Careers sorted by Interests

Print Share

Your interests can help you find careers you might like to explore. The more a career meets your interests, the more likely it will be satisfying and rewarding to you. Click on the interests below to learn more about them and explore careers related to them.

- **Realistic** — practical, hands-on problems and solutions
- **Investigative** — ideas, thinking, and figuring things out
- **Artistic** — creating, designing, and making your own rules
- **Social** — helping people, teaching, and talking
- **Enterprising** — leading, making decisions, and business
- **Conventional** — data, detail, and regular routines

PERSONALITY
People interested in this work like activities that include **practical, hands-on** problems and solutions.

They do well at jobs that need:

- Dependability
- Attention to Detail
- Cooperation
- Stress Tolerance
- Adaptability/Flexibility
- Initiative

TECHNOLOGY
You might use software like this on the job:

- **Spreadsheet software**
 - Microsoft Excel
- **Electronic mail software**
 - Microsoft Outlook
- **Development environment software**
 - National Instruments LabVIEW

Business Teachers, Postsecondary

Print Share

Also called: Business Instructor, Business Professor, Instructor, Professor

What they do:

Teach courses in business administration and management, such as accounting, finance, human resources, labor and industrial relations, marketing, and operations research. Includes both teachers primarily engaged in teaching and those who do a combination of teaching and research.

On the job, you would:

- Prepare and deliver lectures to undergraduate or graduate students on topics such as financial accounting, principles of marketing, and operations management.
- Evaluate and grade students' class work, assignments, and papers.
- Initiate, facilitate, and moderate classroom discussions.

KNOWLEDGE

Arts and Humanities

- English language

Education and Training

- teaching and course design

Business

- management
- accounting and economics

Math and Science

- arithmetic, algebra, geometry, calculus, or statistics

SKILLS

Basic Skills

- talking to others
- listening to others, not interrupting, and asking good questions

Problem Solving

- noticing a problem and figuring out the best way to solve it

People and Technology Systems

- thinking about the pros and cons of different options and picking the best one
- figuring out how a system should work and how changes in the future will affect it

ABILITIES

Verbal

- communicate by speaking
- communicate by writing

Ideas and Logic

- make general rules or come up with answers from lots of detailed information
- use rules to solve problems

Math

- add, subtract, multiply, or divide
- choose the right type of math to solve a problem

PERSONALITY

People interested in this work like activities that include **helping people, teaching**, and talking.

They do well at jobs that need:

- Integrity
- Analytical Thinking
- Independence
- Achievement/Effort
- Attention to Detail
- Adaptability/Flexibility

TECHNOLOGY

You might use software like this on the job:

Electronic mail software

- Email software
- Microsoft Outlook

Computer based training software

- Blackboard software
- Schoology

Word processing software

- Google Docs
- Microsoft Word

How to Find Your Path After School | Amba Brown | TEDxYouth@AIS

 TEDx Talks  40.3M subscribers

 Subscribed 

 3.5K   Summary  Share  Download  Clip 

Key insights

-  You should have the right to grow, learn, explore, and change your mind, rather than being pressured to commit to doing one thing forever.
-  The rise in mental disorders globally among youth emphasizes the need for a new approach to finding one's path after school.
-  Taking a gap year to travel and explore different options can lead to unexpected and fulfilling paths, challenging the traditional idea of going straight to university after high school.
-  It's not just me fumbling up and down in my path, it's the same for everyone. This is life.
-  These four basic choices will actually turn into over four thousand cities to visit more than four thousand degree granting universities alone in the world millions of jobs to choose

Can it bring (more) equality into education?

Key Takeaways

Top 10 skills of 2025

-  Analytical thinking and innovation
-  Active learning and learning strategies
-  Complex problem-solving
-  Critical thinking and analysis
-  Creativity, originality and initiative
-  Leadership and social influence
-  Technology use, monitoring and control
-  Technology design and programming
-  Resilience, stress tolerance and flexibility
-  Reasoning, problem-solving and ideation

Type of skill

-  Problem-solving
-  Self-management
-  Working with people
-  Technology use and development

Automated Agents

Give me 3 possible new courses for CEACAPA to run in Sydney?

Suggested plan 👍 👎

- Analyze website to know the existing courses
- Analyzing the given files to find the currently taught courses...
- Searching for best performing study abroad programs
- Find highest US-based popularity understanding topic trends
- Propose courses for CEACAPA and describe them

Start  **Edit**

<https://www.cognosys.com/>

I need more information to give you a better output

Do you have any specific criteria for selecting the new courses? For example, are there any specific subject areas that CEACAPA specializes in or would like to expand into?

Innovation, Critical Thinking, Agility, Climate change and the environment

Are the courses you are looking to develop at an undergraduate or postgraduate level?

Undergraduate Postgraduate

Are there any particular countries or regions that the CEACAPA students are coming from? It could be helpful to know this information when considering global demand for specific course topics.

Mostly from the US

Share the learnings (& failures) – expect rapid changes

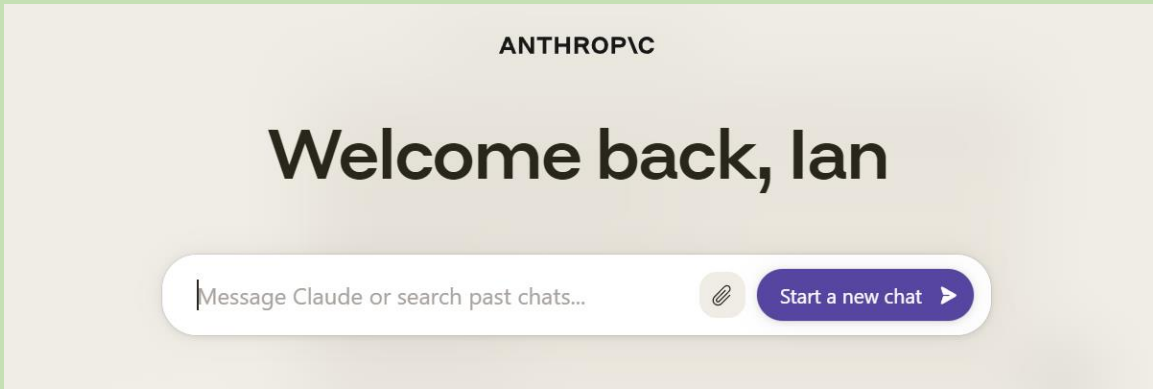

Policy and Regulations aren't keeping up

While ChatGPT reached 100 million monthly active users in January 2023, only **one country** has released regulation on generative AI in July

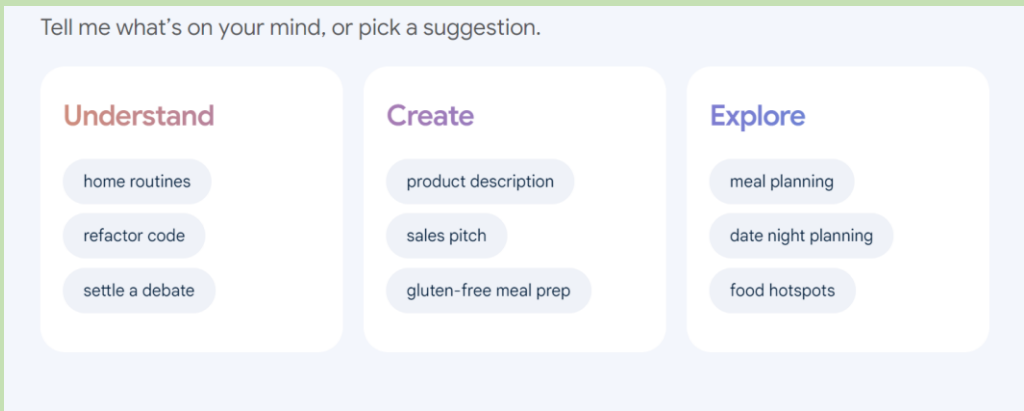

Future Trend	Negative Impact of Existing Skills	Curiosity	Sense-making	Creativity	Risk-taking	Tolerance for Ambiguity	Neurodiversity
Advancements in AI and Automation	Reliance on outdated coding paradigms; Resistance to AI integration	Drive exploration of AI capabilities	Interpret complex AI insights	Innovate with AI	Embrace experimentation in AI adoption	Navigate uncertainties of AI	Design inclusive AI systems
Emergence of New Technologies	Attachment to traditional design tools; Resistance to new tech adoption	Explore emerging tech applications	Understand tech complexities	Push boundaries with new tech	Embrace ambiguity in tech exploration	Navigate uncertainties of new tech	Design inclusive tech experiences
Focus on Sustainability and Ethics	Prioritization of profit over ethics; Resistance to change in ethical norms	Investigate ethical implications	Interpret ethical considerations	Integrate ethics into design	Challenge norms for ethical innovation	Navigate ethical gray areas	Design inclusive ethical solutions
Personalized and Contextualized Experiences	One-size-fits-all approach to design; Resistance to data-driven decision-making	Explore user preferences and behaviors	Interpret user data and feedback	Design tailored experiences	Experiment with personalized approaches	Adapt to evolving user needs	Design inclusive user experiences
Rise of Decentralized Technologies	Attachment to centralized systems; Resistance to blockchain adoption	Explore blockchain applications	Navigate regulatory and tech complexities	Innovate with decentralized tech	Embrace ambiguity in decentralized space	Navigate uncertainties of decentralization	Design inclusive decentralized systems
Integration of Voice and NLP	Resistance to voice technology; Attachment to text-based interfaces	Explore voice and NLP applications	Interpret language nuances	Design intuitive voice interfaces	Experiment with conversational AI systems	Embrace ambiguity in language processing	Design inclusive conversational AI systems

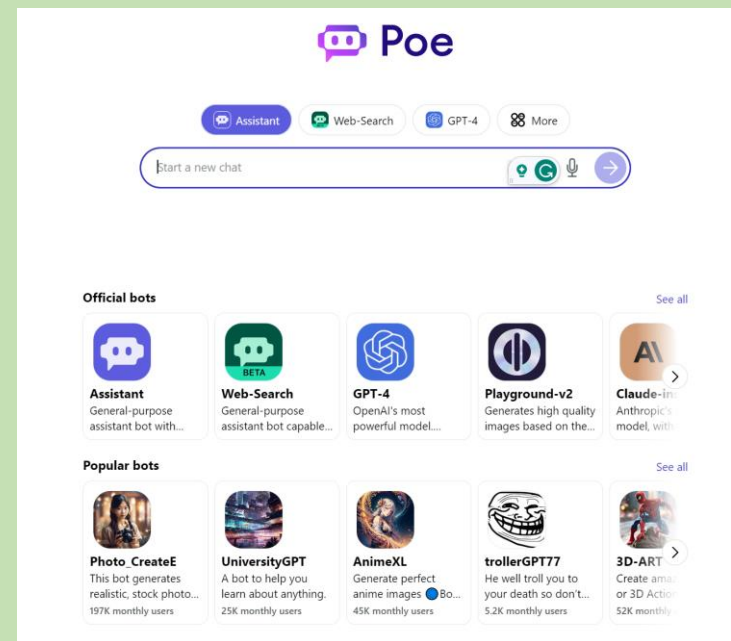

Not Just ChatGPT

*Horses for courses
so experiment*

Cogniti

AI agents, your way

Cogniti is designed by educators, and built by educators, to empower educators.

Create steerable and accurate agents powered by generative AI. Cogniti is designed to let teachers build custom chatbot agents that can be given specific instructions, and specific resources, to assist student learning in context-sensitive ways.

<https://cogniti.ai/>

Steerable

Create AI agents and control how they will interact with students.

Resourced

Provide your AI agents with web pages, files, and other resources to answer more accurately.

Equitable

Provide all students with the same access to powerful AI agents.

Insightful

Understand how your students are interacting with AI agents, to inform your teaching.

<https://cogniti.ai/>

Demo <https://app.cogniti.ai/agents/>

Developed by USYD Danny Liu

- No need for staff or students to create an account with OpenAI
- Access (and cost) are provisioned by the institution
- LMS integration (e.g. agents can be embedded as a plugin into an LMS, allowing seamless access for students)
- Conversations are logged and available to educators and administrators, increasing safety for students
- Students can flag and rate AI messages, and this feedback is provided to educators and administrators for continual improvement
- Cogniti is hosted on private and secure Microsoft Azure services, which are not connected with OpenAI's servers
