Registered Nurse (RN).

This degree has been developed in consultation with our partner organisations, so you’ll be well-prepared to provide culturally appropriate, person-centred and evidence-based care that is focused on improving patient outcomes.

With a wide choice of electives in your final year, you can hone your interests and skills to work in emergency, theatre, paediatrics, community and primary healthcare, aged care, mental health and more once you come out the other side as a fully-fledged RN.

GO FURTHER
Our Bachelor of Nursing (Honours) may be available to you as an additional one year full-time or two years part-time course. For more information, visit uts.edu.au/course/c09018

2019 Selection rank*: 82.10 (full-time)
                      86.30 (part-time)

Duration: 3 years (full-time)
          6 years (part-time)

UAC code: 606000 (full-time)
           606001 (part-time)

Combine this degree with: International Studies
                        (see page 36)
                      Creative Intelligence and Innovation (see page 37)

Recommended year 12 studies: English, science and mathematics

Bachelor of Nursing
Accelerated course:
Enrolled Nurse

Fast track your Registered Nurse qualification with our accelerated program.

If you’re already an enrolled nurse (EN), you can become an RN in just two years.

THE PATH OF THE ENROLLED NURSE

To be eligible, you’ll have completed (in 2012 or later):

– TAFE Certificate IV in Nursing (Enrolled/Division 2 Nursing), or
– TAFE Diploma/Advanced Diploma of Nursing (Enrolled/Division 2 Nursing)

OR

– An Australian Health Practitioners Regulation Agency (AHPRA) approved Certificate IV in Nursing (Enrolled/Division 2 Nursing), or
– Diploma/Advanced Diploma of Nursing (Enrolled/Division 2 Nursing) leading to eligibility to enrol as a nurse with AHPRA.

As a tertiary educated enrolled nurse*, you’ll be given credit recognition (48 credit points) for your previous studies. This means you’ll complete your degree in two years’ full-time study.

*Hospital trained enrolled nurses are not eligible for the accelerated course.

“The university has so many support options for students. Help is easily available, and don’t be afraid to ask!”

Students complete 640 clinical placement hours.

“Studying at university has started a new quest for further learning – coming into practice with the amount of research we’ve done allows you to question current practices, ensures you provide evidence-based interventions, and gives you the ability to provide outstanding holistic patient care. It’s given me the confidence to do more advanced skills at work, but has also given me a great amount of confidence for higher level thinking.”

See more of Ethan’s story at uts.edu.au/ethan-watters

Duration: 2 years (full-time)

UAC code: 606004 (Enrolled Nurse)
Bachelor of Nursing
Accelerated course: Graduate Entry

If you’ve already a graduate of an Australian Bachelor degree (or overseas equivalent) in health or human physical or behavioural sciences, you can become an RN in just two years.

THE PATH OF THE HEALTH GRADUATE
If you have successfully completed a human health or behavioural science degree in the past eight years, you may be eligible for the accelerated Bachelor of Nursing. This means you can start at the beginning of second year and complete the accelerated course in two calendar years. To maximise your success, you’ll need to attend two pre-session subjects in January/February prior to commencing in the first year, as well as three summer subjects.

When applying through UAC, choose the Bachelor of Nursing Accelerated: Graduate Entry.

Students complete 840 clinical placement hours.

Ingrid Vennonen
Graduate, Bachelor of Nursing (Accelerated)

“Studying Crohn’s disease in the honours year of my Bachelor of Medical Science landed me inside a hospital, where I collected samples and liaised with nursing staff. Working side-by-side gave me a real insight into what nurses do, and the further along I went with my honours study, I found myself looking forward to the day I would be able to be part of a nursing team and interacting with patients too. So I made the decision, applied to UTS and moved to Sydney!”

See more of Ingrid’s story at uts.edu.au/ingrid-vennonen

“Pace yourself. It is all achievable with the right attitude and knowing the importance of self-care.”

For detailed subject descriptions, visit uts.edu.au/course/c10122
Practice-based learning is at the heart of our health education. Because in our industry, we know nothing beats practice.

We’ve developed a placement program that will lead you to success. With us, you’ll gain 800+ hours of hands-on experience in some of our 100+ partner hospitals and health clinics before graduating as a nurse.

We have a dedicated Clinical Practice Unit who are responsible for finding your placements, relevant to the subject you’re studying and in a location that’s as close to home as possible.

**NURSING PLACEMENTS**

- 840 hours (dependent on your degree) in external settings including teaching hospitals, specialist clinics, community health clinics and day surgeries
- More than 100 public and private facilities across greater Sydney
- Rural and remote placement options throughout your degree
- Relevant experiences directly mapped to your subject learning outcomes – so you’ll get to go on placement in a topic area you’ve covered in class and put your learning to work in a real-world clinical space right away
- Supervision by a clinical facilitator at a ratio of 1:8
- Block learning (2 week blocks in first year, 2-3 week blocks in second year and 3-4 week blocks in third year).

**PLACEMENT REQUIREMENTS**

- 2 x Health polo t-shirts ($39.95* each)
- ID card holder ($8*)
- Vaccinations
- Working With Children and National Criminal Record Checks.

*Costs correct as of February 2019.

For more information, visit uts.edu.au/clinicalpractice

**Kaitlin Anthonny**

Graduate, Bachelor of Nursing

“The clinical placements, especially toward the end of my degree, were most rewarding. They provided me with opportunities to work across a broad range of services – not just in hospitals, but in my particular areas of interest and in a rural setting. It affirmed my passion to work in community nursing and connected me with like-minded clinicians.”

See more of Kaitlin’s story at uts.edu.au/kaitlin-anthonny
World-class nursing facilities

Choose nursing and you'll have the opportunity to gain new skills, collaborate within a real-world environment – and practice, practice, practice – using the latest equipment, facilities and technologies.

FLEX YOUR NEW SKILLS
Feel like a nurse from day one in our 16 clinical practice laboratories that look and feel exactly like hospital wards, aged care facilities or primary health care services.

Clinical practice lab facilities:
- Scrub rooms, patient monitoring systems, medication dispensing areas and genuine hospital beds with oxygen and suction outlets
- Cutting-edge audio visual systems including control rooms and ceiling mounted cameras to provide digital recordings and feedback for debriefings
- Simulation technologies from low fidelity equipment to state-of-the-art robotic ‘human-like’ patients that can sweat, bleed, cry and speak
Midwifery

Midwifery is focused on the care of women during pregnancy, labour, birth and up to six weeks post-partum. Midwives work in partnership with women and their families to provide support, care and advice throughout these milestone life events.

STUDY TO LEARNING
UTS is leading the way when it comes to midwifery education – we’re ranked #1 in Australia for midwifery and nursing*. Our emphasis on hands-on practice means you’ll be applying theoretical knowledge in a range of clinical scenarios — think simulations, case studies and professional placements — from the first session of your degree.

LEARN FROM THE BEST
Our course is led by dynamic and highly qualified teaching staff, and they’ve all had extensive experience in clinical, education, policy or research roles. What’s more, they collaborate with skilled midwives and doctors in maternity units across NSW, ensuring your learning reflects the realities of today’s practice.

INDUSTRY-CONNECTED
Beyond UTS, we’re affiliated with some of the best maternity units across NSW. These connections provide clinical placements for students like you, and they’re also a great starting point for building your professional network.

*QS World University Rankings by Subject 2018
Where will a degree in midwifery take you?

A CAREER FOR LIFE
Midwives are in demand right across Australia. With a Bachelor of Midwifery, you’ll graduate with excellent career prospects and extensive opportunities to practice midwifery. This may be within an antenatal clinic, hospital maternity wards, birthing units or community settings in both rural and metropolitan locations.

Along with qualifying as a Registered Midwife, this degree will open doors to advanced roles in the future, such as midwifery unit manager, educator, specialist consultant and more.

Jennifer Green
Graduate, Bachelor of Midwifery

“Being able to experience first hand the wonder of pregnancy and birth is unexplainable; it is such a privilege to be a part of! Midwifery is such a rewarding and important career. Embrace every opportunity presented to you, be kind to yourself and never be afraid to ask for help when you need it.”

See more of Jennifer’s story at uts.edu.au/jennifer-green

WHAT DO MIDWIVES DO?
Midwives provide:
- Care and support for women and their families throughout pregnancy, labour, birth and the postnatal period
- Care from birth to six weeks after the birth of a baby

Midwives consider pregnancy, childbirth and early parenting to be healthy processes that are a normal part of life for many women. As experts in pregnancy, labour and post-partum care, they’re champions of normal birth, but are also equipped to work collaboratively with specialist teams to continue to support women and their families in the case of complications.

WHAT COURSE OPTIONS ARE THERE TO BECOME A MIDWIFE?
- Bachelor of Midwifery (3 years full-time)
- Bachelor of Nursing (3 years full-time or 6 years part-time) followed by the Graduate Diploma in Midwifery (14 months full-time including concurrent employment as a student midwife)

WILL I BECOME AN ACCREDITED PRACTITIONER?
The only classification of midwives recognised by the Nursing and Midwifery Board of Australia is a Registered Midwife (RM).
Our Bachelor of Midwifery prepares you to apply for registration as an RM.

CAREER OPTIONS
Work as a midwife in hospital, community, public and private settings in metropolitan and rural areas. Career progression opportunities can include specialist and consultancy roles (e.g. lactation or midwifery consultant), positions in management (e.g. midwife unit manager or midwifery manager) and as a clinical midwifery educator. Or, pursue opportunities as an academic, researcher or policymaker in midwifery.

CAN I QUALIFY IN BOTH MIDWIFERY AND NURSING AT UTS?
Yes, you can! Even better, it doesn’t matter which degree you do first. You can undertake the Bachelor of Midwifery followed by the Accelerated Bachelor of Nursing. Or, start with a Bachelor of Nursing and follow with the Graduate Diploma in Midwifery. Both options take a minimum of five years.
Bachelor of Midwifery

We were the first to establish a stand-alone Bachelor of Midwifery in NSW.

Choose this degree and you'll directly qualify to apply for registration as a Registered Midwife (RM) with the Nursing and Midwifery Board of Australia.

Our degree is hands-on. We'll get you ready for the real thing by building your confidence and competence. Before you step on to the maternity ward, experience our clinical facilities using cutting-edge technology – like birthing manikins. Not only will you learn from Midwifery experts who are internationally renowned, you'll then get to apply what you've learned in class during hundreds of hours of practical placements and continuity of care experiences.

GO FURTHER

Our Bachelor of Midwifery (Honours) may be available to you as an additional one year full-time or two years part-time course. For more information, visit uts.edu.au/course/c09051

*Selection ranks: published ranks indicate the lowest Selection rank (ATAR plus any adjustment points applied through eligible admissions schemes) to which an offer was made to a domestic Current School Leaver (Year 12) in the Autumn 2019 intake (for December Round 2 and January Round 1).
Immerse yourself in practical learning from day one.

Practice-based learning is at the heart of our health education. Because in our industry, we know nothing beats practice.

We’ve developed a placement program that will lead you to success. With us, you’ll gain 1000+ hours of hands-on experience in all areas of maternity care before graduating as a midwife. You’ll also follow at least 10 women all the way through pregnancy, labour, birth and the period after birth when you conduct your own continuity of care experiences.

We have a dedicated Clinical Practice Unit who are responsible for placing you at your ‘home’ hospital, where you’ll be based during placements throughout your degree.

What is midwifery continuity of care?
Care from a known midwife (or a small group) throughout pregnancy, labour, birth and post birth. It’s the ‘gold standard’ of maternity care – helping women to build a trusting relationship and increase their confidence.

Caitlin Compton
Graduate, Bachelor of Midwifery

“The most rewarding part of the course, and probably the simplest, is the genuine “thank you” you receive from women that you have helped through some of the most challenging and fulfilling moments of their lives. There are few instances in day-to-day life in which people show such genuine gratitude. It is a moment of sincere humanity and makes me appreciate the fact that I am privy to witness and contribute to these transformative experiences.”

See more of Caitlin’s story at uts.edu.au/caitlin-compton

MIDWIFERY PLACEMENTS
– 1072 hours at a maternity hospital throughout your degree
– Working morning, evening and possibly night shifts in a maternity ward and caring for multiple women
– Occur in blocks in each session, with extended clinical experience in third year
– Rural and remote placement option in third year
– Supervision and support from midwifery educators and midwives
– Build up a portfolio as a record of skills and reflection of your experiences
– Additionally complete a minimum of 10 continuity of care experiences where you are matched with a woman in early pregnancy and follow her entire journey throughout, by:
  – attending antenatal appointments
  – being on-call to attend labour and births
  – visiting during the postnatal period

PLACEMENT REQUIREMENTS
– 2 x Health polo t-shirts ($39.95* each)
– ID card holder ($8*)
– Vaccinations
– Working With Children and National Criminal Record Checks.
*Costs correct as of February 2019.

For more information, visit uts.edu.au/clinicalpractice
World-class midwifery facilities

Choose midwifery and you’ll have the opportunity to gain new skills, collaborate within a real-world environment – and practice, practice, practice – using the latest equipment, facilities and technologies.

FLEX YOUR NEW SKILLS
Feel like a midwife from day one in our 16 clinical practice laboratories that look and feel exactly like hospital wards, community or primary health care services. With specialist midwifery labs, you can practise caring for pregnant women in a safe, controlled but realistic environment.

Clinical practice lab facilities:

- Scrub rooms, patient monitoring systems, medication dispensing areas and genuine hospital beds with oxygen and suction outlets
- Midwifery learning spaces to practise specific midwifery exercises and simulations, with equipment including birthing bath, rope and stool
- Cutting-edge audio visual systems including control rooms and ceiling mounted cameras to provide digital recordings and feedback for debriefings
- Simulation technologies from low fidelity equipment to state-of-the-art robotic ‘human-like’ patients that can sweat, bleed, cry, speak and even birth a baby.
Health science is a non-clinical field that aims to improve human health. It’s a broad field of practice, based on the application of scientific principles to health care services – health science professionals work in a range of advocacy, education, planning and policy roles.

WE’RE FLEXIBLE
Our transdisciplinary degree can take you in lots of different directions. Whatever stream you choose, you’ll gain a broad education that combines health-specific content with a mix of professional subjects, prepping you to work in a range of health care environments.

LEARN FROM THE BEST
Our course is led by dynamic and highly qualified academic staff who are making significant contributions to the field. They’ve all had extensive health care experience in clinical, education, policy or research roles, and their diverse expertise will give you the chance to think about health science in a range of professional contexts.

WHERE KNOWLEDGE BEGINS
Course content is underpinned by the latest in public health research – and a lot of that research comes straight from UTS. That means your learning will respond to the changing nature of the health care landscape, and it’ll also be embedded with the sort of evidence-based outcomes that are shaping the sector today.
Where will a degree in health science take you?

Make a difference across a diverse range of health settings.

With a degree in health science, a variety of exciting career opportunities within the health care sector are yours for the taking.

Example career options include:

– health promotion
– advocacy
– health education
– e-health
– health data and information management systems
– planning and policy
– project management and evaluation
– community development
– research and consultancy across both public and private health sectors

A Bachelor of Health Science can also prepare you to undertake a Master of Physiotherapy, Master of Pharmacy or Master of Orthoptics at UTS. It also prepares you for other graduate entry programs such as Health Services Management or Public Health, depending on your career path. The choice is yours.

Luke Shilson-Hughes
Graduate, Bachelor of Health Science

“When deciding on a career change, I wanted to combine my interest in science with my technical skills, while also positively contributing to society; and that’s something I can do in the area of Health Science. In addition, it is a sector of health that is undergoing significant growth and creating new jobs for society, especially in digital health, where data is being used to improve health outcomes in communities. I think it’s a very exciting area to be diving into.”

Looking for a non-clinical career in health?

With this flexible and innovative degree, you’ll graduate as an engaged and adaptable thinker equipped to reduce health inequities, contribute to health-related activities, and promote social justice – both locally and globally.

**FIND YOUR NICHE**

Focusing on the social model of health, this degree helps you build transdisciplinary skills and a solid understanding of health and health systems. Depending on your interests, you’ll gain knowledge of global health and international health priorities so you can contribute to overseas health initiatives and aid organisations, or perhaps learn how to use and interpret data to drive innovation and improve health systems.

With a wide variety of subjects on offer, you’ll learn to think laterally and tackle today’s and tomorrow’s healthcare system issues. You can choose to major in global health, digital health and analytics, pharmacology, human structure and function, or tailor your choices to suit your career aspirations and interests.

Plus, you’ll gain industry exposure by undertaking a professional placement in your final year (see page 23).

**GO FURTHER**

Our Bachelor of Health Science (Honours) may be available to you as an additional one year full-time or two years part-time course. For more information, visit uts.edu.au/course/c09049.

**Pathway to Physiotherapy**: Students who complete this course, with the appropriate electives, are eligible to apply for the graduate entry course in Physiotherapy at UTS.
Practical placements to kick off your career

Practice-based learning is at the heart of our health education. Because in our industry, we know nothing beats practice. We’ve developed a placement program that will lead you to success. With us, you’ll gain industry exposure as you complete a professional placement that’s built into the final year of your health science degree.

HEALTH SCIENCE PLACEMENTS
- Gain a minimum of 140 hours experience
- Pair with an organisation or project within your realm of interest
- Bridge the gap between the classroom and practice
- Gain job-ready skills, solidify your career goals and interests
  - and network, network, network!

PAST STUDENTS HAVE COMPLETED INTERNSHIPS WITH A RANGE OF ORGANISATIONS SUCH AS:
- Cerebral Palsy Alliance
- Heart Foundation
- Justice Health and Forensic Mental Health Network
- Neuroscience Research Australia (NeuRA)
- WHO Collaborating Centre for Nursing, Midwifery and Health Development
- UTS-based research centres and projects

William Lam
Current student, Bachelor of Health Science

“Meaningful data can help improve the lives of people and make the world a better place. My dream is to become a health data scientist, working in research, government bodies, non-government organisations or any health sector in Australia or overseas. UTS is in a great location, has excellent facilities and you feel a vibrant energy on campus. Most importantly, the academics are professional, friendly and always willing to help.”

See more of William’s story at uts.edu.au/william-lam
Sport and Exercise

Sport and exercise is a professional field dedicated to the teaching, training or business of sport and exercise. Professionals here apply their expertise to jobs in sport, science, health, fitness and recreation. Choose a sport science approach, which is focused on the health, performance and wellbeing of the human body; or sport management, which examines sport as a business opportunity.

INDUSTRY-CONNECTED
At UTS, you’ll benefit from our industry connections with organisations such as the Australian Football League (AFL), Sydney Swans, the National Rugby League (NRL), Rugby Australia and Cricket NSW.

LEARN FROM THE BEST
Our leading academic experts are internationally recognised and well-connected researchers in the sports industry.

PURPOSE-BUILT SPACES
You’ll study in state-of-the-art laboratories and high-tech sport science facilities and equipment at our new Moore Park precinct (see page 32).
Where will a degree in sport and exercise take you?

Sport and exercise is a multibillion-dollar industry.

There’s a wealth of career options in professional and community sport ready for the taking.

Depending on your degree type, elective choices and professional interests, a sport and exercise degree can prepare you for a wide range of roles in the sport, recreation, health and fitness sectors.

By studying sport and exercise, you’ll gain a good understanding of the mechanisms of the human body and the skills needed to either manage and plan exercise activities, or, build a career in the marketing, management or business side of sport. Our courses also enable you to follow a pathway into exercise physiology or physiotherapy if that’s your calling.

Rob Spurrs
Graduate, Bachelor of Sport and Exercise Science

“I’m the Head Conditioning Coach for the Sydney Swans AFL team. I regularly use a variety of sports science principles that I learnt during my studies at UTS and believe that the wide range of subjects in the course has contributed to my ability to perform my job.”

See more of Rob’s story at uts.edu.au/rob-spurrs

Emily Scanlan
Graduate, Bachelor of Sport and Exercise Science

“My two passions for helping people and the human body in relation to injury from sport led me to Sport and Exercise Science. It appealed to me that UTS has numerous resources and buildings dedicated to this area of study, like the new Moore Park Precinct. The postgraduate options available after completing this course were also very enticing. I have moved on to a Master’s Degree in Physiotherapy, where I hope to gain further knowledge of human anatomy to fuel my passion when entering the workforce.”

See more of Emily’s story at uts.edu.au/emily-scanlan
# Sport and exercise science or management?

## WHAT’S THE DIFFERENCE?

**SPORT AND EXERCISE SCIENCE**

You’ll gain expertise in the sport and fitness industry, injury prevention, rehabilitation, strength and conditioning, sports education and exercise therapy.

**SPORT AND EXERCISE MANAGEMENT**

You’ll gain the knowledge and skills to manage sport and exercise programs, professional sporting teams, and large sporting venues and facilities.

## WHAT COURSE OPTIONS ARE THERE AT UTS?

**SPORT AND EXERCISE SCIENCE**

- Bachelor of Sport and Exercise Science
- Bachelor of Sport and Exercise Science – Exercise Therapy major
- Bachelor of Sport and Exercise Science/ Bachelor of Arts in International Studies
- Bachelor of Sport and Exercise Science/ Bachelor of Creative Intelligence and Innovation (BCII)

**SPORT AND EXERCISE MANAGEMENT**

- Bachelor of Sport and Exercise Management
- Bachelor of Sport and Exercise Management/Bachelor of Arts in International Studies

## WHY WOULD I CHOOSE THIS COURSE?

**SPORT AND EXERCISE SCIENCE**

A degree in Sport and Exercise Science will give you:

- Specialist qualifications and advanced knowledge of the human body
- Understanding of how physical activity enhances health and wellbeing, fitness and human performance in individuals and populations
- A pathway to graduate entry physiotherapy courses including the UTS Master of Physiotherapy (pathway or guaranteed pathway*)

**SPORT AND EXERCISE MANAGEMENT**

A degree in Sport and Exercise Management will give you:

- A tailored way to specialise in the desired sports area of your choice
- Specialist qualifications and advanced knowledge of management and business practice in the sport and fitness industry
- Understanding of how to promote and market sport, health and fitness
- A pathway to graduate entry physiotherapy courses including the UTS Master of Physiotherapy

## WHAT ARE MY CAREER OPTIONS?

**SPORT AND EXERCISE SCIENCE**

- physiotherapy (pathway or guaranteed pathway*)
- exercise scientist
- exercise physiologist
- exercise rehabilitation
- sports scientist
- strength and conditioning
- performance analyst
- high performance manager
- coaching and athlete development

**SPORT AND EXERCISE MANAGEMENT**

- physiotherapy (pathway)
- corporate health and fitness
- athlete management
- fitness consultant
- health promotion
- events and facilities manager
- sports coach or manager
- sport marketing
- high performance manager
- sport development

*Both UAC codes 606020 and 606021 enable a pathway into graduate entry physiotherapy degrees, with the Bachelor of Sport and Exercise Science – Exercise Therapy major being a guaranteed pathway into the UTS Master of Physiotherapy, subject to maintaining a credit average and a successful internal interview.
Bachelor of Sport and Exercise Science

Pathway to physiotherapy

2019 Selection rank*: 82.05 (full-time)
Duration: 3 years (full-time)
UAC code: 606020 (full-time)
Combine this degree with: International Studies (see page 36)
Creative Intelligence and Innovation (see page 37)
Recommended year 12 studies: Mathematics, any two units of English

Dive into the processes and mechanisms of sport and exercise science.
Gain the knowledge and skills needed to manage and plan physical activity, sport and exercise services to all sectors of the community.
Choose a major in Exercise Science, or four different electives to tailor your degree to your career aspirations.

Course structure (sample course structure for standard full-time study)

For detailed subject descriptions, visit uts.edu.au/course/c10300
This course is subject to change in 2020 as part of the normal review cycle
Pathway to Physiotherapy: Students who complete this course, with the appropriate electives, are eligible to apply for graduate entry courses in this area.
*Selection ranks: published ranks indicate the lowest Selection rank (ATAR plus any adjustment points applied through eligible admissions schemes) to which an offer was made to a domestic Current School Leaver (Year 12) in the Autumn 2019 intake (for December Round 2 and January Round 1).
Bachelor of Sport and Exercise Science
Exercise Therapy major

Guaranteed pathway to physiotherapy#

Choose the Exercise Therapy major in the Bachelor of Sport and Exercise Science and gain the knowledge and skills needed to manage and plan physical activity, sport and exercise services to all sectors of the community. Plus, have the security of knowing that a place is reserved for you in the highly competitive UTS Master of Physiotherapy*.

GET A HEAD START
Guaranteed entry to the UTS Master of Physiotherapy will be subject to you maintaining a credit average and completing a successful internal interview, which assesses your communication and interpersonal skills, and your interest in and commitment to physiotherapy as a career.

A CAREER FOR LIFE
Become an expert on the role that exercise and physical activity plays on health, wellbeing and human performance. If you’re looking to work within health, educational, sport, exercise and leisure settings, we’ll get you there. This degree leads to careers within sport, health, physical activity, exercise rehabilitation, physiotherapy (guaranteed pathway#), outdoor education or various corporate sectors.

PRACTICE MAKES THE MASTER
A comprehensive practicum program including experience with an organisation within your realm of interest is a vital part of the degree (see page 31).

Bachelor of Sport and Exercise Management

Pathway to physiotherapy

Become a health and fitness expert.
Develop a strong understanding of the physical, behavioural and cultural foundations of sport and exercise science and combine it with the knowledge and skills of effective management.

A CAREER FOR LIFE
Gain the knowledge and skills to manage sport and exercise programs, professional sporting teams, large sporting venues and facilities. Your career may take you to corporate health and fitness, athlete management, fitness consulting, sports coaching, or marketing and development. Or, choose the appropriate electives and our Bachelor of Sport and Exercise Management also prepares you for a pathway to physiotherapy.

PRACTICE MAKES THE MASTER
A comprehensive practicum program including experience with an organisation within your realm of interest is a vital part of the degree (see page 31).

Stephanie Maiolo
Graduate, Bachelor of Sport and Exercise Management

“So many things pulled me toward studying at UTS. One of the major attractions was the Elite Athlete Program, sport office and the facilities it offers – i.e. the gym! The most rewarding aspects of the course I’ve found is the real-world knowledge I’ve come to learn through the practical nature of many of my subjects. I’ve also made some really great friends during my time here.”

See more of Stephanie’s story at uts.edu.au/stephanie-maiolo

Practical placements to kick off your career

Practice-based learning is at the heart of our health education. Because in our industry, we know nothing beats practice.

We’ve developed a placement program that will lead you to success. With us, you’ll complete a 140-210 hour professional practicum (or internship) that’s built into the final year.

SPORT AND EXERCISE SCIENCE AND MANAGEMENT PLACEMENTS
You’ll develop industry contacts and gain practical experience at organisations including:
- Sporting clubs
- School sport programs
- Fitness and health centres

RESEARCH ENGAGEMENT
You can also choose to engage in work experience through sport and exercise research projects throughout your degree such as:
- factors affecting performance in elite athletes
- effects of physical activity and sport participation on health and wellbeing
- effects of diet, exercise and behaviour on chronic disease

Alana Leabeater
Current Student, Bachelor of Sport and Exercise Science

“My dream career is in high performance sport, working with professionals to ensure best performance for athletes. I want to be the one collecting the data, measuring progress and translating the science into athlete and coach-friendly terms. I also want to be at the forefront of sports science research, investigating ways to improve performance. My degree definitely feeds into that, while also giving me a broad range of skills in areas such as biomechanics, nutrition, psychology and management.”

During her degree, Alana has undertaken internships in the performance analysis department at the NSW Institute of Sport, and in athletic performance with the Penrith Panthers NRL team.
An elite sporting hub in the heart of Sydney

Study sport and exercise with the best of the best in the Rugby Australia Building over at our new Moore Park precinct. This is the first facility of its kind in Australia, where we’ve partnered with the Sydney Cricket and Sports Ground Trust to create a dynamic and vibrant learning environment in the heart of elite sporting action – we’re located next to the Sydney Football Stadium (set for redevelopment) and the Sydney Cricket Ground!

With us, you’ll get a taste for world-class amenities, state-of-the-art training and high-performance laboratories. Plus, engage with industry, seconds from the sporting field. We’re home to more than 100 sports professionals including sports scientists, elite athletes and sports teams – even the Qantas Wallabies. You’ll get to interact with more than 700 UTS students and researchers. That’s a lot of sports knowledge packed into one precinct.

You’ll also attend classes in the City Campus, ensuring you remain engaged and connected to the main university campus.

EQUIPMENT FOR CHAMPIONS
– Sports training facilities including an environmental chamber, indoor court and resistance training room
– Well-equipped exercise science teaching laboratories packed with exercise testing and sporting equipment
– Customised sport science research facilities including physiology, biomechanics and skill acquisition laboratories
The UTS Master of Physiotherapy combines research, practice and new technologies into a two-year course that’s focused firmly on the future.

Course content is underpinned by a rigorous evidence base that’s informed by the latest research in physiotherapy.

You’ll study musculoskeletal, sport rehabilitation, neurological, orthopaedic and cardiorespiratory physiotherapy across the lifespan of a patient, as well as gerontology, occupational health and paediatric care. You’ll also integrate the latest technologies in robotic and virtual reality therapy into your clinical practice.

Beyond theoretical learning, you’ll build key professional skills, such as clinical reasoning, quality assurance, research, teamwork and leadership.

**BECOME A LEADER IN YOUR FIELD**

After graduation, you’ll be eligible for registration as a physiotherapist in Australia. Where you go after that is up to you.

Career opportunities include roles in public, private or community settings, sporting clubs and rehabilitation centres. You can also apply your qualifications to a particular specialisation, such as musculoskeletal, sport, neurological, paediatric, cardiorespiratory rehabilitation, academia or research.

For specific details on the current course structure, please visit uts.edu.au/course/c04306
Degree add-ons

Stand out from the crowd with a Diploma in Innovation or a Diploma in Languages.

2019 Selection rank*: N/A
Duration: 3 years part time, concurrent study
UAC code: C20059 (Languages) C20060 (Innovation)
How to apply: Direct to UTS, see internationalstudies.uts.edu.au/future and dipinn.uts.edu.au
Credit points: 48

+ Add the diploma in languages

Gain a global outlook

Bring the world to your doorstep with a Diploma in Languages. Add this year-long diploma to your UTS degree to gain language and cultural skills, build your professional identity, and graduate with a range of capabilities that’ll prepare you for an international career. Language options include Chinese, French, German, Italian, Japanese and Spanish.

No need to apply just yet – the diploma is available to students already studying an undergraduate or postgraduate coursework degree program at UTS, so sign up when you enrol. No matter what you study, the diploma can give your qualification an international edge.

SUBJECTS
Study six language and culture subjects and learn communication tools and understandings of other cultures and societies. Throughout, you’ll develop the four macro language skills of listening, speaking, reading and writing by using authentic materials covering a variety of situations. There are a range of entry levels to cater for students with prior knowledge and for beginners. If you’ve successfully completed the language at HSC level or equivalent, you may be able to begin at higher levels.

STUDY PATTERN
Add the diploma to your UTS bachelor’s degree, and study one language and culture subject in addition to your professional degree subjects each session. A standard full-time study load is 24 credit points - so you’ll increase your study load to 32 credit points per session and still graduate on time.

ADMISSION REQUIREMENTS
Any local student enrolled in a UTS undergraduate coursework degree is eligible to apply.

+ Add the diploma in innovation

Future proof your degree

Rather than building the skills for a specific career, the Diploma in Innovation is about preparing for the future of work. In fact, it responds directly to industry demand for graduates who can demonstrate inter- and transdisciplinary approaches in their professional practice.

There’s an emphasis on entrepreneurial thinking, too: by the time you graduate, you’ll be ready to be an entrepreneur, serve entrepreneurial clients, or integrate entrepreneurial processes into your day-to-day work.

SUBJECTS
Subjects are organised in two streams (each 24 credit points). The streams relate to the areas of creative intelligence, and innovation and entrepreneurship.

STUDY PATTERN
Add the diploma to your UTS bachelor’s degree, and what’s more, all your diploma subjects will be offered as winter and summer school intensives - so even though you’re adding an extra qualification, you’ll still graduate on time.

ADMISSION REQUIREMENTS
Any student enrolled in a UTS undergraduate coursework degree is eligible to apply (excluding the Bachelor of Creative Intelligence and Innovation or Bachelor of Technology and Innovation).

*Selection ranks: published ranks indicate the lowest Selection rank (ATAR plus any adjustment points applied through eligible admissions schemes) to which an offer was made to a domestic Current School Leaver (Year 12) in the Autumn 2019 intake (for December Round 2 and January Round 1).
Combined degrees

Why settle for one specialisation? Create your niche by combining your areas of interest.

Bachelor of Arts in International Studies
(Not applicable for midwifery and health science)

2019 Selection rank*: 91.10 (Nursing)
91.15 (Sport and Exercise Science)
95.75 (Sport and Exercise Management)

Duration: 5 years full-time

UAC code: 609150 (Nursing),
609080 (Sport and Exercise Science),
609085 (Sport and Exercise Management)

The world is big. Make it your own. With a UTS international studies qualification, you'll open doors to new experiences, people, languages and culture that’ll shape your degree – and your life.

HERE’S WHAT IT’S ALL ABOUT
Take a leap into the great unknown with a Bachelor of Arts in International Studies. This course lets you study what you love while you explore the world beyond your doorstep.

It’s a combined degree, which means you’ll have all the career options of your health degree plus your skills will be enhanced by international experience. You’ll build professional skills in health and then choose a country major* (Argentina, Canada [Quebec], Chile, China, Colombia, Costa Rica, France, Germany, Italy, Japan, Mexico, Spain, Switzerland or Latino USA) that will inform the language, culture, social change and cultural diversity expertise of the International Studies degree.

Next? Jet off overseas for a year-long stint at one of our international partner universities. There’s no better way to prepare for the international workforce, or to see the world while you study.

^Subject to availability of places.

Trailblazer? Change-maker? Game-changer? Entrepreneur? The Bachelor of Creative Intelligence and Innovation (BCII) is a degree for students who have one eye on the future.

HERE’S WHAT IT’S ALL ABOUT

The BCII is all about critical and creative thinking, problem-solving, invention, complexity, innovation, future scenario building and entrepreneurship. The good news? You can pair it with your health degree, and everything you learn in the BCII will add an extra dimension to your studies to give you a cutting-edge advantage in your future workplace.

In the classroom and beyond, you’ll undertake real-world projects with a focus on innovative, creative and entrepreneurial outcomes. You’ll engage with authentic live industry, government and community challenges, like previous students who have worked with organisations like Google, the Royal Australian Airforce, PwC, Commonwealth Bank and NSW Health, delivering solutions to a variety of briefs.

As a transdisciplinary degree, the BCII brings together students from a huge range of discipline areas, giving you leading-edge creative and collaborative skills that are much valued in the globalised world.

You’ll graduate with high-level expertise in the area of your chosen health degree, plus unrivalled capacity for innovation – as well as the confidence to straddle many industries. Everything you need to future-proof your degree and stand out from the crowd!

*Selection ranks: published ranks indicate the lowest Selection rank (ATAR plus any adjustment points applied through eligible admissions schemes) to which an offer was made to a domestic Current School Leaver (Year 12) in the Autumn 2019 intake (for December Round 2 and January Round 1).
Applying to UTS

It’s time! Join the innovation generation as a student at UTS.

Here’s how:

1. **Find a course**
   Choosing what to study is a big decision. Start by checking out the course information pages of this guide, as well as the UTS website.

   uts.edu.au/find-right-ug-course

2. **Check your admission requirements**
   Once you’ve chosen a course, check that you meet the admission requirements.

   **High school leavers:**
   If you’re completing your HSC (or equivalent) in 2019, we’ll assess your application based on your Selection rank for entry into most UTS courses. Your Selection rank is a combination of your ATAR/IB score, plus any adjustment points you receive (read more about adjustment points on page 40). As a guide, use the Health 2019 Selection ranks table on page 44.

   **Mature age and non-current school leavers:**
   If you’re not a high school leaver, you’ll be assessed on criteria such as your ATAR, post-school qualifications, or relevant work experience, along with any additional selection criteria.

   uts.edu.au/ug-optional-selection-criteria

   **Indigenous students:**
   If you’re an Australian Aboriginal or Torres Strait Islander, the Jumbunna Institute for Indigenous Education and Research can help you get in to UTS through the Jumbunna Pathways Program (see page 40) or Unistart Program (see page 41).

   uts.edu.au/apply-jumbunna-pathways

   uts.edu.au/unistart

   **International students:**
   This guide is not intended for international students. If you’re an international student looking for course and application information, please use the UTS International website and course guide.

   If you’re not a citizen or permanent resident of Australia, or a citizen of New Zealand, you must apply as an international student directly through UTS International.

   Tel: 1800 774 816 (free call within Australia)

   Tel: +61 3 9627 4816 (for international calls)

   uts.edu.au/unistart

Check if you’re eligible for scholarships:

When? Scholarship applications open as early as April 2019. See what’s on offer and check your eligibility on our website.

uts.edu.au/scholarships

Check if you’re eligible for admission schemes:

There’s more than one way to get into uni. We offer a range of admission schemes that can help get you into the course you want. See page 40 for a list of schemes.

uts.edu.au/scholarships
3. **Visit UTS**

Come and say hello at one of our events or Discover Health info sessions – it’s a great way to get to know UTS. And don’t miss UTS Open Day (Saturday 31 August 2019), the biggest day on campus, where you’ll have the chance to explore your course and career options.

[uts.edu.au/discoverhealth](http://uts.edu.au/discoverhealth)   
[openday.uts.edu.au](http://openday.uts.edu.au)

4. **Apply through UAC**

Applications for most UTS undergraduate courses must be lodged online through the Universities Admissions Centre (UAC). On-time applications close at the end of September 2019*. Be sure to have your UTS preferred course as your first preference.

Application information is available in the UAC Guide and on the UAC website. If you’re a Year 12 student, you can obtain a free copy of the guide from your school. Some courses have additional selection criteria, so you may need to submit extra material to UTS in addition to your UAC application. Check out the UTS Handbook for more information about applying for your chosen course.

[uac.edu.au](http://uac.edu.au)   

5. **Review your options**

**Are you eligible for subject points?**^  

Once your results are released, visit our Year 12 Subject Scheme table with your performance bands in hand to see if you’re eligible for an adjustment of up to five points towards your Selection rank. These subject points are in addition to any points you may receive from one of our other admission schemes.

6. **Accept your offer**

The majority of our offers are released during December Round 2 via UAC on 23 December 2019*. Check the UAC website for offer round dates.

Offers will be made to eligible IB students in January following the release of your results.

[uac.edu.au](http://uac.edu.au)

---

^For high school leavers only.  
* Correct at the time of printing. Visit [uac.edu.au](http://uac.edu.au)

---

**Once you’re in...**

You’re in! If you receive an offer to study at UTS, keep the following dates in mind.

**17 Feb – 6 March 2020:**  
Autumn session Orientation for new students.

**Monday 9 March 2020:**  
Autumn session begins.
Admission schemes

Boost your chances of receiving an offer from UTS with one of our admission schemes. When we assess your application, we'll consider criteria beyond your ATAR, such as your academic performance in certain HSC subjects, disadvantageous circumstances you may have experienced, or your identification as Aboriginal or Torres Strait Islander.

Please note: you’ll need to submit an application if you want to be considered for the admission schemes listed below. Only the Year 12 Subject Scheme and the equity-funded school concession points are automatically assessed.

**Year 12 Subject Scheme**
If you’re a current high school student (both HSC and IB), you’ll be automatically assessed for this scheme. The Year 12 Subject Scheme awards additional points (called adjustment points) towards your Selection rank based on your performance in high school subjects that are relevant to your chosen course.

**inpUTS-Educational Access Scheme**
If you’ve experienced long-term educational disadvantage as a result of family, personal or financial circumstances, you can apply for inpUTS, our Educational Access Scheme (EAS). If you’re eligible for inpUTS, you’ll be considered for a place at UTS, even if your Selection rank is up to 10 points below the cut-off for your preferred course.

**Schools Recommendation Scheme**
We’re dedicated to supporting students who have the potential to succeed at university, even if they don’t receive an offer based on their selection rank alone. To be eligible for our Schools Recommendation Scheme (SRS), you must demonstrate financial hardship or be automatically eligible for the geographic area code disadvantage (AGO1) and achieve a minimum ATAR of 69 (or 80 for Law).

**Elite Athletes and Performers Special Admissions Scheme**
If you’re an elite athlete or performer and your commitments outside school have impacted on your studies, you can apply for our Elite Athlete and Performers Scheme. This scheme can give you five additional adjustments points towards your Selection rank.

**Jumbunna Pathways Program**
Available to Aboriginal and Torres Strait Islander students who aspire to study at university, and may not otherwise have the qualifications to apply. Your application will be assessed based on factors including previous life skills and experience, education and work experience. Applications are direct to Jumbunna.

Visit our website to see a full list of our admission schemes.

Admission pathways

Admission pathways are alternative ways to get into your preferred course if you don’t receive the ATAR you need. UTS pathways include TAFE courses, diplomas and other formal qualifications that can get you back on track.

Enrol in a related course
Start by choosing a different UTS course – ideally, pick one with a lower ATAR that’s still similar to the course you want.

Then, think about the following options:

- **Use your electives to get a great degree experience**
  With electives, you can enrol in subjects that interest you from almost any UTS faculty – so you can still study what you’re passionate about, no matter which degree you’re in.

- **Re-apply after a year**
  Once you’ve completed a year of full-time study at UTS or another institution, you can apply to your preferred course via UAC. We’ll assess both your ATAR and the marks you earn in your first-year subjects. Make sure you study hard – it’s a competitive process, so getting good results in first year is essential. You may also be eligible for credit recognition for certain subjects completed during the year.

- **TAFE or private college diploma**
  Studying a different university course is a great way to gain entry into your preferred degree – but so is completing an Australian Qualifications Framework Diploma at TAFE or a private college. If you achieve good marks, the diploma can add value to your application for the majority of UTS bachelor degrees. You may also be eligible for recognition of prior learning for certain subjects.

- **Retake your HSC at TAFE**
  Have a do-over. By spending a year at TAFE, you can redo your HSC in a single year – which means you’ll get a new ATAR at the end.

**Jumbunna Unistart Program**
Jumbunna Unistart is a unique twelve-month program offered to Aboriginal and Torres Strait Islander students. You attend small classes at Jumbunna that are designed to build your confidence and academic skills in writing and mathematics, along with select subjects from your chosen degree. When you have successfully completed the program, you will progress fully into your chosen degree and receive recognition of prior learning.

Visit our website to see a full list of our admission pathways.

Scholarships

At UTS, we’re all about rewarding effort – and supporting circumstance. That’s why we offer more than $12 million in UTS coursework scholarships and prizes every year. If you’re a high achiever, in financial need, or if you’re from a diverse background, a UTS scholarship can help take care of your finances so you can focus on the important stuff.

Scholarships for high achievers
Academic achievement is worth celebrating – and our high achievers’ scholarships do just that. Some scholarships are awarded across all UTS undergraduate degrees (e.g. the UTS Vice Chancellor’s Outstanding Achievement Scholarship, valued at $12,500 per year for the duration of the course), while other scholarships are offered through our faculties (e.g. the Health Dean’s Scholarship).

Health Dean’s Scholarship
- Established by UTS Health to support a high achieving school leaver commencing an undergraduate Health degree
- Value: $10,000 over one year

Equity scholarships
Our equity scholarships aim to overcome financial disadvantage in whatever form it takes. Whether you have a disability or ongoing medical condition, a rural home address, a refugee background or carer’s responsibilities, these scholarships can help make university study possible.

Scholarships for women
We pride ourselves on providing an inclusive work and study environment for women – in fact, we’ve been consistently recognised by the Workplace Gender Equality Agency for our efforts. We offer several scholarships to encourage women to undertake study in different areas.

Scholarships for Indigenous Australians
We’re committed to offering scholarships and prizes to support Aboriginal and Torres Strait Islander students. Some of these are awarded on academic merit while others are equity-based.

Scholarships for athletes
You’ve given your life to your sport – now let your sport give something to you. ActivateUTS assists students to combine high-performance sport with their studies, so you’ll be supported to excel in both areas. They offer three scholarships: the Elite Athlete Program, Emerging Athlete Program and Elite Athlete Housing Scholarship.

We also offer a few other scholarships for athletes to assist you in pursuing your academic and sporting goals.

Application dates
Scholarship application dates vary. Be sure to check the UTS scholarship website for specific closing dates.

Which scholarship is right for me?
With so many scholarships on offer, it can be tricky to figure out which ones you’re eligible for. Use our online search tool to filter scholarships according to the criteria that best describes you.

External scholarships
There are scholarship opportunities outside of UTS, too. Visit our website to start your research.

NSW Nursing and Midwifery scholarships
NSW Health offers a range of scholarships to nursing and midwifery students.

To find out more info on scholarships visit uts.edu.au/scholarships
Fees and financial assistance

Uni fees can be confusing – how much you pay depends on the uni you choose, the course you study and the subjects you enrol in. Here’s a quick guide to student fees at UTS.

Domestic students

As a domestic student, you’ll most likely be studying in a Commonwealth Supported Place. This means the Australian Government makes a contribution to the cost of your study, while you pay a student contribution.

- **Student contribution**
  The Australian Government has classified each unit of study into various bands depending on the study area. Your student contribution is calculated based on the subjects you enrol in each session.

- **HECS-HELP**
  Most domestic students pay their student contribution through the HECS-HELP scheme. This means the government lends you the money for your student contribution and pays it directly to the university. HECS-HELP is available to Australian citizens, students on humanitarian visas and holders of a New Zealand SCV that meets the long-term residency requirements (note that if you’re a New Zealand citizen and do not meet eligibility requirements, or if you hold an ordinary permanent resident visa, you’ll need to pay your fees upfront). You’ll start repaying your HECS-HELP loan after graduation, once your income reaches the repayment threshold.

  Don’t want to incur a HECS-HELP debt? You can pay your student contribution upfront every session – just make sure you pay it by the due date.

  For more information on HECS-HELP, visit the StudyAssist website.

  [studyassist.gov.au](http://studyassist.gov.au)

UTS financial assistance

Uni life can be a bit of a juggle, so if you’re struggling with your finances, the Financial Assistance Service can help. Our team assists with the practical and financial aspects of life at university, including information on the Centrelink Student Support benefits, government HECS and FEE-HELP tuition loans, help with planning your budget to survive uni on your income, providing support such as nil-interest short-term UTS student loans and help with completing PAYG annual income tax returns. They also support equity-based programs, grants and scholarships to help low-income domestic students in financial need. This funding can help you meet the costs of your classroom resources, like textbooks and laptops, or add-on costs that result from internships and workplace practical experience requirements.

Government income support

If you’re an Australian citizen or permanent resident, you may be eligible for a Centrelink benefit. Visit the Department of Human Services website for more information.
