

Visiting UTS during COVID-19

This checklist and guide is for anyone preparing to come to UTS for an event, short course or other activity. Make sure you understand these instructions and follow any extra instructions from staff and signage once on campus.

You must not come to campus if you have:

- a cough, sore throat, fever, runny nose, loss of smell or loss of taste
- travelled to a [restricted area](#) in the last 14 days
- been diagnosed with COVID-19 or come into contact with someone who has been diagnosed in the last two weeks

When on campus you should:

- maintain 1.5 metres physical distance from others where possible
- check with the event or course organiser whether you should check in or if your details need to be captured in case we need to do contact tracing
- frequently wash your hands with soap and water for at least 20 seconds, or use the provided hand sanitiser dispensers where handwashing isn't possible
- avoid gathering in crowds (for example in lifts or at the entrance to teaching spaces) and follow any instructions to maintain proper physical distancing
- wipe down any workspaces you use with the provided sanitising wipes
- respect those around you — pay attention to others' body language, take responsibility for your own behaviour and speak up if you feel uncomfortable

What we're doing to keep UTS safe:

- Signage to encourage physical distancing and exemplary hygiene.
- Increased cleaning and disinfecting, particularly in public spaces.
- More hand-sanitising stations and disinfectant wipes provided across campus.
- Ultra-violet lighting (which inhibits viruses) added to escalator handrails.
- Increased building ventilation, and improved air filtering.
- Removed some furniture on campus to help promote physical distancing.
