See the big picture in health management

Global health care systems are facing unprecedented pressure – think ageing populations, chronic disease, increasing inequality and shrinking health budgets. It is a challenging landscape, and the skills of highly qualified health services managers are more in demand than ever.

Join the next generation of managers and leaders and graduate equipped to meet the complex and shifting dynamics of health systems and services. Our Health Services Management degrees are about more than management skills: their specialised health focus sets them apart. Develop specialist skills and take advantage of the best mix of online and face to face learning.

Why Health Services Management at UTS?

Applicable, evidence-based theory: Our programs are innovative, evidence based and informed by the latest research. Industry experts will help you develop the skills and knowledge you need as a leader in this uniquely challenging field.

Expert staff: Be part of a vibrant and truly interdisciplinary learning community, with experienced educators who can help you link theory to practice and shape the healthcare services of the future.

Flexible study: Our unique approach to learning integrates the best mix of online and intensive study days with master classes in a convenient location to ensure your valuable time is well spent.

Specialised health focus: Develop expertise in Health Services Management, Planning, Clinical Leadership, Project Management, Information Management or Health Research.

Dr Deborah Debono
Senior Lecturer
RN, BA (Psych Hons), PhD

“UTS continues to be a leading authority on health management and informatics. With a curriculum that acclimates to an ever-evolving environment, our courses create a clear pathway for health professionals to develop their careers.”

What will you study?

Advanced Master's – Master's – Graduate Diploma – Graduate Certificate

A postgraduate health services management degree is not just about taking an intellectual leap – it prepares you for a huge step forward in your health career.

UTS is a leader in health care services management education and research. When you study with us, you will study a degree that's been developed in partnership with the NSW and QLD Ministries of Health, which goes beyond generic management skills to include clinical components and a specialised health focus. Subjects cover a range of critical issues related to leadership, management, clinical redesign, planning, economics, and data for decision making as they relate to the health care sector.

Subjects:

INTAKES

Autumn, Spring

DURATION

- Advanced Master's degree: 2 years full-time or 4 years part-time
- Master's degree: 1.5 years full-time or 3 years part-time
- Graduate Diploma: 1 year full-time or 2 years part-time
- Graduate Certificate: 1 year part-time

TEACHING MODE

Mix of online and on campus provides flexibility and value of face-to-face learning.

ADMISSION REQUIREMENTS

Applicants must have completed a UTS recognised bachelor's degree, or an equivalent or higher qualification and least one year's full-time equivalent experience in a healthcare or human services organisation. Applicants who do not have an undergraduate degree but who have extensive relevant work experience in a healthcare or human services field and can demonstrate their capacity to undertake tertiary study may also be considered eligible.

SUPPORTING DOCUMENTS

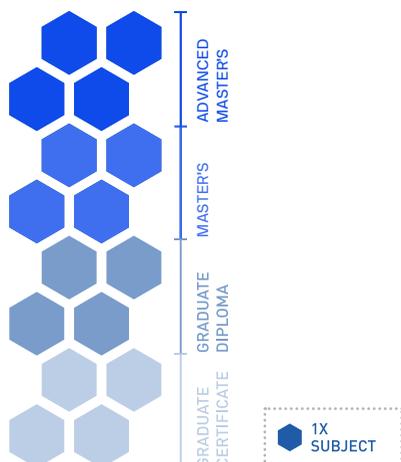

CV (evidence of experience in a healthcare or human services organisation); Academic transcripts (may be required).

Overall IELTS: 6.5

Commonwealth Supported Place: No

Fees can be found online at fees.uts.edu.au

Our 'nested' course structure means you can start with a Graduate Certificate or Graduate Diploma and work your way to an Advanced Master's degree. Or, enrol in the Advanced Master's or Master's degree and exit early with a Graduate Certificate or Graduate Diploma if your circumstances change.

RESEARCH WITH IMPACT

The Faculty of Health at UTS is home to the Centre for Health Services Management (CHSM). CHSM provides education, research and consultancy for those who are managing health services and to inform health policy at state and national levels.

As a doctoral research student, you will be part of a community of world-leading researchers who are:

- developing and sustaining a research culture within health services management

- improving health outcomes and lowering costs by strengthening the capacity to quickly interpret and implement new knowledge from research

- identifying, exploring, demonstrating and evaluating key strategic health care issues affecting innovative health care delivery systems

- linking health services research with policy and practice.

Information on undertaking a PhD can be found online at: uts.edu.au/course/c02024

Master of Health Services (Research)

Course code: C03050

Information on undertaking a Master's degree by research can be found online at: uts.edu.au/course/c03050

Graduate attributes

Theoretical expertise and practical skills are essential components of a health care career. But at UTS, we offer a little something extra. All of our courses are underpinned by a series of graduate attributes that prepare you for the complexity and challenges of life beyond university. These attributes guide our teaching, learning and assessment practices, so they are at the heart of everything we do. Better yet, we have worked closely with our industry partners to develop these attributes, so we know that they are important to your future employers too.

UTS graduates:

Critical Thinking

Are reflective, critical thinkers who influence practice, policy and research to achieve clinical excellence and transform healthcare services.

Leadership

Are effective, collaborative and responsive leaders who considers health care in a global context.

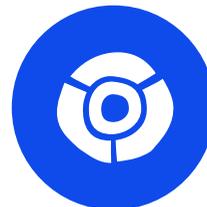

Accountability

Are socially, culturally and ethically accountable when engaging with individuals, families, interdisciplinary teams, communities, organisations and jurisdictions.

Communication

Communicate effectively and appropriately in challenging, complex and diverse situations.

Indigenous Cultural Respect

Demonstrate professional cultural competency which contributes to the health and wellbeing of Indigenous Australians, inclusive of physical, social, emotional and spiritual wellness.

Where to from here?

Our course content and research go hand in hand, so what you learn in the classroom reflects the latest knowledge in the field. Our courses will help you to pursue specialist positions, such as health information or health planning management, or generalist opportunities where additional knowledge of planning or health information management provides a competitive advantage (e.g. clinical and practice managers, directors of nursing, nursing and midwifery unit managers, quality and safety positions).
