WELCOME

Welcome to the first edition of the UTS: Engineering and Information Technology's Industry Partnering Unit newsletter for 2013.

In this issue, we showcase a long-term partner of the internship program, profile some of our student interns, and invite you to harness the benefits of the program for your business. You can also discover more about the exciting possibilities for research and education that will be opened up by the faculty's stunning new building, set to be unveiled in 2014.

UTS: Engineering and Information Technology's Industry Partnering Unit facilitates your organisation's engagement with our faculty and students through internships and graduate placements, industry collaboration on teaching and research, and training and development of your staff. We look forward to working with you to create futures for your business.

INDUSTRY PROFILE

Gosford City Council engineering the future
Offering up to 18 UTS Engineering internship places annually, Gosford City Council are helping to shape the future of engineering talent in Australia – and in turn are accessing the highest calibre candidates for projects and future roles. Read more...

INTERNERSHIP PROGRAM

The diversity advantage: harnessing girl power in engineering
Sijjal Tasneem and Chantal Farrelly are part of a growing number of young women redressing the low participation rate of females in the industry, and the UTS Engineering Internship Program gives participating employers direct access to this emerging source of engineering talent. Read more...

Creating futures for your business
Can your business benefit from the enthusiasm, skills and fresh approach of future UTS Engineering graduates? Hundreds of companies each year have welcomed the opportunity to host student interns across a range of engineering disciplines, providing a flexible,
cost effective resource solution while making a real impact on the education of the next generation of engineers.  Read more...

DON'T MISS OUT:  ADVERTISING FOR INTERNSHIPS CLOSES 24 JULY

It's not too late to advertise internship positions for the second half of 2013.

Over 300 students are seeking internships, so to place your advertisement or for further information, call Maritza Messina on (02) 9514 7674 or email: maritza.messina@uts.edu.au

NEWS

New Broadway Building boosts scope for research and education in engineering

Whether it’s automatons engaged in social networking, mind-controlled wheelchairs, or grit-blasting robots on Sydney Harbour Bridge, UTS: Engineering and IT’s cutting-edge research culture will have even more room to flourish from 2014 when the faculty relocates to a new state-of-the-art building.  Read more...

EVENTS

11 July
UTSpeaks: Future Tech
Join UTS Faculty Engineering and Information Technology fellow Rob Livingstone as he provides a concise perspective on the implications of emerging technologies and offers practical insights on how many enterprises and individuals survive, and also thrive, in a world of rapid technology-induced change.

19 September
UTS Industry Event: New Biomedical Engineering Major
Join us at the launch of our new Biomedical Engineering major, network with other industry representatives, and find out how to be a part of this exciting program. For further details, contact Maritza Messina.

16 October
Industry Networking Event: Civil Engineering
Network with our students and other industry representatives in the civil engineering sector, and learn about best practices in internship placements. For further details, contact Maritza Messina.

16 October
Engineering and IT Careers Fair
Meet engineering and IT students seeking internships and graduate opportunities. For further details, contact Maritza Messina.
You have received this email from UTS: Engineering and IT Industry Partnering Unit as a result of previous contact with the internship or scholarships program. Should you no longer wish to receive these email, please click here.
