Our Commitment to Public Health

From the Head of School

Almost 3 years ago I had the honour of being appointed as the inaugural Head of the School of Public Health. During this tenure, I have been inspired by the passion and dedication of the School's staff and students. We have gone through a particularly difficult period caused by the pandemic, maintaining our values throughout, and working hard to sustain our success.

In the pages that follow you will see why the School's reputation continues to grow, such as the recognitions and accomplishments of Professor Faye McMillan (AM) being appointed as the Deputy National Rural Health Commissioner, as well as being awarded the 2022 Pharmaceutical Society of Australia (PSA) Australian Pharmacist of the Year. Faye was also successful in being awarded a *Medical Research Future Fund* (MRFF) Indigenous Health Research Fund Grant. Dr Amie Steel was awarded a prestigious 4-year Australian Research Council (ARC) Future Fellowship and Associate Professor Anne Grunseit was awarded a National Health and Medical Research Council (NHMRC) Ideas Grant.

In teaching and learning, the School continues to provide world-class education across our undergraduate and postgraduate programs. Not only did student enrolment numbers continue their increasing trend, but student feedback was impressive. Of particular note was Dr Shannon Lin's Diabetes Education and Management course, which was recognised by UTS as an 'Outstanding and Commendable Course'. We were also very proud of our PhD students who successfully completed their studies, including Edward Ameyaw, Phillip Cottingham, Anna Doab, Alastair Gray, Bobby Porykali, and Deborah Stockton.

Our research endeavours continued to flourish. We had our most successful year to date in terms of research income (\$4.9M) and we maintained our impressive level of high-quality publication output (155 peer reviewed publications).

Engagement with our industry, community and professional organisation partners is vital for the enhancement of our teaching and learning activities as well as for the guidance of our future research activities. Thus, it was pleasing to see so many new partnerships established in 2022 alongside the continued work with our wonderful existing partners.

We were excited to welcome several new academic staff members in 2022. Professor Faye McMillan and Dr Demelza Marlin joined our Girra Maa Indigenous Health discipline. Associate Professor Anne Grunseit and Dr Albie Sharp, Associate Professor Kris Rogers, Dr Leonie Cranney, and Dr Claire Rogers all joined our Public Health discipline. We were also very pleased to welcome our School Manager Jo Dwyer.

We were also delighted that the following academic staff were successful in their application for promotions: Associate Professor Deborah Debono and Associate Professor Jane Frawley (to level D); Dr Suyin Hor and Dr Rachel Grove (to level C); and Dr Janelle Craig (to level B).

Finally, I wish to extend my gratitude to our staff and students for their continued commitment to improving population health amid ever-changing challenges.

I am proud to share with you the 2022 School of Public Health Annual Report.

Professor David Sibbritt
Head of School and
Professor of Epidemiology

“Studying this degree has changed my view on health care systems and all aspects of health.”

Hailey Blatchford,
Bachelor of Health Science

The School of Public Health: Initiatives and Highlights 2022

Our Vision

To improve population health by training health professionals and researchers through world-leading education in public health and health services management.

Our Strategic Priorities

People and Culture

School of Public Health Objective:

To create a happier, healthier, more harmonious workplace in which staff can flourish and ensure that every staff member of the School is recognised as playing a central role in achieving our vision.

In 2022, we:

- Provided a range of strategies to ensure all staff and students have access to good pastoral and cultural care and academic support
- Ensured that the workplace is supportive with a collaborative, ethical and safe culture and climate
- Retained and recruited high quality staff.

Excellence in Teaching and Learning

School of Public Health Objective:

To prepare the next generation of public health leaders through the delivery of innovative education.

In 2022, we:

- Embedded Indigenous knowledges throughout all curricula, assessments and research
- Engaged with industry and other partners to ensure the relevance, sustainability of programs and the employability of public health graduates
- Provided a population health perspective and training to clinical professionals
- Engaged with groups within and external to the Faculty regarding new inter-disciplinary and cross-Faculty teaching and learning opportunities
- Prepared for International student intake in MPH in 2023.

World Class Research

School of Public Health Objective:

To lead rigorous and action orientated research that transforms health policy and practice to meet the future health needs of populations.

In 2022, we:

- Developed and improved relationships with key Indigenous leaders and communities to ensure two-way learning and exchange
- Provided mentorship, leadership and capacity building for the development of the next generation of Indigenous researchers
- Co-designed and co-produced research with Indigenous communities and other populations experiencing health inequities
- Leveraged existing and developed new partnerships to grow our transdisciplinary research activities and programs
- Worked with key stakeholders to develop our priority future public health and health services research agenda for agreed populations experiencing health inequities.

Engagement and Partnerships

School of Public Health Objective:

To make a difference in our communities through strong collaboration with our key stakeholders.

In 2022, we:

- Offered adjunct positions to prestigious public health and health services alumni and industry partners
- Created and maintained a thriving public health alumni network
- Established an Advisory Board for the School including Indigenous stakeholders and consumer groups
- Hosted symposia, seminars and workshops on transdisciplinary public health issues.

Strengthening our Indigenous Profile

School of Public Health Objective:

To increase awareness at UTS and beyond about Girra Maa Indigenous Health Discipline teaching, research and community engagement.

In 2022, we:

- Hosted an Indigenous Health Research showcase event, an inaugural Annual Elder Lecture and a bi-annual workshop
- Redesigned, updated and promoted the Girra Maa Indigenous Health Discipline website
- Provided resources for School staff to communicate confidently about Indigenous health and Girra Maa at UTS.

The Year in Review

Completed the **transition to online teaching** of postgraduate teaching programs in Health Services Management and Public Health

Introduced new majors in **Indigenous Health and Health Promotion** in the BHSc

10

leadership seminars were held in 2022, entitled '**The Future of Health and Social Care Industries**', organised by the HSM team in conjunction with our industry collaborators and adjunct industry fellows

7

Indigenous scholarships were awarded during 2022 to students for their studies in Diabetes Education and Management

The Health Services Management team was awarded the **UTS Learning and Teaching Awards**, Learning Futures Team Category for Health OPM

Introduced **peer-reviewing of subjects** in the Bachelor of Health Science degree

3 year

reaccreditation was gained from the **Australian Diabetes Educators Association (ADEA)**, applauding the Grad Cert in Diabetes course as the most outstanding course in Australia

40

industry representatives were involved in delivering the **Graduate Certificate in Diabetes Education** course across the year

5 staff were awarded academic promotions
4 staff were appointed to industry boards
6 staff were recipients of academic and industry awards

Indigenous knowledges were embedded throughout all curricula, assessments and research

Events held over the year: writing retreats, research retreats, school planning day, school retreat, lunchtime seminar series, morning-teas, Girra Maa showcase, staff social events, and Girra Maa hosted the annual ADARRN Symposium

155 peer reviewed publications were authored during the year

\$4.9mil

was awarded, making **2022** the most successful year to date in terms of research income

20 faculty staff attended the Girra Maa staff facilitated **'Press Play' cultural capability training** in 2022

New **advisory board** was introduced consisting of industry partners and SoPH leadership group

Over 20 national and state committees benefitted from **Girra Maa staff involvement** across the year

1 community-engaged research projects with Indigenous communities and other populations experiencing health inequities were progressed in 2022

The HSM team were awarded three contracts from the **NSW Clinical Excellence Commission**

“As a health professional, you can’t ever stop learning, because the evidence is changing all the time.”

Anna Barwick,
Graduate Certificate in Diabetes
Education and Management

Research Achievements in 2022

It is with pride and pleasure that we showcase the impressive research initiatives, activities and successes of the School of Public Health in 2022.

We are excited to report that the research metrics, outputs and achievements of SoPH academics in 2022 continue to impress and represent a remarkable achievement for our relatively new School.

The outputs and achievements detailed in this annual report are in large part testament to the hard work, dedication, skill and collegiality of all academic and non-academic staff across the School. I would like to take this opportunity to thank each SPH staff member for helping to maintain and in many cases grow our research program throughout 2022.

This last 12 months' activity and success well-position our School, Faculty and UTS as leaders in rigorous evidence-based health research that is impactful and meaningful to many across and beyond the academy.

Our expert and dedicated multidisciplinary researchers and the foundation of our research efforts to date both provide a solid platform on which to build an ambitious future in leading and helping advance health research of local, regional, national and global impact.

Distinguished Professor Jon Adams and Dr Amie Steel celebrating 10 years of ARCCIM (Australian Research Consortium in Complementary and Integrative Medicine), in December 2022

SoPH Research Capacity

The School houses 35 academics. All SoPH academic staff are research active as aligned and relative with their specific workload mix and level of appointment. The School is privileged and fortunate to also house the Girra Maa Indigenous Health Discipline which continues its significant and broad contributions across research, impact, community partnerships and governance.

A core focus for SoPH is to do all possible to support and develop academic talent across public health and health services management.

Publications Overview

In 2022, SoPH academics authored 155 peer-reviewed publications. In 2022, SoPH academics co-authored with numerous colleagues from across UTS (with co-authorship both across other Schools in the Faculty of Health including Sport and Exercise Science, Graduate School of Health and Nursing and Midwifery and across other Faculties including FEIT, Science, ISF and DAB).

Moreover, many of the peer-reviewed publications also involved co-authorship and collaboration with a range of academics from across and beyond Australia (including co-authors from Canada, the US, Hong Kong, Germany, the UK, Italy, New Zealand, Sweden, Thailand, Brazil, and Denmark amongst many others). Our extensive research publication output also illustrates excellent co-authorship success across our HDR student-HDR supervisor teams – an achievement supported by our 2022 HDR research funding initiative to encourage submission to open-access, Q1 publications.

Research Grants and External Research Income

In 2022, SoPH academics attracted in excess of \$4.9M in external research income across all research categories of funding (1-4) including major NHMRC and ARC awards to UTS. Overall, SoPH staff were named on over \$76M of external research income. School researchers also attracted more than \$350K of philanthropic and industry support in 2022 (including gifts from Osteopathy Australia, Swedish Osteopathic Association, Osteopathy Foundation, Massage and Myotherapy Australia and Vital.ly amongst others). Please refer to External Grant Highlights overleaf for some of our noteworthy achievements.

Distinguished Professor Jon Adams
Deputy Head of School (Research) School of Public Health

External Grant Highlights 2022

Project title	CI	Funder
Applying reverse translation to the parkrun phenomenon to identify effective, sustainable methods for scaling-up public health interventions.	Assoc Prof Anne Grunseit	National Health and Medical Research Council /Ideas Grant. \$569,799
A COVID-19 decision aid to support adult and child vaccine uptake in multicultural communities.	Assoc Prof Jane Frawley	Australian Digital Health Agency. \$167,291
Australian Partnership (for) Preparedness Research on Infectious (disease) Emergencies (APPRISE): A COVID-19 decision aid to support adult and child vaccine uptake in multicultural communities.	Assoc Prof Jane Frawley	National Health & Medical Research Council. \$92,040
Engaging the forgotten public health workforce.	Dr Amie Steel	Australian Research Council. \$889,116
Preparing Australia for the next pandemic: Managing controversy; promoting trust.	Dr Suyin Hor	National Health & Medical Research Council. \$74,310
Expression of Interest for the evaluation of a social prescribing service.	Prof Joanne Travaglia	Feros Care Limited. \$119,482
NSW Prison Experience Project: Development of a methodology and methods to understand the experiences of people in NSW correctional centres.	Prof Megan Williams	Corrective Services NSW. \$133,291
Evaluation of the Early Stage Breast Cancer Bundle Pilot Program.	Dr Sarah Wise	GenesisCare Ventures Pty Ltd. \$327,000
Creating Health in a New Home: A transformative approach to building evidence for refugee health across generations	Prof Angela Dawson	National Health & Medical Research Council. \$889,116
The association between primitive reflexes, motor function and executive function in preschool children.	Dr Amie Steel	Osteopathy Australia. \$12,029
Folate for Miscarriage Pilot Study.	Dr Amie Steel	Balchem Corporation. \$32,000
Vaccination behavioural insights research to inform tailored resource development in three Pacific Island Countries.	Assoc Prof Jane Frawley	The Department of Foreign Affairs and Trade. \$19,548
The role of the osteopath and naturopath in preventive health behaviours in the community: an explanatory sequential mixed methods study.	Dr Amie Steel	Naturopaths and Herbalists Association of Australia. \$10,000; Osteopathy Australia. \$10,000

Teaching and Learning Achievements in 2022

I am delighted to present this annual report of teaching and learning in the UTS School of Public Health. The year saw the School's strong commitment to high-quality education continue, with our aim to develop graduates who will improve public health and health services.

This year saw the completion of the transition of our postgraduate teaching programs in health services management and public health to being completely online. This was a significant effort, and I am grateful for the efforts of our academic and professional staff in developing world-class online offerings. We began to teach the restructured Bachelor of Health Science program and introduced new majors in Indigenous Health and Health Promotion.

In 2022, we continued to improve the quality of our offerings. We initiated a peer-review of subjects in the Bachelor of Health Science degree, which strengthened the subjects. We also continued to improve our postgraduate offerings based on student and industry feedback.

The School has a strong commitment to embedding the Indigenous Graduate Attribute throughout its teaching, with an aim of developing our graduates' professional competencies working with Indigenous people and communities. I was particularly delighted to see that seven Indigenous students obtained scholarships for their studies in Diabetes Education and Management, and I am grateful to our industry partners and donors for supporting these scholarships.

Lastly, working with the students who study in the School of Public Health is a privilege.

Professor Andrew Hayen
Deputy Head of School
(Teaching and Learning)
School of Public Health

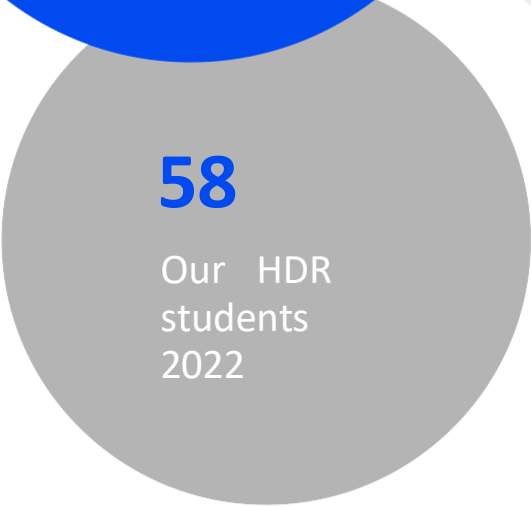

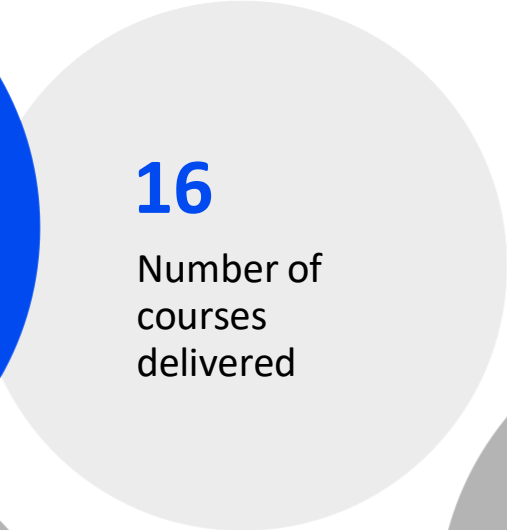

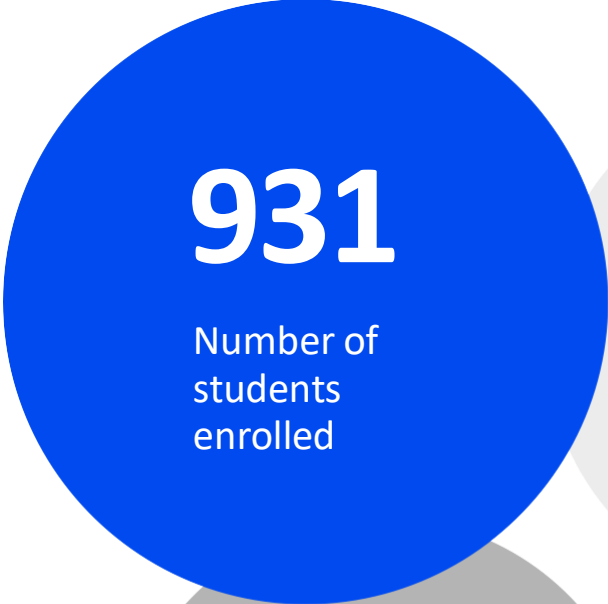

SoPH Lecturer Dr Abela Mahimbo with PhD candidate Salma Ahmed

Our Students and Programs 2022

Teaching and Learning Course Reports

Bachelor of Health Science

In 2022, the Bachelor of Health Science program experienced another productive year. The second cohort was welcomed to the program's updated version, which included a full return to on-campus teaching across all years and subjects. Although COVID-19 restrictions were mostly lifted throughout the year, the pandemic still presented challenges for staff and students, leading to an increased demand for pastoral care and learning support.

The implementation of new majors in Health Promotion, Indigenous Health, and Public Health continued to be a focus in 2022. The program started offering students the first subjects in these new majors, providing more options for students to specialise and tailor their studies to their interests, career goals and industry expectations.

In an effort to improve the program's teaching and learning approaches, a peer review process was established in 2022. The process involved an emphasis on community- and team-driven approach to teaching and learning, and all core subjects were reviewed. The feedback from the School of Public Health and the wider university teaching community was positive, demonstrating our commitment to excellence.

Moreover, the school took steps to future-proof its undergraduate offerings by consulting with students and faculty to rename the program to the 'Bachelor of Public Health.'

Additionally, the school developed a suite of new double degree programs with the Business School and the Transdisciplinary School, set to launch in 2023.

Dr Daniel Demant

Course Director,
Bachelor of Health Science

Graduate Certificate in Diabetes Education

In 2022, the Graduate Certificate in Diabetes Education continued with its strong growth with the aims of providing students with the best-evidenced knowledge and skills to become diabetes educators. We continued to offer fully online teaching with face-to-face clinical placement across Australia with additional face-to-face workshops to suit the diversity of needs from students.

We taught four subjects with over 300 students. The course continued to play a vital role in strengthening the diabetes workforce capacity in Australia as evidenced by its successful gaining another three-year reaccreditation from the Australian Diabetes Educators Association (ADEA) which applauded the course as the most outstanding course in Australia. This is a testament to the quality of teaching and learning from the course. In addition, the course successfully retained six Indigenous students as well as attracted philanthropies to support those Indigenous students. This is an important achievement, as it reflects the school's strategic goals to commit to inclusive teaching and Indigenous health.

Besides, the course maintained high industry involvement, with over 40 industry representatives involved in the course. This highlights the commitment the course has to well prepare our graduates to be work-ready while continuing to increase its impact and collaboration with the industry.

Dr Shannon Lin

Course Director,
Diabetes

Master of Public Health

It has been a great year for the Master of Public Health. Our student numbers have continued to grow, and student retention is excellent. Joining with Keypath and moving the MPH online has increased visibility and access to students outside of Sydney, leading to an increase in students from other States and Territories across Australia, including rural and urban areas. Our student body continues to be diverse in terms of academic and professional background, which adds to the richness of the course.

The feedback from students enrolled in the MPH, as well as the graduate Certificate and Graduate Diploma of Public Health, and the Graduate Certificate in Public Health and Communicable Disease has been excellent. The School of Public Health continues to work with UTS Online, and postgraduate learning futures to develop new subjects and courses in 2023. We also have a continuous cycle of improvement with our existing subjects and strive for excellence in innovative, research informed teaching.

Dr Klaus Gebel (Jan-Jun), Assoc Prof Jane Frawley (Jul-Dec)

Course Directors, Master
of Public Health

Health Services Management

2022 was a year of transformation for the Health Services Management team. With four full-time staff members, the team successfully delivered the Master of Health Services Management – now fully online – through COVID.

The team welcomed 85 new enrolments in 2022. The team was awarded the UTS Learning and Teaching Award “Learning Futures Team Category for Health OPM: A paradigm shift in learning and teaching.” Our lead in health data, Janelle Craig was also awarded the School’s Excellence in Teaching prize.

During 2022, the HSM team provided supervision to 17 PhD students, with two graduating during the year.

During 2022 HSM has continued to collaborate with Indigenous colleagues to embed Indigenous ways of knowing, being, and doing in a core subject in the HSM program for students to meet the Indigenous Graduate Attributes. Students report changes in hearts and minds and a commitment to “doing things differently” to address inequities experienced by Indigenous Australians. Planned changes to subjects in 2023 will embed Indigenous ways of knowing, being and doing in other core HSM subjects in 2023.

Suyin and Deborah participated in FoH PRESS PLAY - a cultural capability community of practice in the FoH. They completed Griffith University’s Yuwahn Wupin (‘culturally able’ in Yugambeh) online modules to develop and deepen their cultural capability.

In recognition of her sustained contribution to Aboriginal and Torres Strait Islander health and well-being in teaching and service, Deborah was invited to join the Dean and eight other FoH leaders at the Aboriginal Medical Service Redfern 50th Anniversary Gala Dinner in November 2022. This event celebrated leadership achievements by Aboriginal and Torres Strait Islander people, and inspired us to keep working on our strategies and directions.

Prof Emily Callander
Head of Discipline,
Health Services Management

Bernard Saliba (Lecturer), Prof David Sibbritt (Head of School), Dr Daniel Demant (Senior Lecturer) and Dr Klaus Gebel (Senior Lecturer) at the March 2022 Graduation Ceremony

“I want to make an impact in our society and contribute to creating equity among vulnerable groups. I have a desire to use translational research for intervention development among at-risk youth and adolescents, who are subject to substance abuse and complex mental health issues.”

Alexandra Bartholomew,
Master of Public Health

Girra Maa Indigenous Health Discipline

During 2022, Girra Maa Indigenous Health Discipline staff excelled across research, teaching and learning, community engagement, and service to UTS. Throughout 2022 Girra Maa was led by Professor Megan Williams – Wiradjuri and lecturer Danielle Manton – Barunggam, employing Ngiyampaa Dr Mark Lock 0.4 FTE from February to September. We welcomed Dr Demelza Marlin – Wiradjuri in March at 0.4 FTE and Professor Faye McMillan AM – Wiradjuri in October as 0.6 FTE in addition to her 0.4 role as Deputy National Rural Health Commissioner (Allied Health and First Nations Health).

In 2022 Girra Maa staff were named on research successfully funded to a total of over \$72 million dollars. These projects aim to pursue Indigenous peoples' solutions to rectify major social issues including systemic racism in prisons and child protection and violence against Aboriginal and Torres Strait Islander women.

Girra Maa staff also worked on other research funded by the MRFF, NHMRC, ARC, industry and governments, generally with a focus on social and emotional wellbeing, sovereign relationships, decolonising methodologies and measures for success. Research was partnered with Queensland Health, Brisbane Youth Detention Centre, Ted Noffs Foundation, Mibbinbah and The Glen, for example.

Girra Maa staff were active in publishing and research translation including through the Yuwinbir Special Issue of Health Sociology Review as Associate Editors in collaboration with the NHMRC Centre for Research Excellence in Strengthening Systems for Indigenous Research Equity (MW and DM). Team members held Associate Editor roles of Australian Journal of Rural Health (FM), PLOS Global Public Health Section – Indigenous Health (FM) and Current issues in Criminal Justice (MW). Media engagements included the ABC and SBS (MW) as well as Croakey Health Media (MW and DM), particularly in relation to the coronial inquest of Aboriginal woman Veronica Nelson.

The Australasian Evaluation Society included in their Cultural Safety Framework the Ngaa-binya Aboriginal evaluation framework (MW), and Girra Maa staff presented at the National Aboriginal Community Controlled Health Organisation conference (FM), International Corrections and Prisons Association Conference in Orlando, Florida (casual team member Dr Kevin Bradley), Informa National Health Workforce Summit, Services for Rural and Remote Allied Health (SARRAH) National Conference (FM) and St Vincent's Health Australia forum on drug law reform (MW).

Among Aboriginal and Torres Strait Islander community-controlled services, Girra Maa staff held advisory roles with the Aboriginal Drug and Alcohol Residential Rehabilitation Network (DM), Yerin Empowerment Committee (DM), The Glen for Women residential drug and alcohol rehabilitation centre Working Party (DM), Deadly Connections (MW) and Mibbinbah (MW).

Girra Maa staff held roles on national and state committees including Croakey Health Media (MW), National Prisoner Health Information Committee of the Australian Institute of Health and Welfare (MW), Justice Health and Forensic Mental Health Network Human Research Ethics Committee (MW), Corrective Services NSW Aboriginal Advisory Council (MW), Aboriginal Working Group-Patient Reported Outcome Measures for the NSW Agency for Clinical Innovation (ML), Equally Well Project Management Committee (ML) and Our Yarning Advisory Group (Library for All) (ML), NSW Health's Health Education Training Initiative (HETI) Aboriginal Allied Health Network Steering Committee (DM) and the Australian Physiotherapy Council Accreditation Committee and Reconciliation Working Party (DM), National Mental Health Workforce Strategy Taskforce (FM), NSW Mental Health Community Advisory Council (FM), Puggy Hunter Memorial Scholarships (FM) and Australian Pharmacy Council (FM).

In terms of service to UTS, Girra Maa facilitated 'Press Play' cultural capability training among 20 Faculty staff with a community of practice formed (DM). Girra Maa staff also contributed to Faculty strategic and budget development, and Aboriginal and Torres Strait Islander staff recruitment, including launching *Get REDI – Get Recruiting into Every Discipline Indigenous Academics*. Girra Maa promoted tasks for all staff identified in the Faculty *Indigenous Education, Research and Employment Strategy* and contributed to SPH and other UTS colleagues understanding industry accreditation

needs about Indigenous health. In October Girra Maa joined with many others around Australia welcoming cultural safety into legislation, and began providing information to colleagues about implications for curriculum and staff training.

Girra Maa staff engaged with marketing of subjects and scholarships, provided advice about engaging with philanthropists, and about cultural property rights. Girra Maa produced a calendar of events significant to Aboriginal and Torres Strait Islander communities, and a guide to NAIDOC.

Girra Maa contributed to Jumbunna's draft Indigenous student research guide, supervised seven RHD students and presented at the Chancellor's Post-doctoral scholarship forum.

Girra Maa held its own warm and welcoming morning tea, and hosted the annual ADARRN Symposium at UTS with over 60 community and government attendees (DM). Girra Maa also joined with faculty staff at the Redfern AMS 50th anniversary gala event.

Girra Maa contributed to other UTS colleagues' gatherings including the INSIGHT Digital Collaborative Stakeholder Roundtable, the Scaling Climate Impact focus group and the Work Integrated Learning and Teaching Forum.

Girra Maa supported colleagues across UTS in planning, reviewing and implementing curriculum and assessments to meet the Indigenous Graduate Attribute, and assisted with various Course Intended Learning Outcomes updates.

In addition to assisting others in teaching and learning, Girra Maa successfully delivered one postgraduate and two undergraduate subjects and prepared an additional two new subjects for 2023 offerings for the Major of Indigenous Health in the Bachelor of Health Science.

Girra Maa encouraged colleagues to continue using its wattleseed artwork, Acknowledgement of Country video, ethical research planning kit and tips for terminology when communicating with and about Aboriginal and Torres Strait Islander people and communities.

Cultural Safety Framework – inclusion of the Aboriginal evaluation framework

Prof Megan Williams - the Australasian Evaluation Society included in their Cultural Safety Framework the Aboriginal evaluation framework that was published by Professor Williams.

Aboriginal Alcohol and Drug Residential Rehabilitation Network (ADARRN) Symposium

Ms Danielle Manton, Lecturer in Indigenous Health, alongside the Girra Maa Indigenous Health Discipline hosted the Aboriginal Alcohol and Drug Residential Rehabilitation Network (ADARRN) Symposium in September with over 60 community and government attendees.

Top researcher in the field of Alternative & Traditional Medicine

Dr Amie Steel - the Research Magazine of The Australian compiled a list of the top researchers and research institutions in Australia for various fields in Health & Medical Sciences. In 2022 Amie was listed as the "Top researcher in the field of Alternative & Traditional Medicine" for the second year in a row, based on the number of citations for papers published in the top 20 journals in each field over the past five years.

Australian Research Council (ARC) Future Fellowship

Dr Amie Steel, Senior Research Fellow with Australian Research Centre in Complementary and Integrative Medicine (ARCCIM) was awarded \$932,000 over four years by the Australian Government under the Australian Research Council (ARC) Future Fellowships scheme. The Fellowship will facilitate Dr Steel's work, to use a consumer-informed methodology to examine health promotion and complementary medicine. ARC Future Fellowships are awarded to the best and brightest of Australia's mid-career researchers, to undertake high quality and innovative research, and to find solutions to key industry challenges, with potential future benefits both nationally and internationally.

Co-convenor of Women's Health SIG - Public Health Association of Australia

Dr Abela Mahimbo

Advanced Accredited Practising Dietitian (AdvAPD) credential

Dr Shannon Lin, Lecturer and Course Director of Diabetes was awarded as Advanced Accredited Practising Dietitian (AdvAPD) in July 2022 by Dietitians Australia. This prestigious credential recognises her clinical excellence and leadership in the areas of diabetes and aged care, and acknowledges her position in the top 1% of dietitians in Australia. Shannon is also the first advanced diabetes dietitian working in the Indigenous community in Australia.

Chair appointment: Australian Diabetes Educators Association-NSW

Dr Shannon Lin, Lecturer and Course Director of Diabetes

Australian consensus statement on the use of specific nutritional formulations in the management of diabetes

Dr Shannon Lin, Lecturer and Course Director of Diabetes was selected to develop the first Australian consensus statement on the use of specific nutritional formulations in the management of diabetes. This is the joint statement from the Australian Diabetes Society (ADS), Australian Diabetes Educators Association (ADEA), Dietitians Australian (DA) and Royal Australian College of General Practitioners (RACGP) to address the current obesity epidemic among people with diabetes.

Chair Appointment: Health and Medical Research Ethics Committee

Dr Daniel Demant, Senior Lecturer in Public Health and Course Director, BHSc

Board Appointment: Council of Academic Public Health Institutions Australasia
